CS Group – hourly chart

CSG remains in the correction, which it entered following the January peak.
The decline from the high in January looks corrective as it can be labeld as double ZigZag a-b-c-X-a-b-c.
The second ZigZag is not yet complete as the present decline can test the support at 11.30/11.20.
My bet is still that the uptrend in December / January was impulsive and the decline since January is corrective in nature.
Therfore, I continue to expect a break above 12.50.

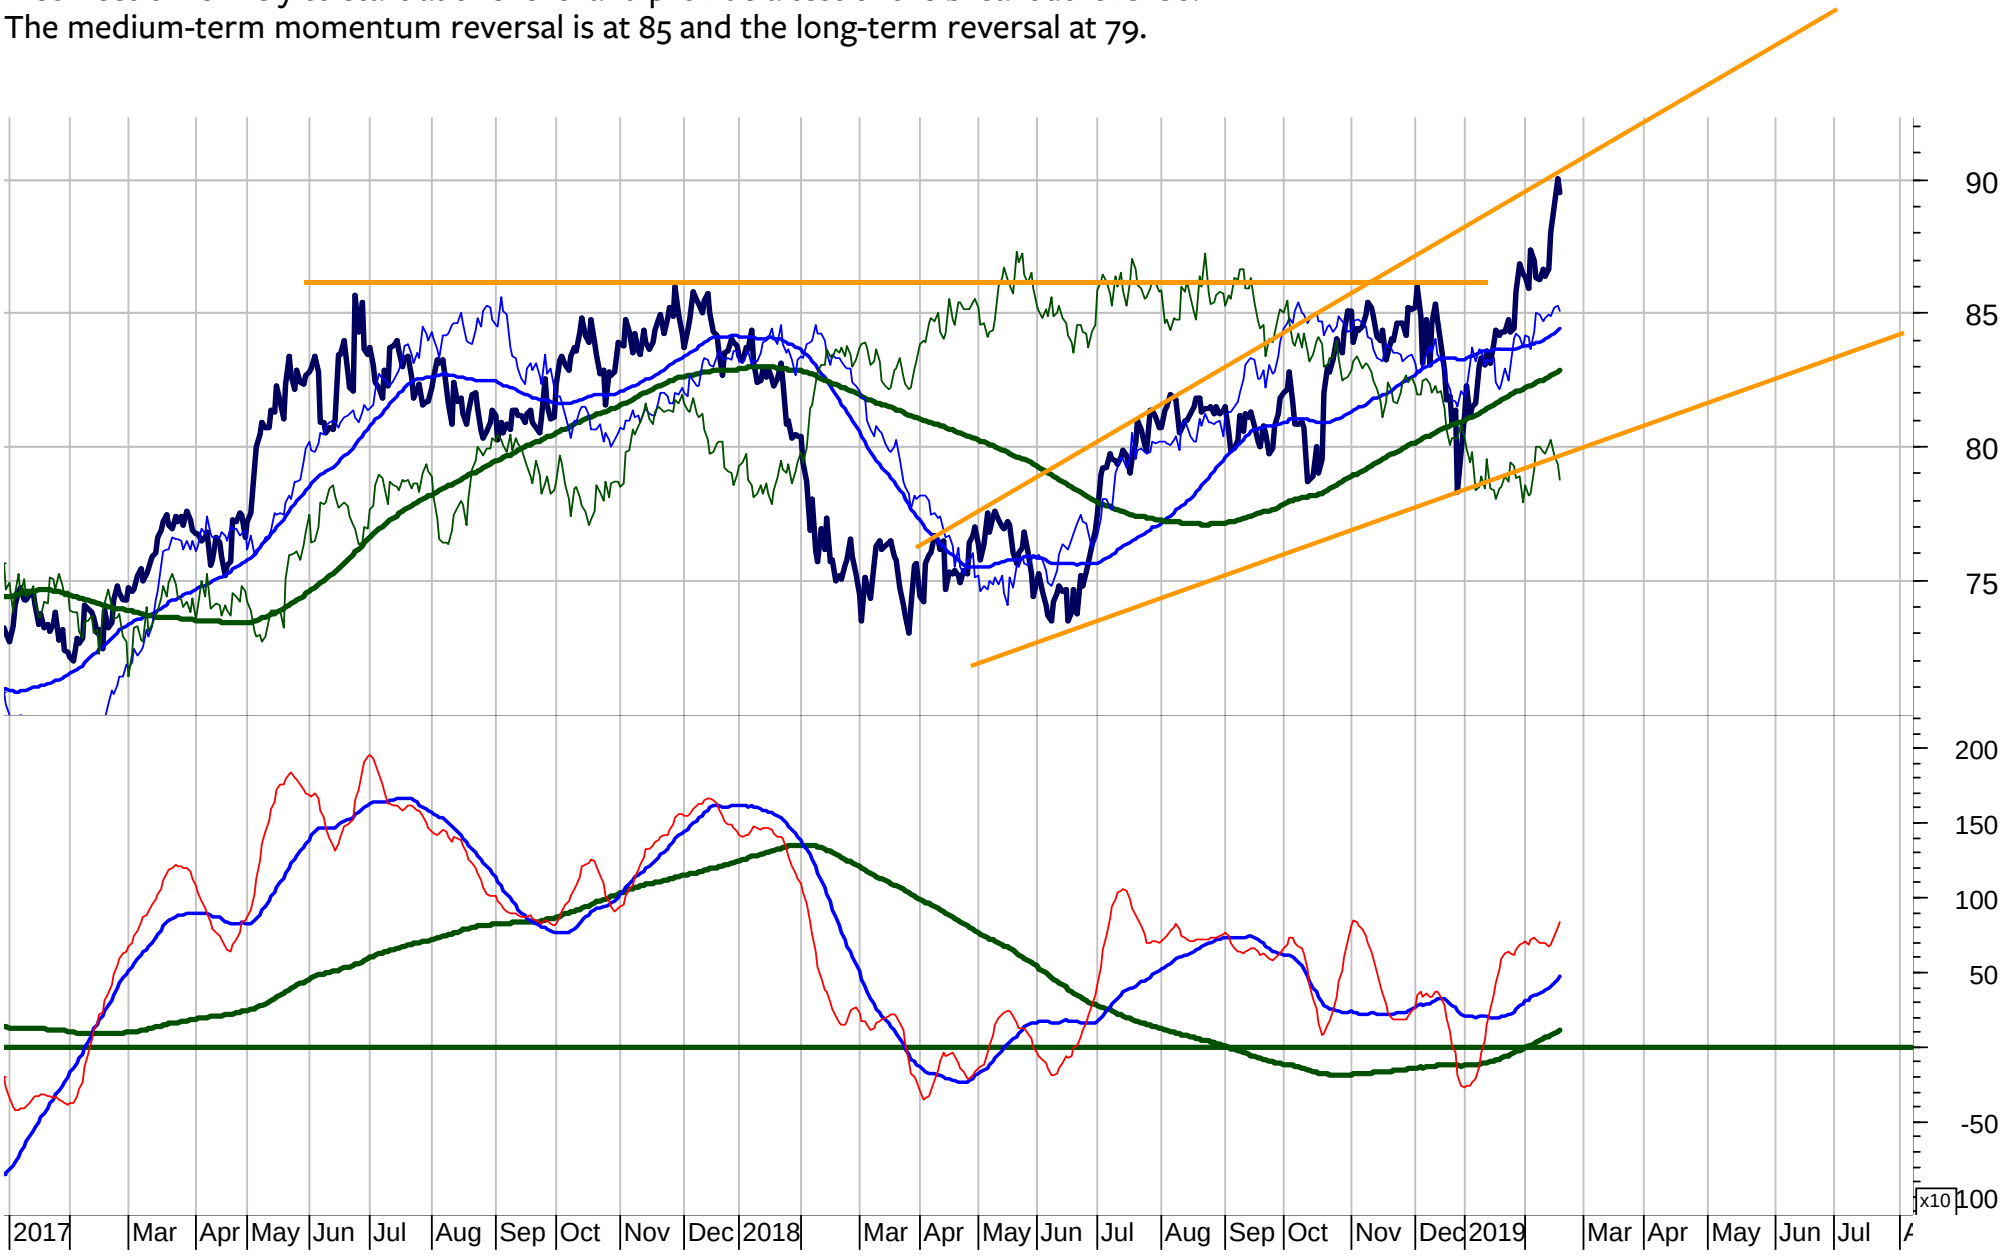
Companies marked blue are constituent stocks of the Swiss Market Index SMI

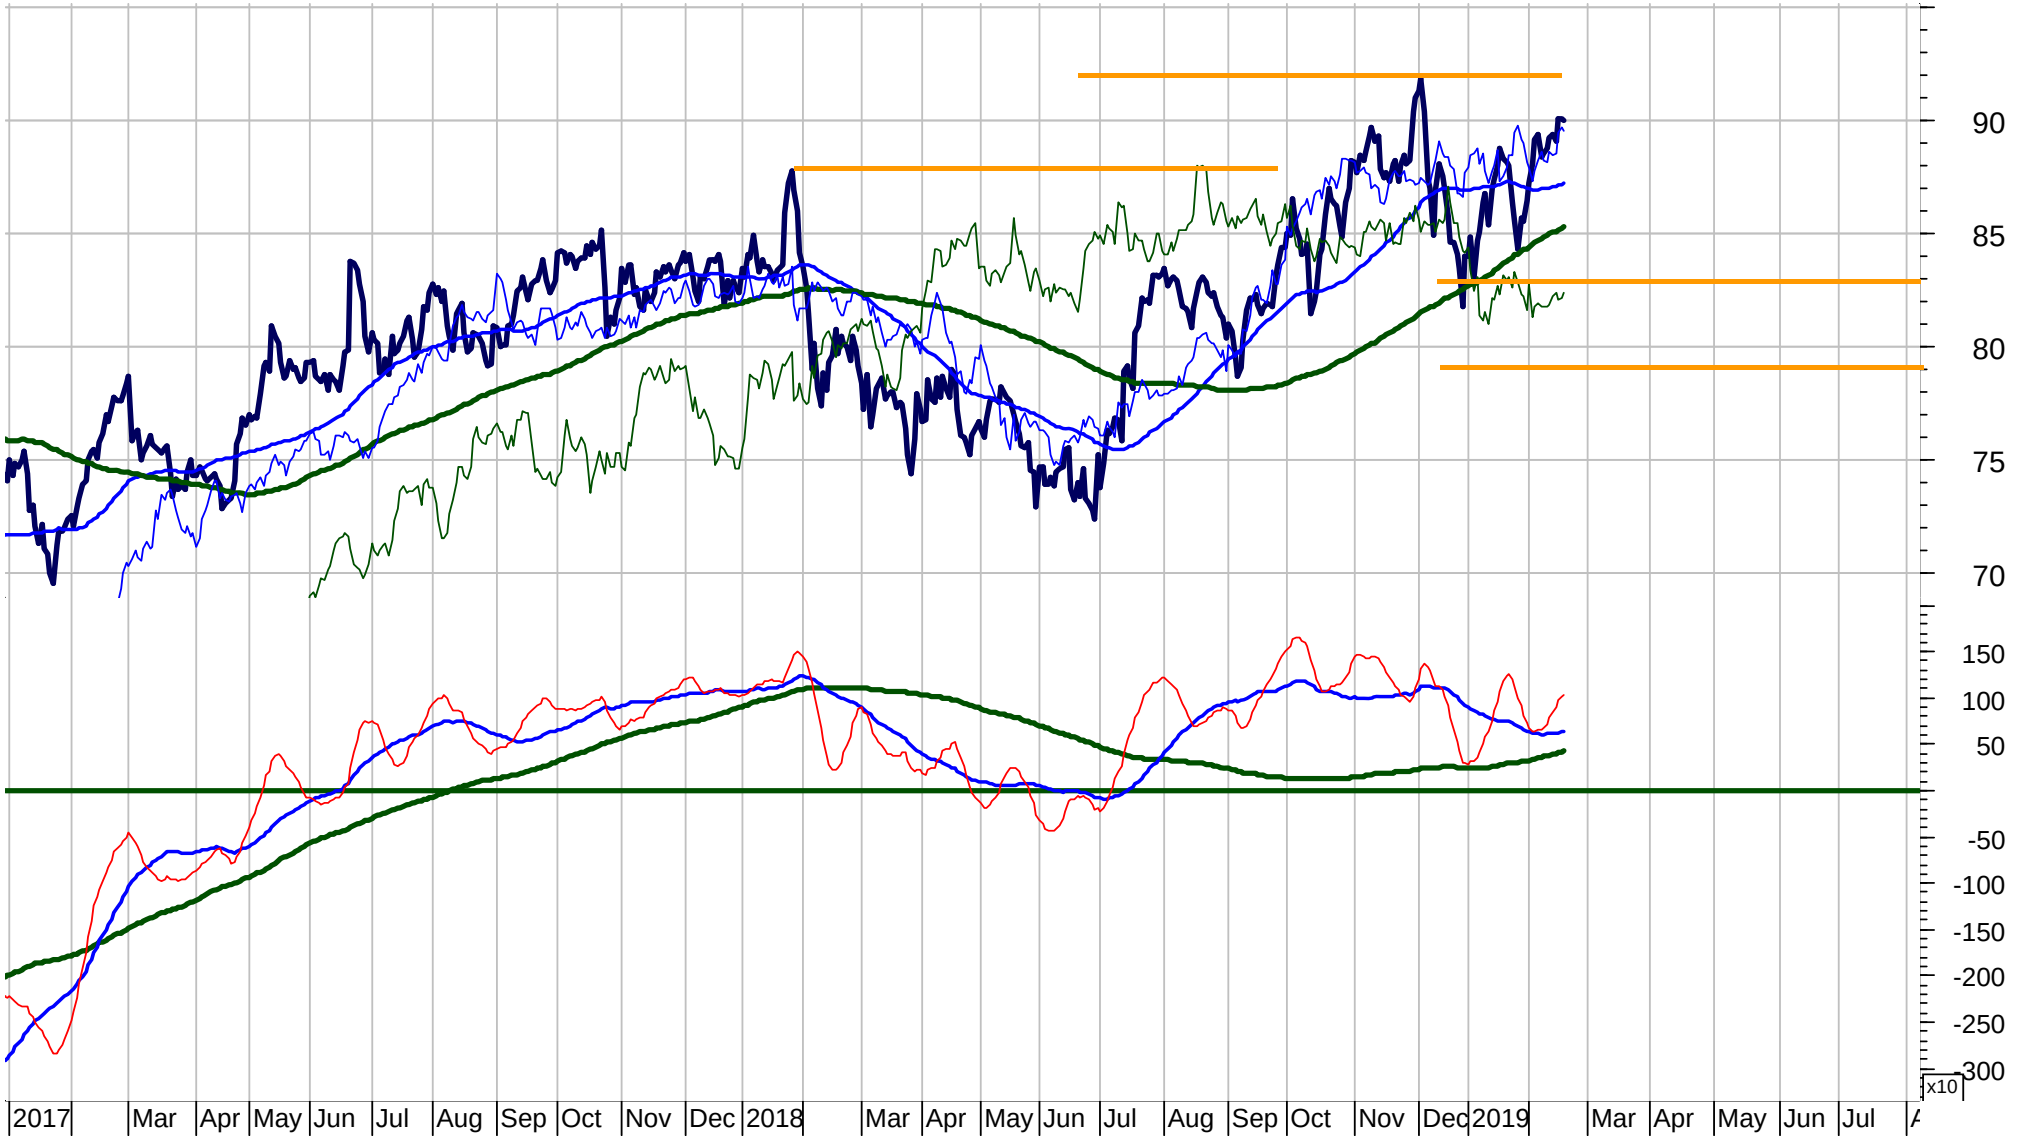
Nestlé

Nestlé broke the long-term resistance from mid 2017 at 86 and is rising to the next resistance, which I had identified at 91.50.
A correction is likely to start at this level and provide a test of the breakout level 86.
The medium-term momentum reversal is at 85 and the long-term reversal at 79.



Novartis

Novartis is consolidating around the former high from early 2018 at 88.
It must hold above 81 or it will signal a more important top in the form of a head and shoulder formation.
Next higher resistance is 91.20, 94.50, 96.50.
The big support is at 83, a break of which would signal 79.



Roche

Roche has the next resistance levels at 276, 283/288, 295/299.
Support is at 260.

Swatch

Swatch is testing the mega-support, if not say the giga-support, at 275 / 265/60.
A break of this support could signal 140.
But the short-term chart on the next page shows that possibly a turnaround could be in the making.

Swatch – 30 Minute chart

Swatch could be forming an inverse head and shoulder bottom.
It must hold above 275 and rise above 291 / 296 to signal a turnaround of the major downtrend.
I will ADD to the position if 291 is broken and hold a stop at 272.

FiatChrysler

Strictly speaking, my latest position in Fiat Chrysler was stopped out at 12.60 (the intraday low was 12.57).
I will buy again if 13.10 and 13.30 is broken.
The stop is at 12.70.

Alphabet

Alphabet remains at risk of forming a head and shoulder top with the support at 970.

Amazon

Amazon remains at risk of forming a head and shoulder top with the support at 1300.

American Express

American Express has reached 108.50, the maximum retracement level (76.40%) of the December decline. This level is also close to the long-term momentum reversal at 110. A new downturn would not come as a surprise.

Cadence Design

I recommended Cadence on 22.1.2019 at 46.65. It is now up by 12.7%.
The buy recommendation was based on the expected breakout above the upsloping triangle from November 2017, the upturn of the long-term momentum indicator and the crossing of the price above the medium-term momentum reversal.

Coca Cola

Coca Cola sold off with the lower-than-expected guidance for 2019. It is falling the the most important support at 45/44.50. At this level the two downlegs in December and February are equal in length. Moreover, it is the 61.80% retracement level to the uptrend from May 2018 to November 2018. A break of 44.50 would signal the next support at 41.50.

JP Morgan

JP Morgang must rise above 108/109 to signal a return to the old high from 2018 at 119.
Below 109 the stock could still add one more downleg below the December low.

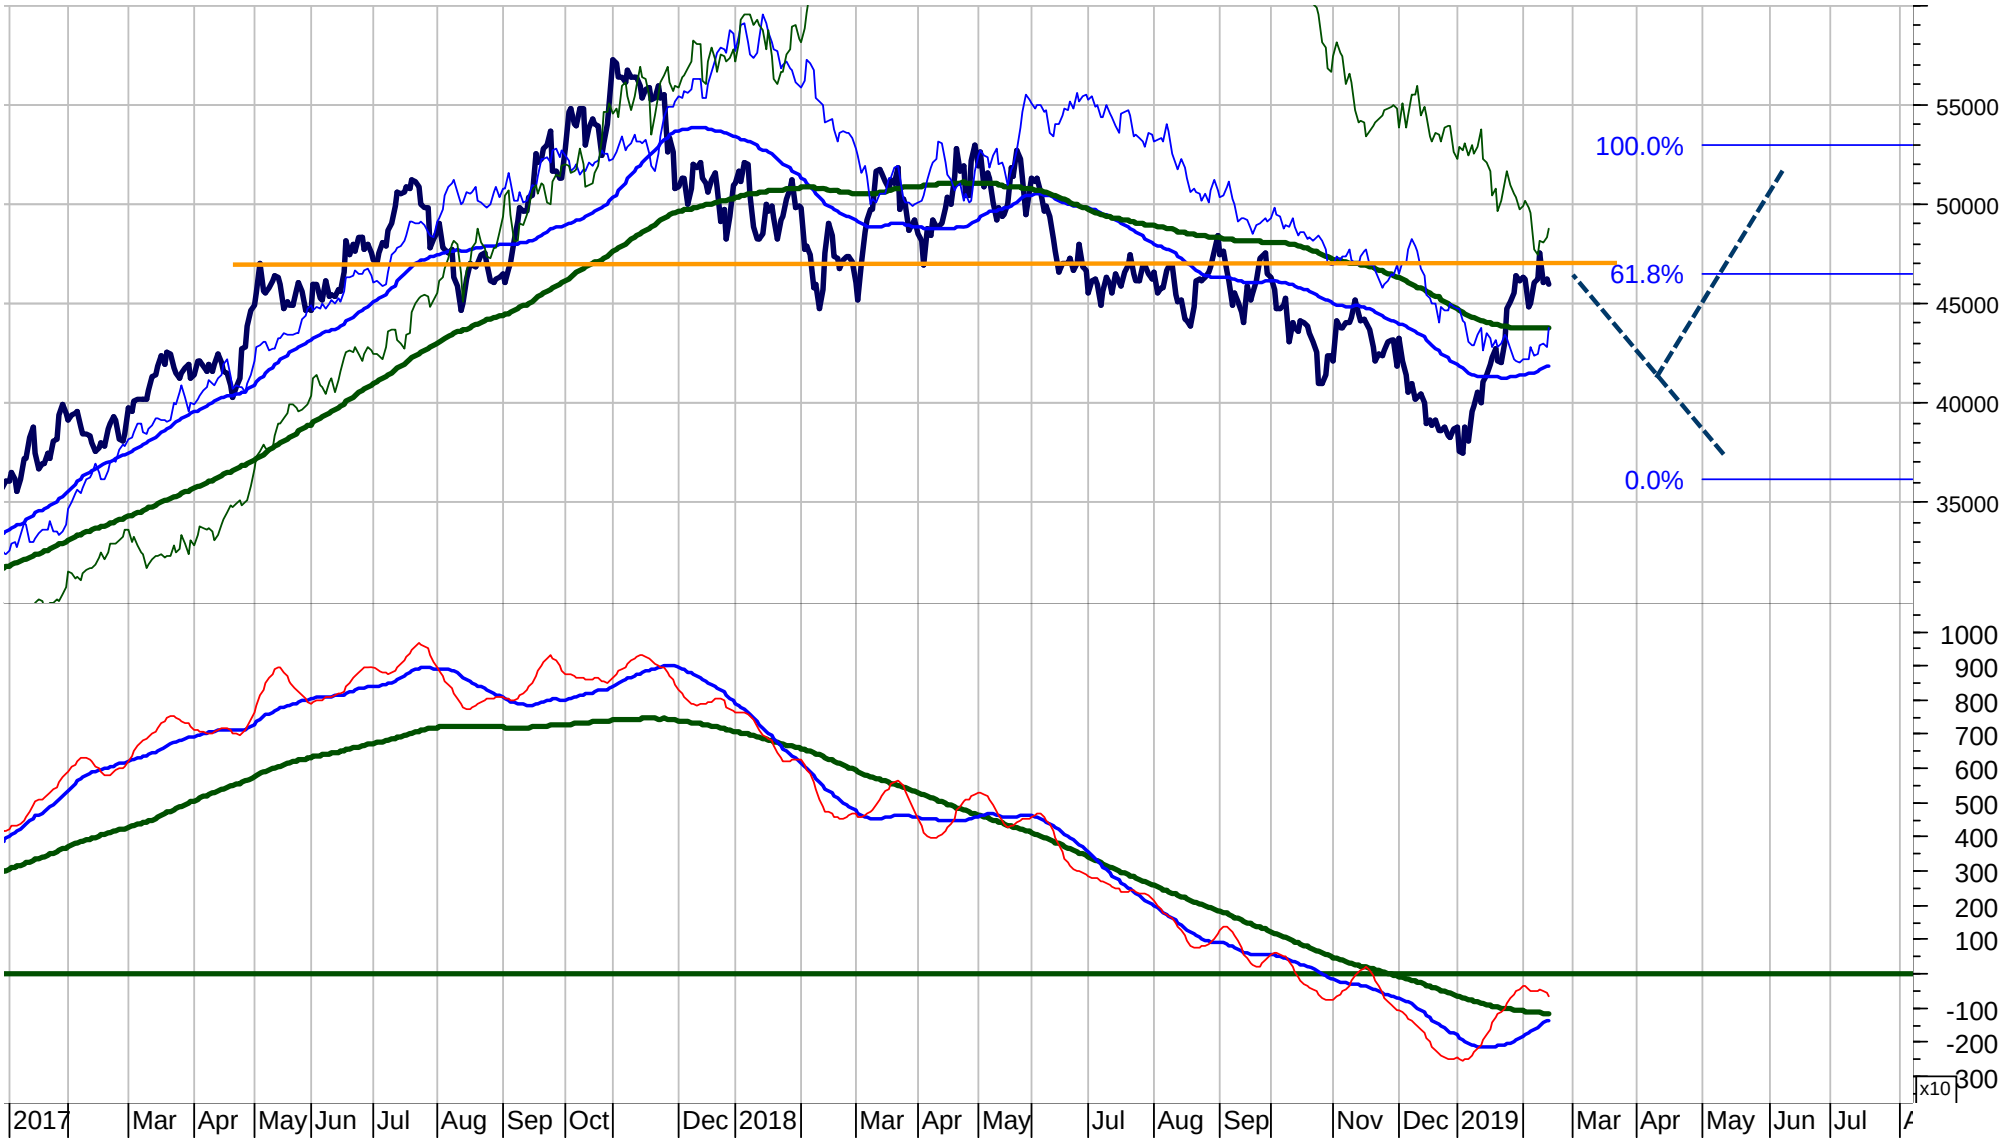
Samsung Electronics

Samsung has recovered to the major resistance level at 475k.
This is the 61.80% retracement to the decline from May 2018 and also the level of the long-term momentum reversal.
It is likely to form the right shoulder of an inverse head and shoulder.
Alternatively, it will resume the long-term downtrend.



Tencent

Tencent is testing the resistance zone 350 to 370.
This zone is most critical to the assessment of the medium-term and long-term outlook.
