Swiss Market Index 20 constituent stocks

The Score readings of the 20 SMI-constituent stocks shows that 10 stocks still have a positive score. Among these are the heavy weights Nestlé and Novartis. Clearly, these stocks continue to support the Swiss Market Index. However, watch their support levels. Moreover, Roche has entered a consolidation. It only takes another minor decline and it could signal a medium-term downgrade.

Among the stocks with a negative score I see risk in Sika, which appears to be turning down long term.

The Total Score of all 20 stocks is 57%. This is in the neutral range and implies that a minor shift could signal a general stock market correction.

ALCON – hourly chart

Alcon is testing the major support around 57.50.
 A break would trigger a sell signal with next support at 55.50 or 53.80.
 It would take a rise above 60.50 to signal 62.20 or a rise to a new high.

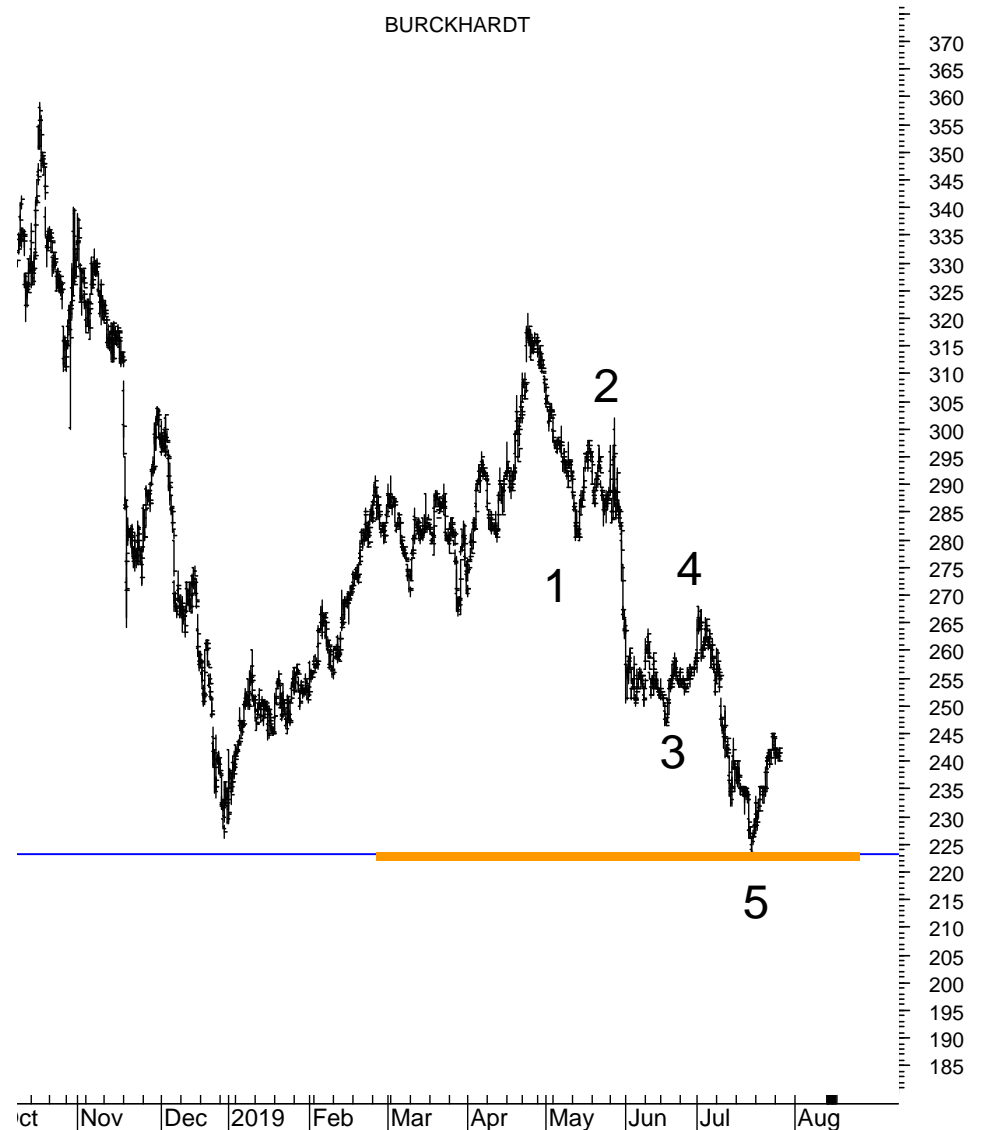

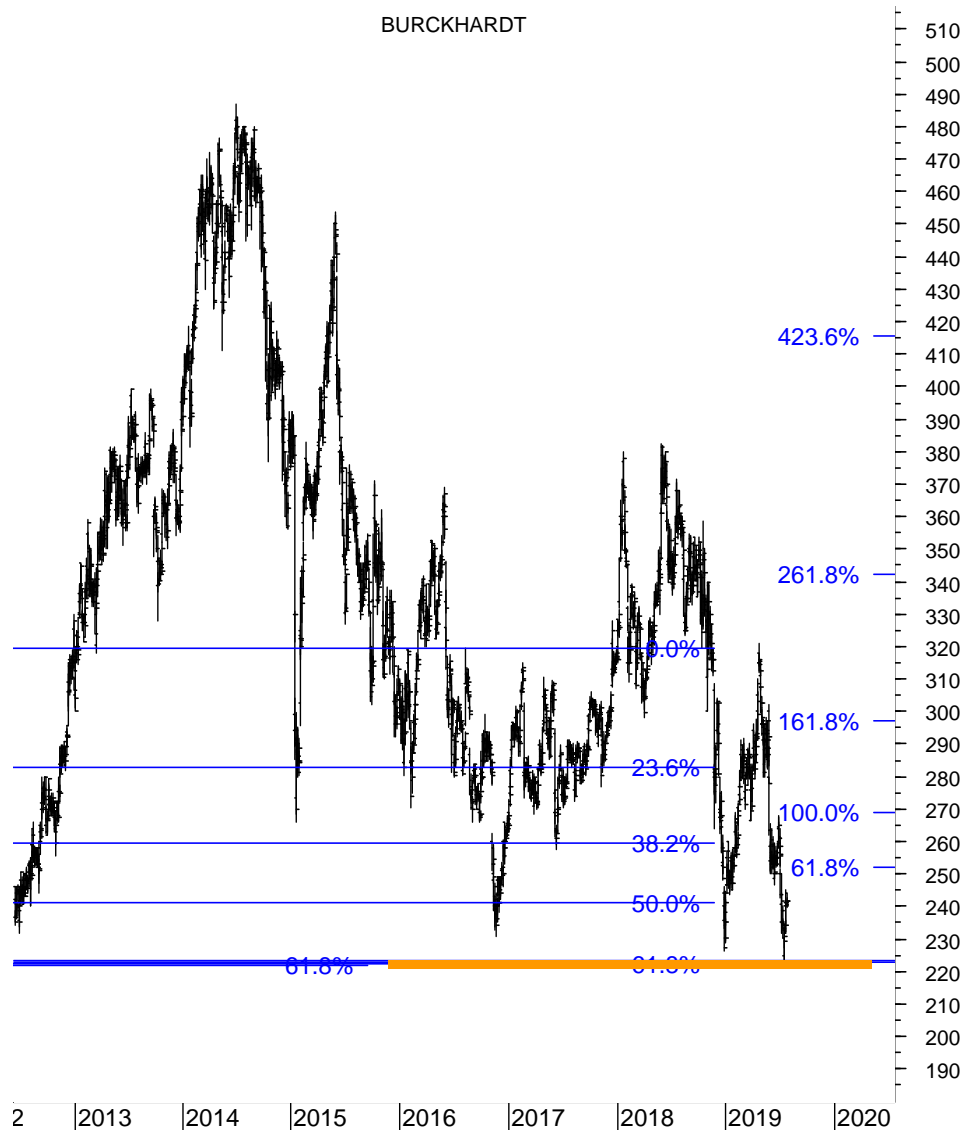

BURCKHARDT – daily chart (left) and hourly chart (right)

Burckhardt is likely to turn up from the mega-support at 225.

The last decline can be counted as a complete five-wave pattern.

I recommend purchase of Burckhardt. Clearly, the position should be stopped at 230 or 222.

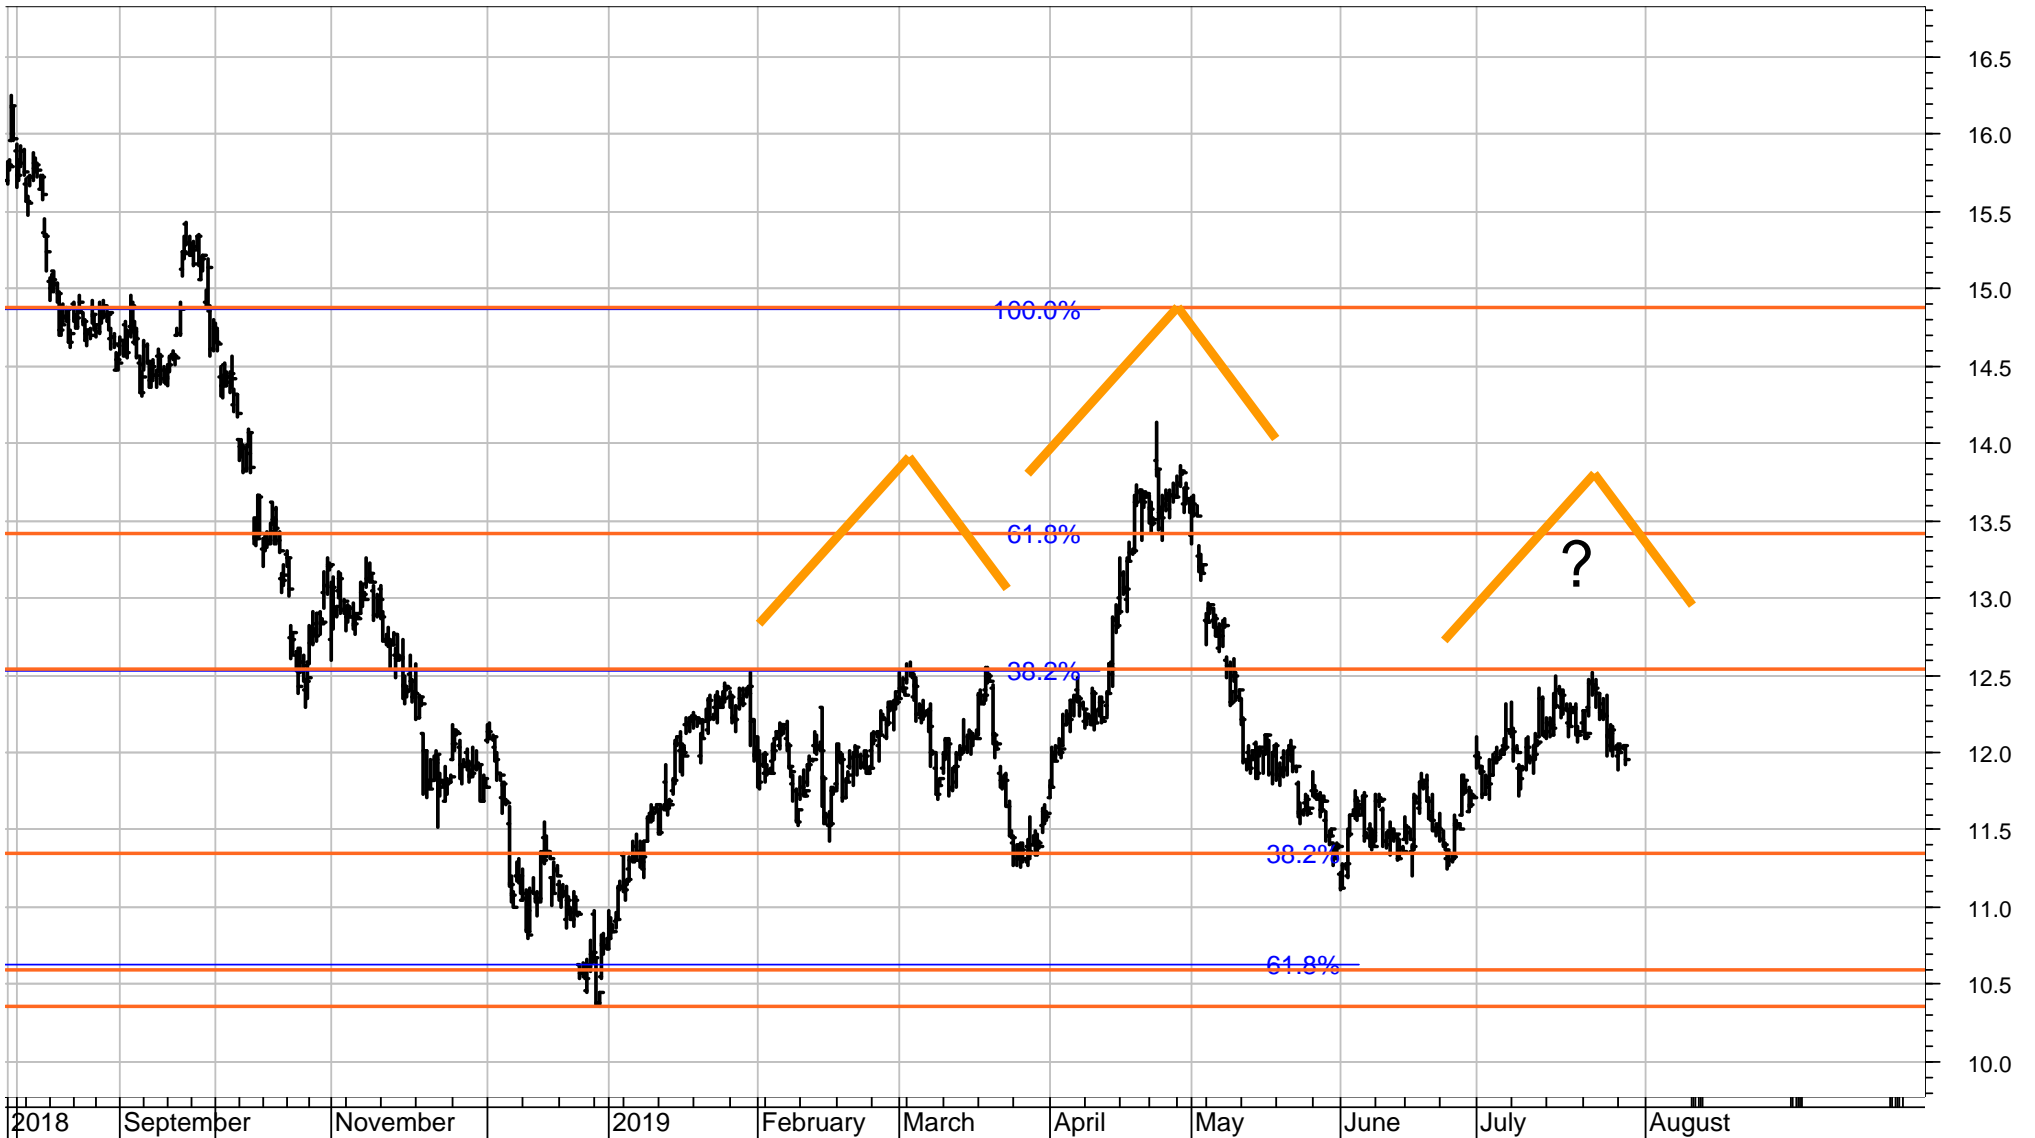

CS GROUP – 240-minute chart

CSG was turned down by the resistance at 12.40 / 12.60.

I wonder if the pattern from December is a head and shoulder top. If not, it must be a bottoming process.

The key resistance levels to watch are 12.60, 13.50 and 14.90. The supports are 11.30 and 10.60 / 10.30.

LEONTEQ – hourly chart

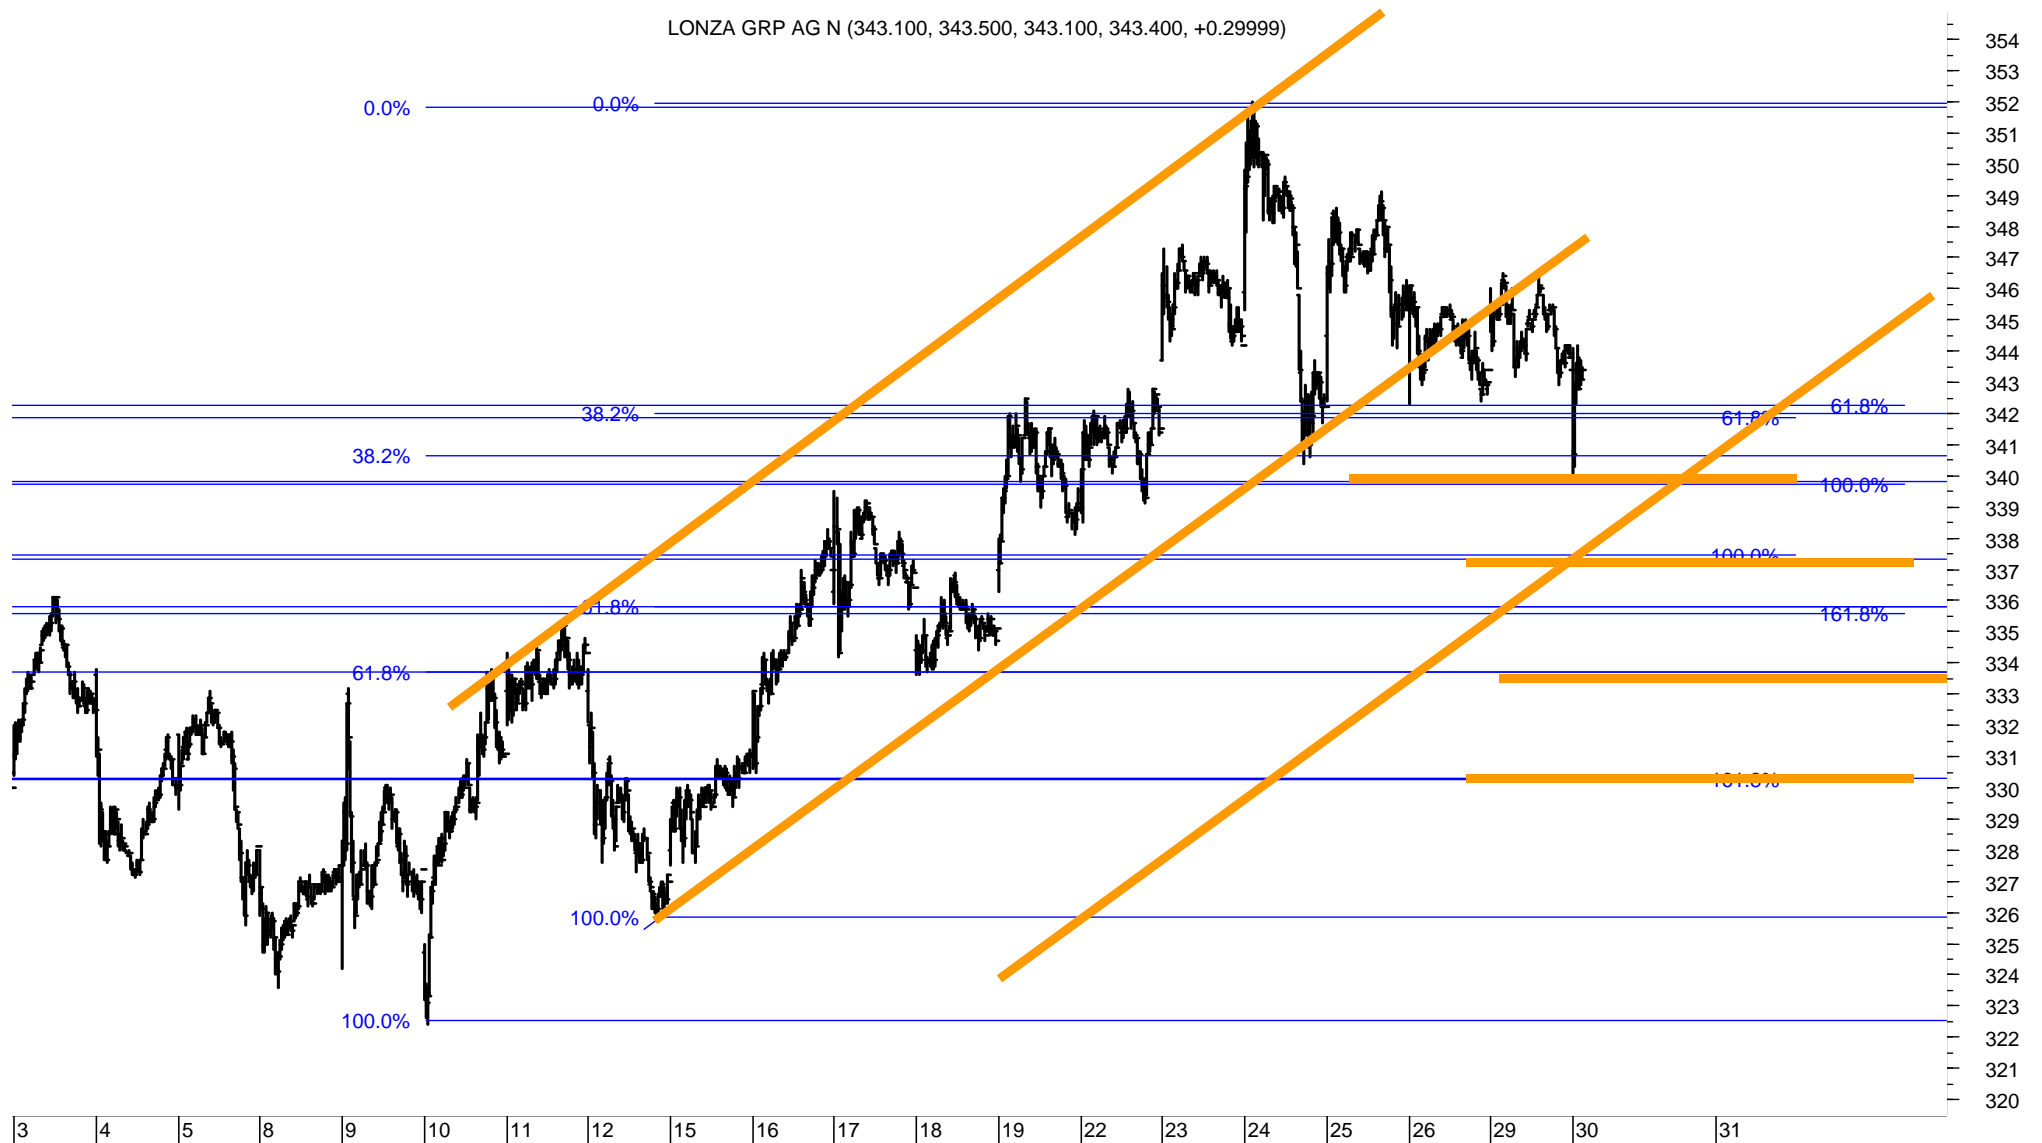

Leonteq could have completed a five-wave downtrend from the high in January. It now needs a rise above 35 / 35.50 to signal a turnaround with resistance at 37.50 or 41. I would BUY Leonteq here, but hold a stop at 31.

LONZA – 10-minute chart

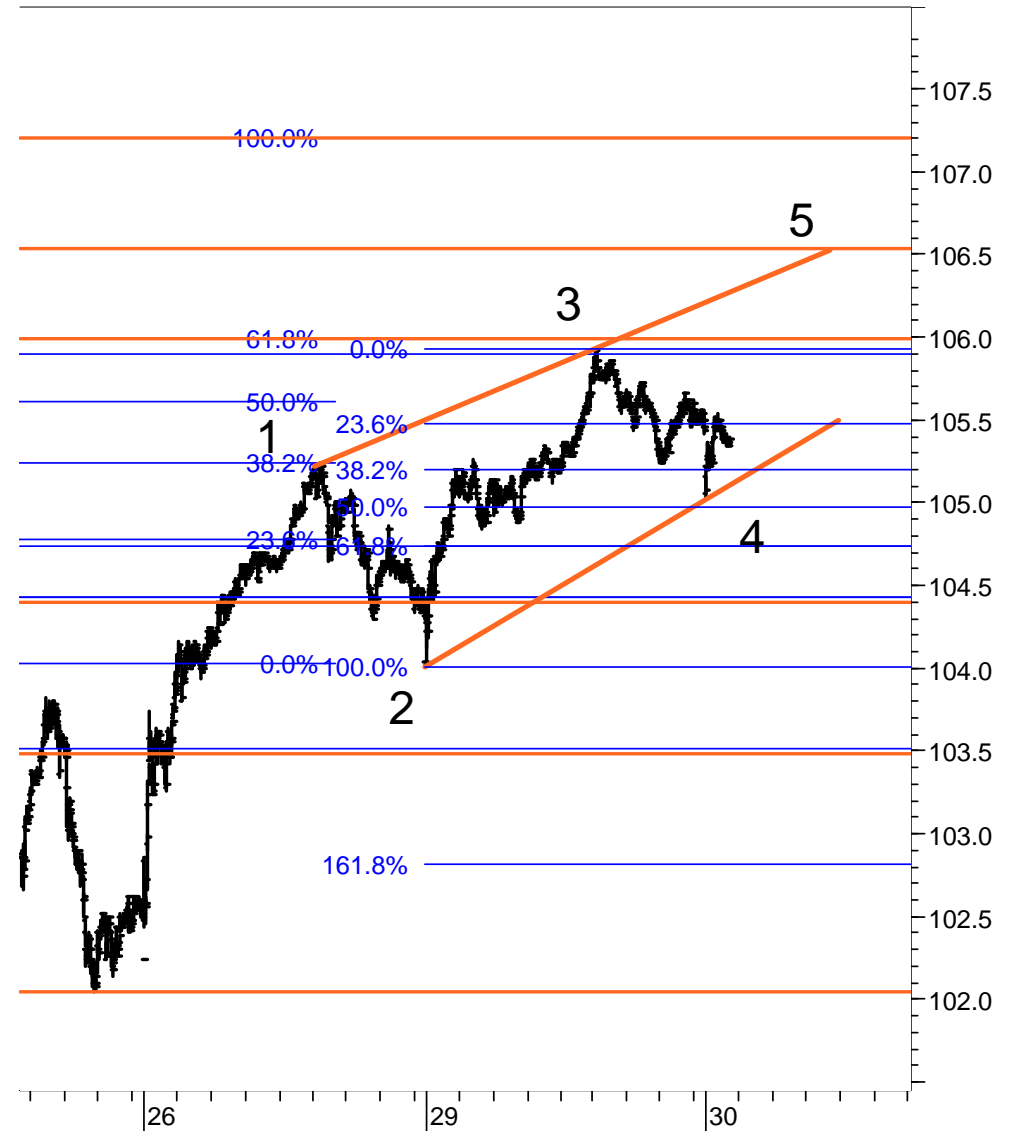

Lonza entered a short-term correction.

It will trigger sell signals if the supports at 340, 337, 333.50 and 330 are broken.

NESTLE – 10-minute chart (left) and 1-minute chart (right)

Nestlé not only defended the supports at 102.20 and 101.40, but it managed to stand up again and surged to 106. The medium-term model rating is upgraded to positive again. I would buy if 105.90 is broken and see if Nestlé can rise above the Wedge trend line, which is presently rising at 106.50. Supports are 104.40, 103.40 and 102.

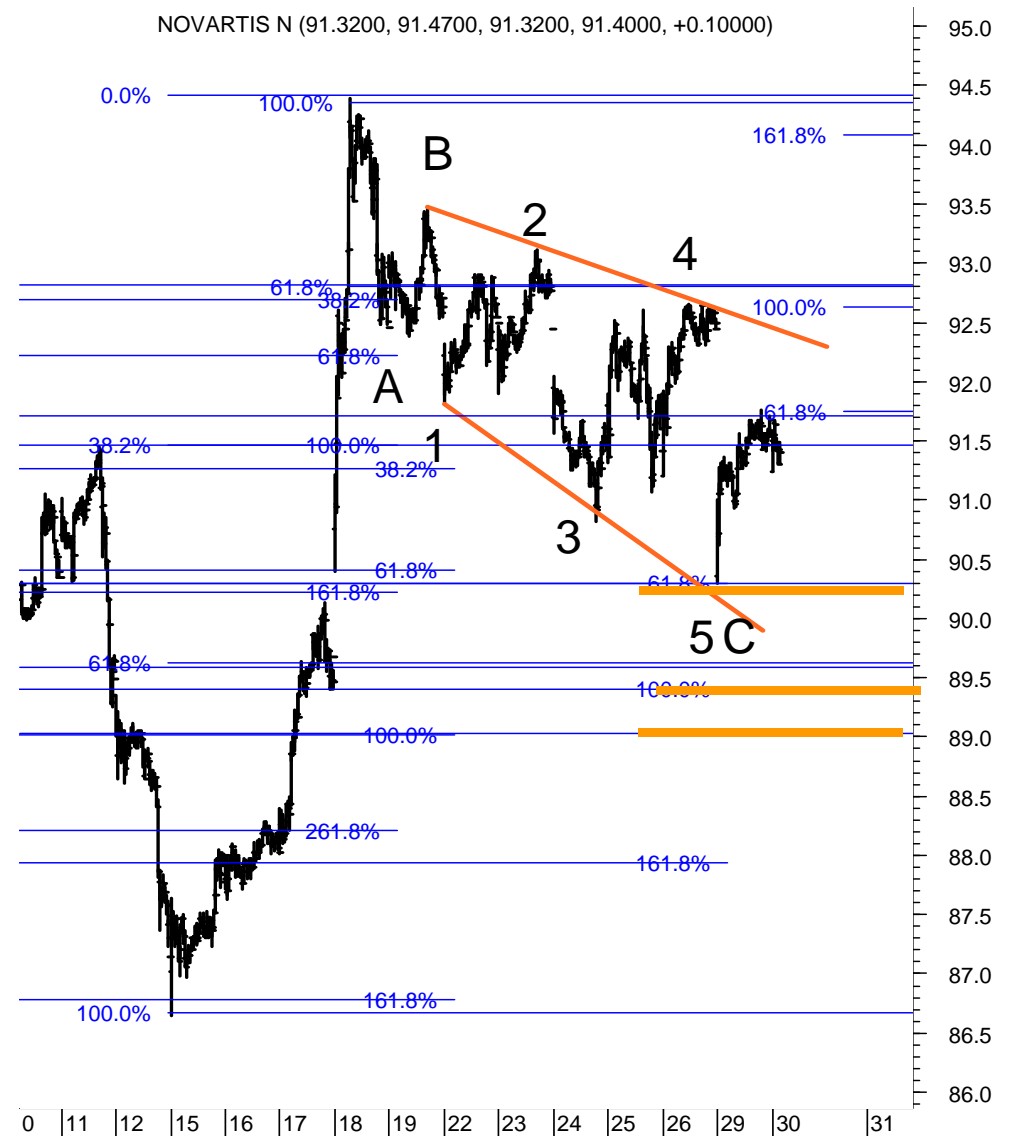

NOVARTIS – hourly chart

Novartis entered a correction following the surge to 94.50. Clearly, the level around 90.20 marks a multiple support cluster. Sell signals will be triggered if 90.20, 89.50 / 89 are broken.

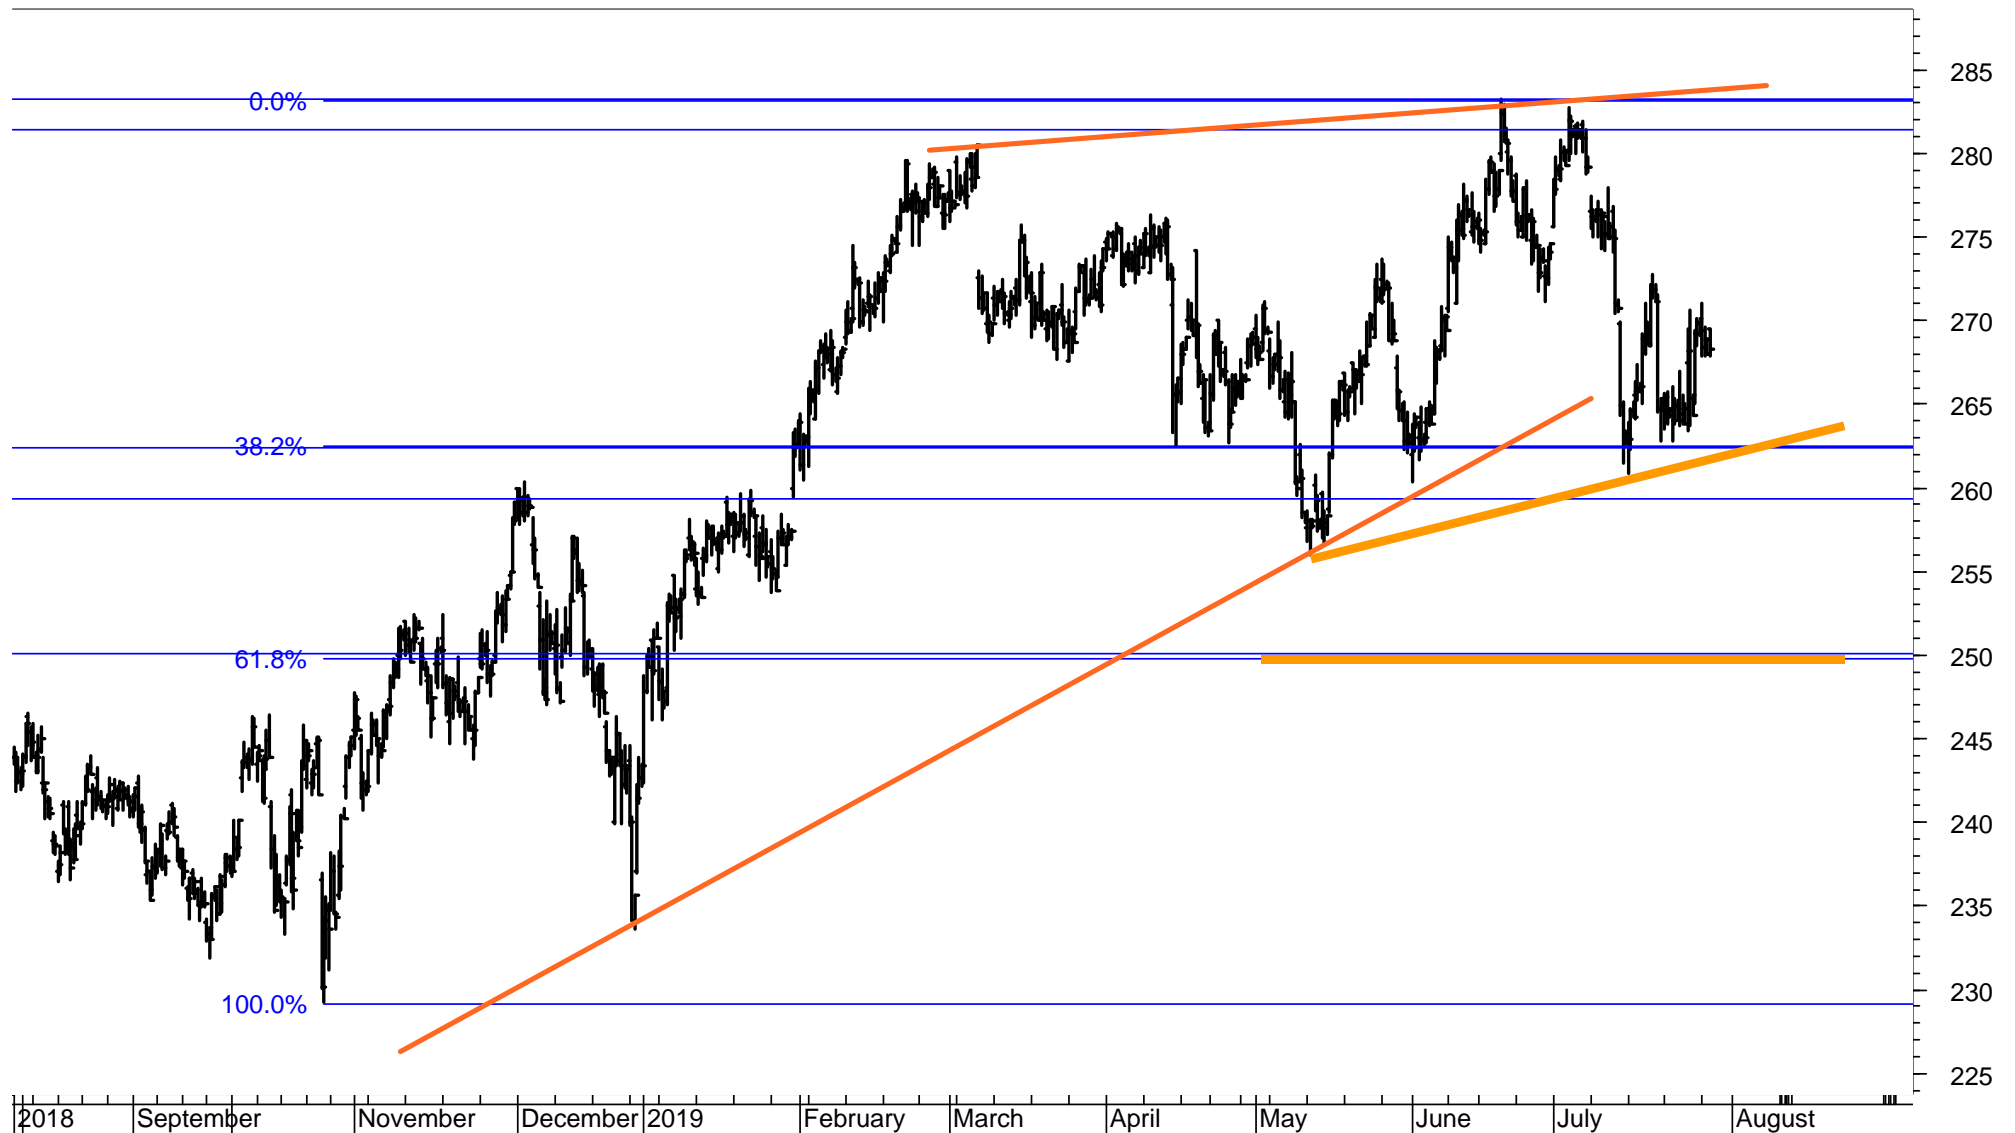

A new buy signal will be triggered if 92.90 is cleared. Novartis could then rise to a new high.

The long-term resistance levels are 94.50, 99 / 102 and 112.

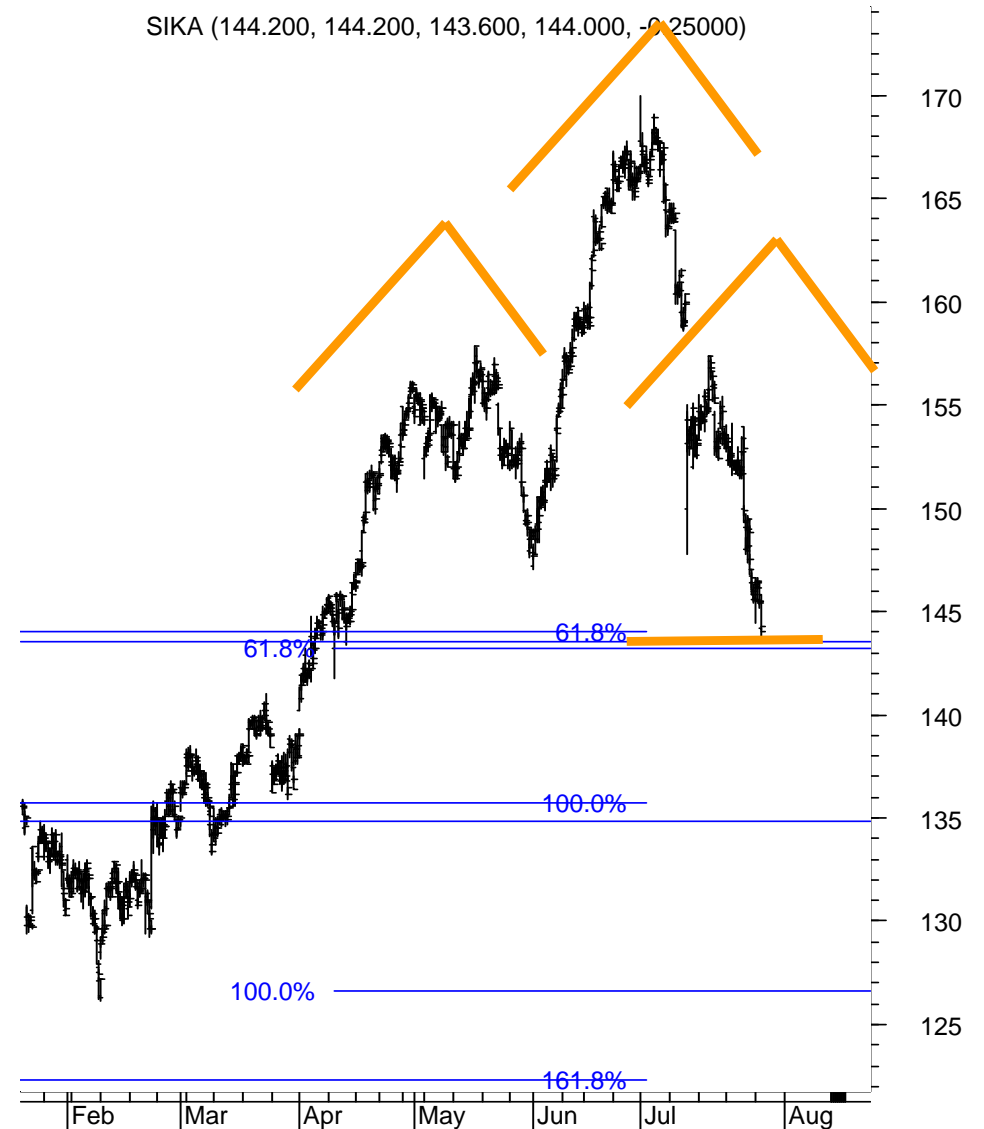

ROCHE GS – 240-minute chart

Roche is trading just above the major support at 260 / 259, a break of which is likely to activate the next supports at 250 / 248 or 230. So far, the pattern from February is more likely to be a consolidation than a top. However, because Roche registered a minor higher high in June compared to the high in early March, the uptrend from December could be seen as complete. This is why a break of 259 and 250 should be taken seriously.

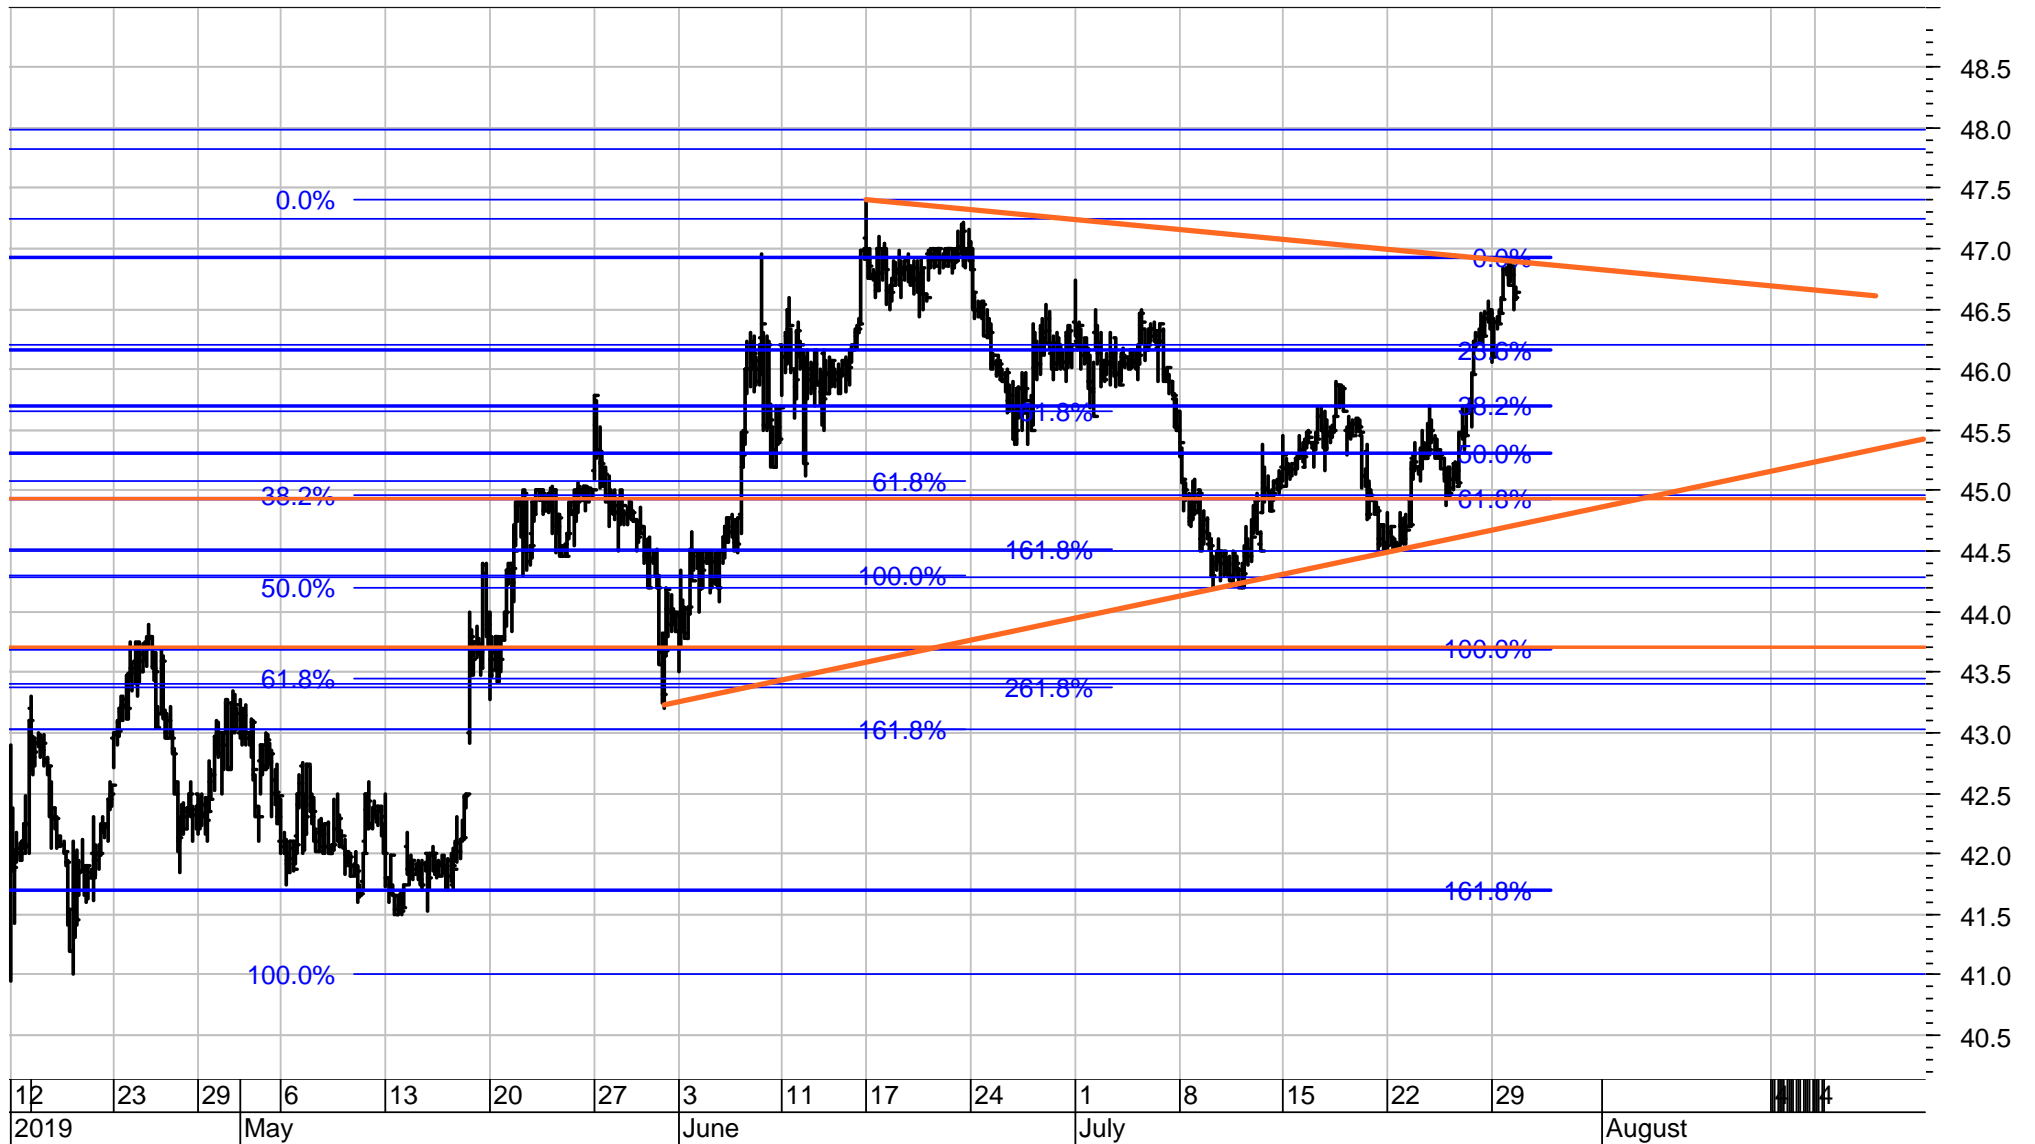

SIKA – weekly chart (left) and hourly chart (right)

Sika has entered a long-term correction. Sell signals will be triggered if 142 and 134 are broken. If the correction is Wave 4 within the uptrend from 2009 then Sika could still trace out Wave 5 to new all-time highs. However, it could take up to one year to complete Wave 4, which is why I would sell if 143 breaks.

STADLER RAIL – hourly chart

Stadler Rail managed to hold the supports and sell level at 44.20 / 44.
 The levels to watch are 47.40 / 48 and 44.40 / 43.

SWATCH GROUP – hourly chart

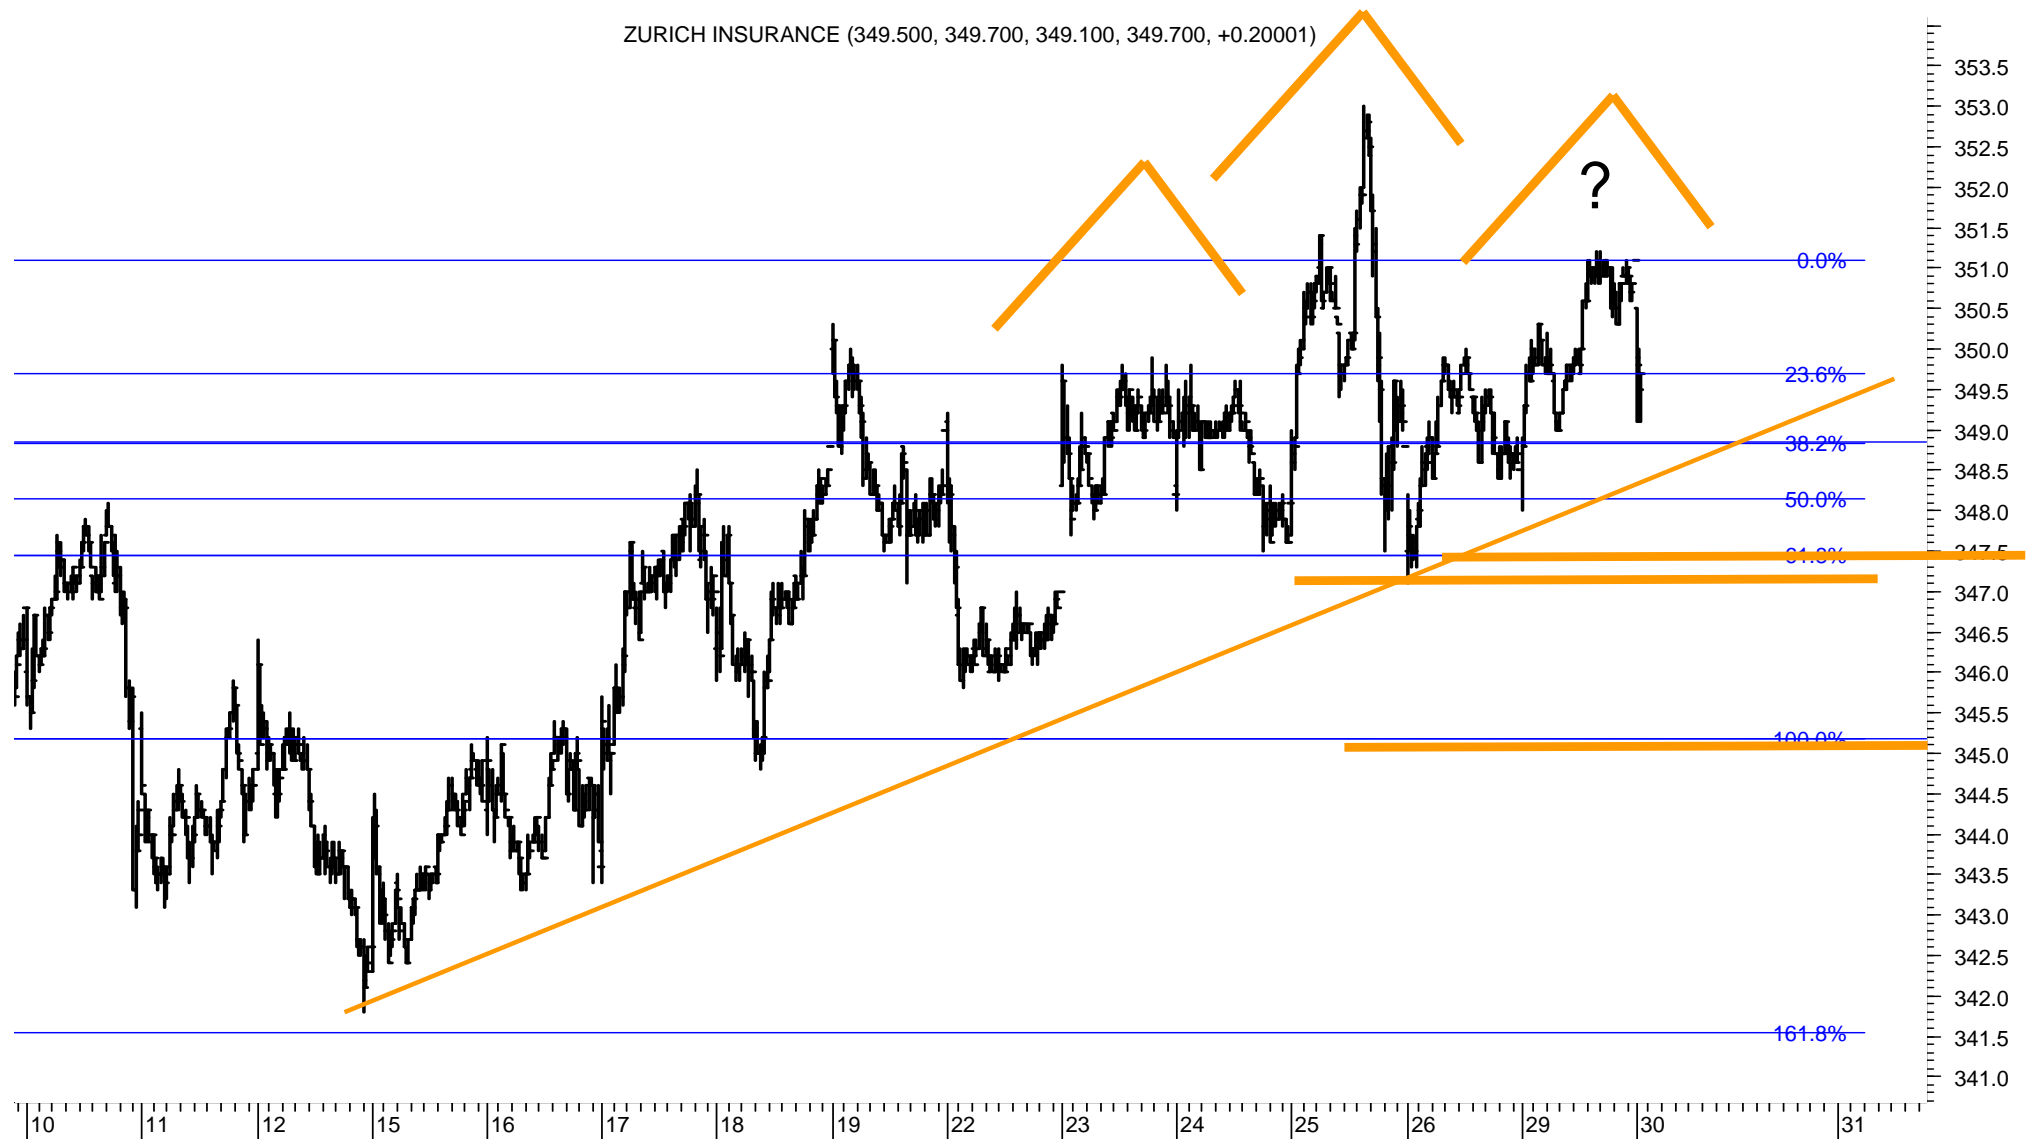

Swatch must rise above 312 to signal a major upturn with resistance at 335.

A failure to hold above the supports at 287 / 282 would signal 273 / 265 or a resumption of the downtrend to new lows.

ZURICH INSURANCE – 10-minute chart

Zurich will trigger sell signals if 348.80, 347.50 and 345 are broken.

ADOBE – hourly chart

Adobe has reached the target zone for the Wedge to top between 305 and 325. The correction, which I was projecting over the last few weeks, is unfolding. A break of 300 will signal 293 or 280.

AMAZON – daily chart

Amazon failed to register a new high and peaked on 11.7.2019 at 2038.
 A decline below 1890 would signal 1850 or 1810.
 A break of 1810 will turn the major trend down.

APPLE

Apple is likely to rise to 216 or 243.

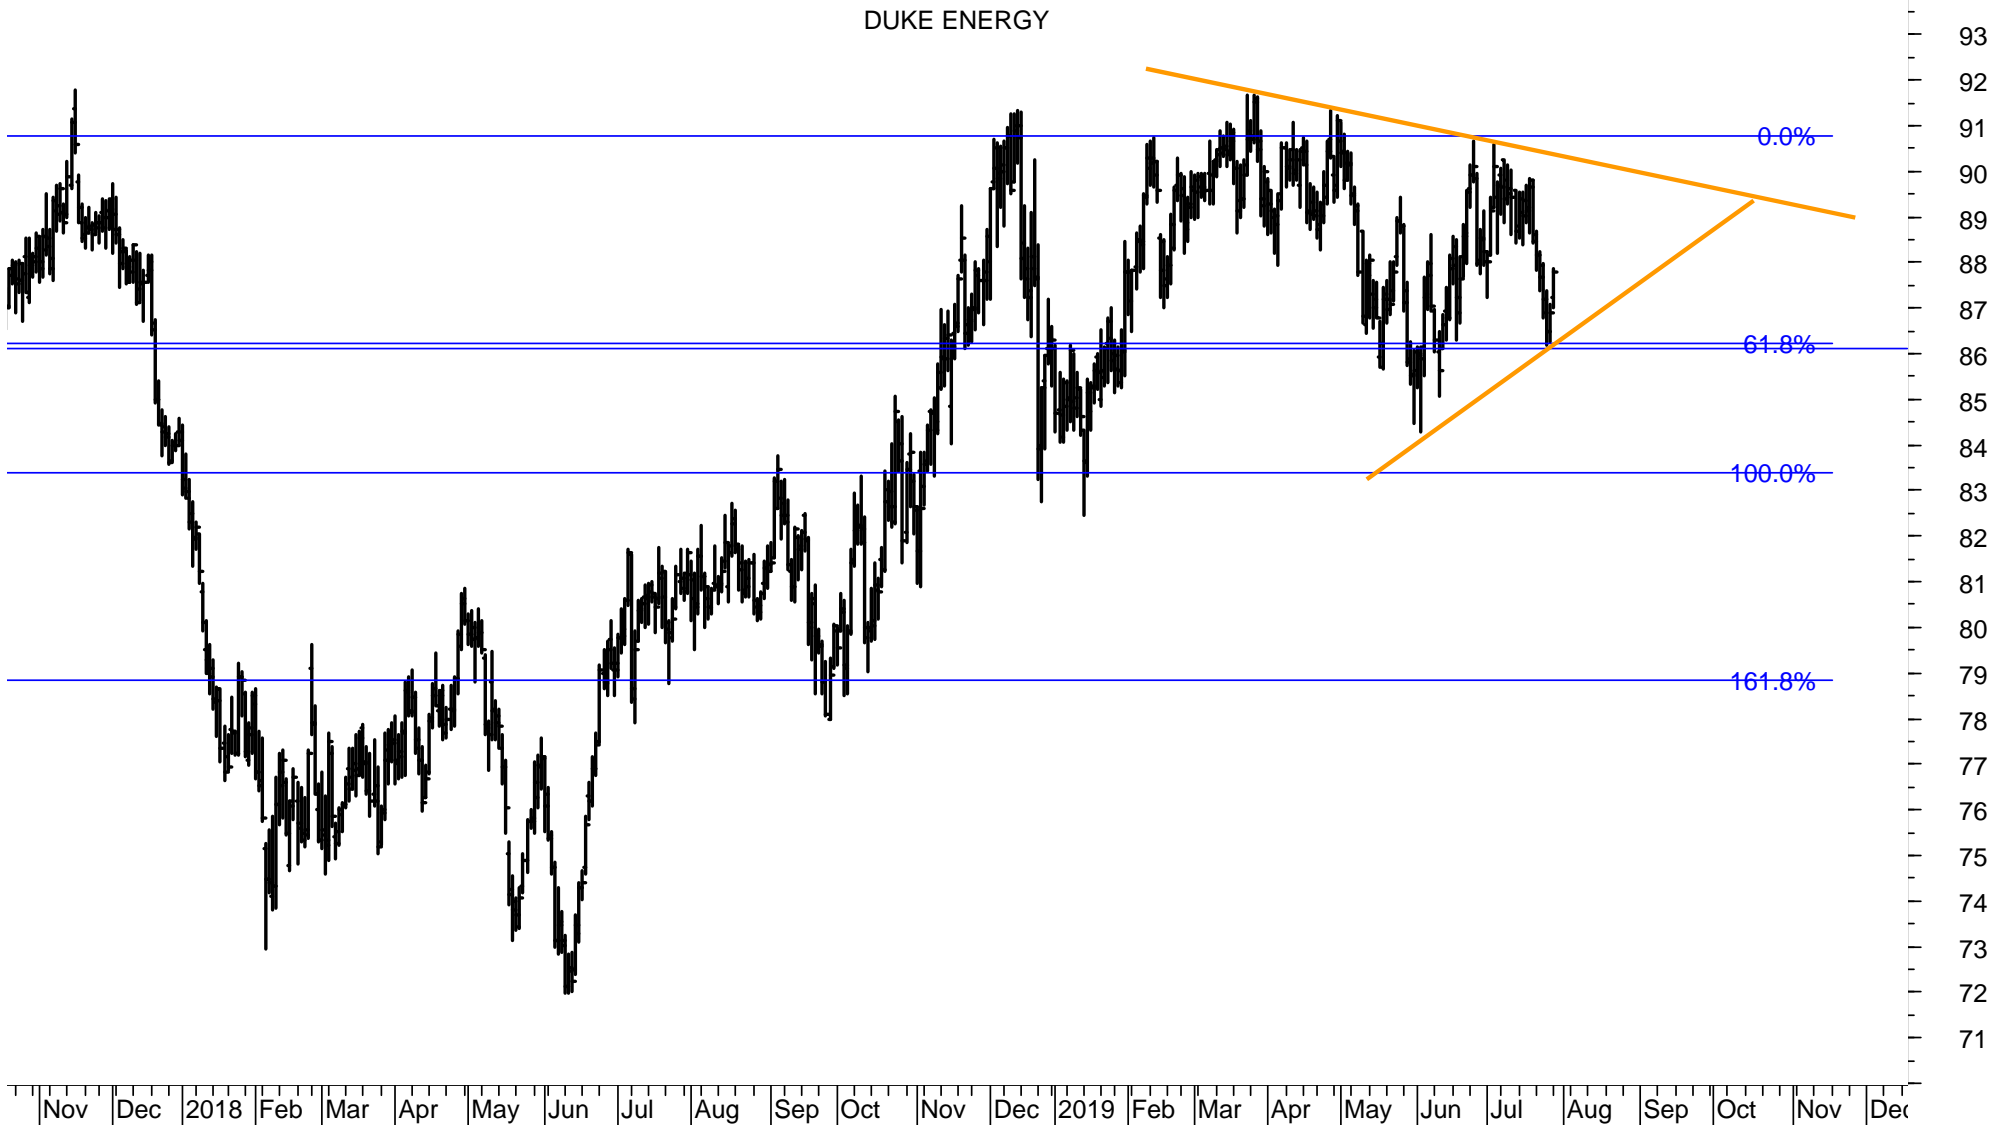

DUKE ENERGY

I recommended Duke on 14.6.2019 at 87.90..

A break of 86 will trigger a sell signal and support at 83.50.

The pattern from November can still be labeled as a Triangle and a break to new highs is still likely to unfold.

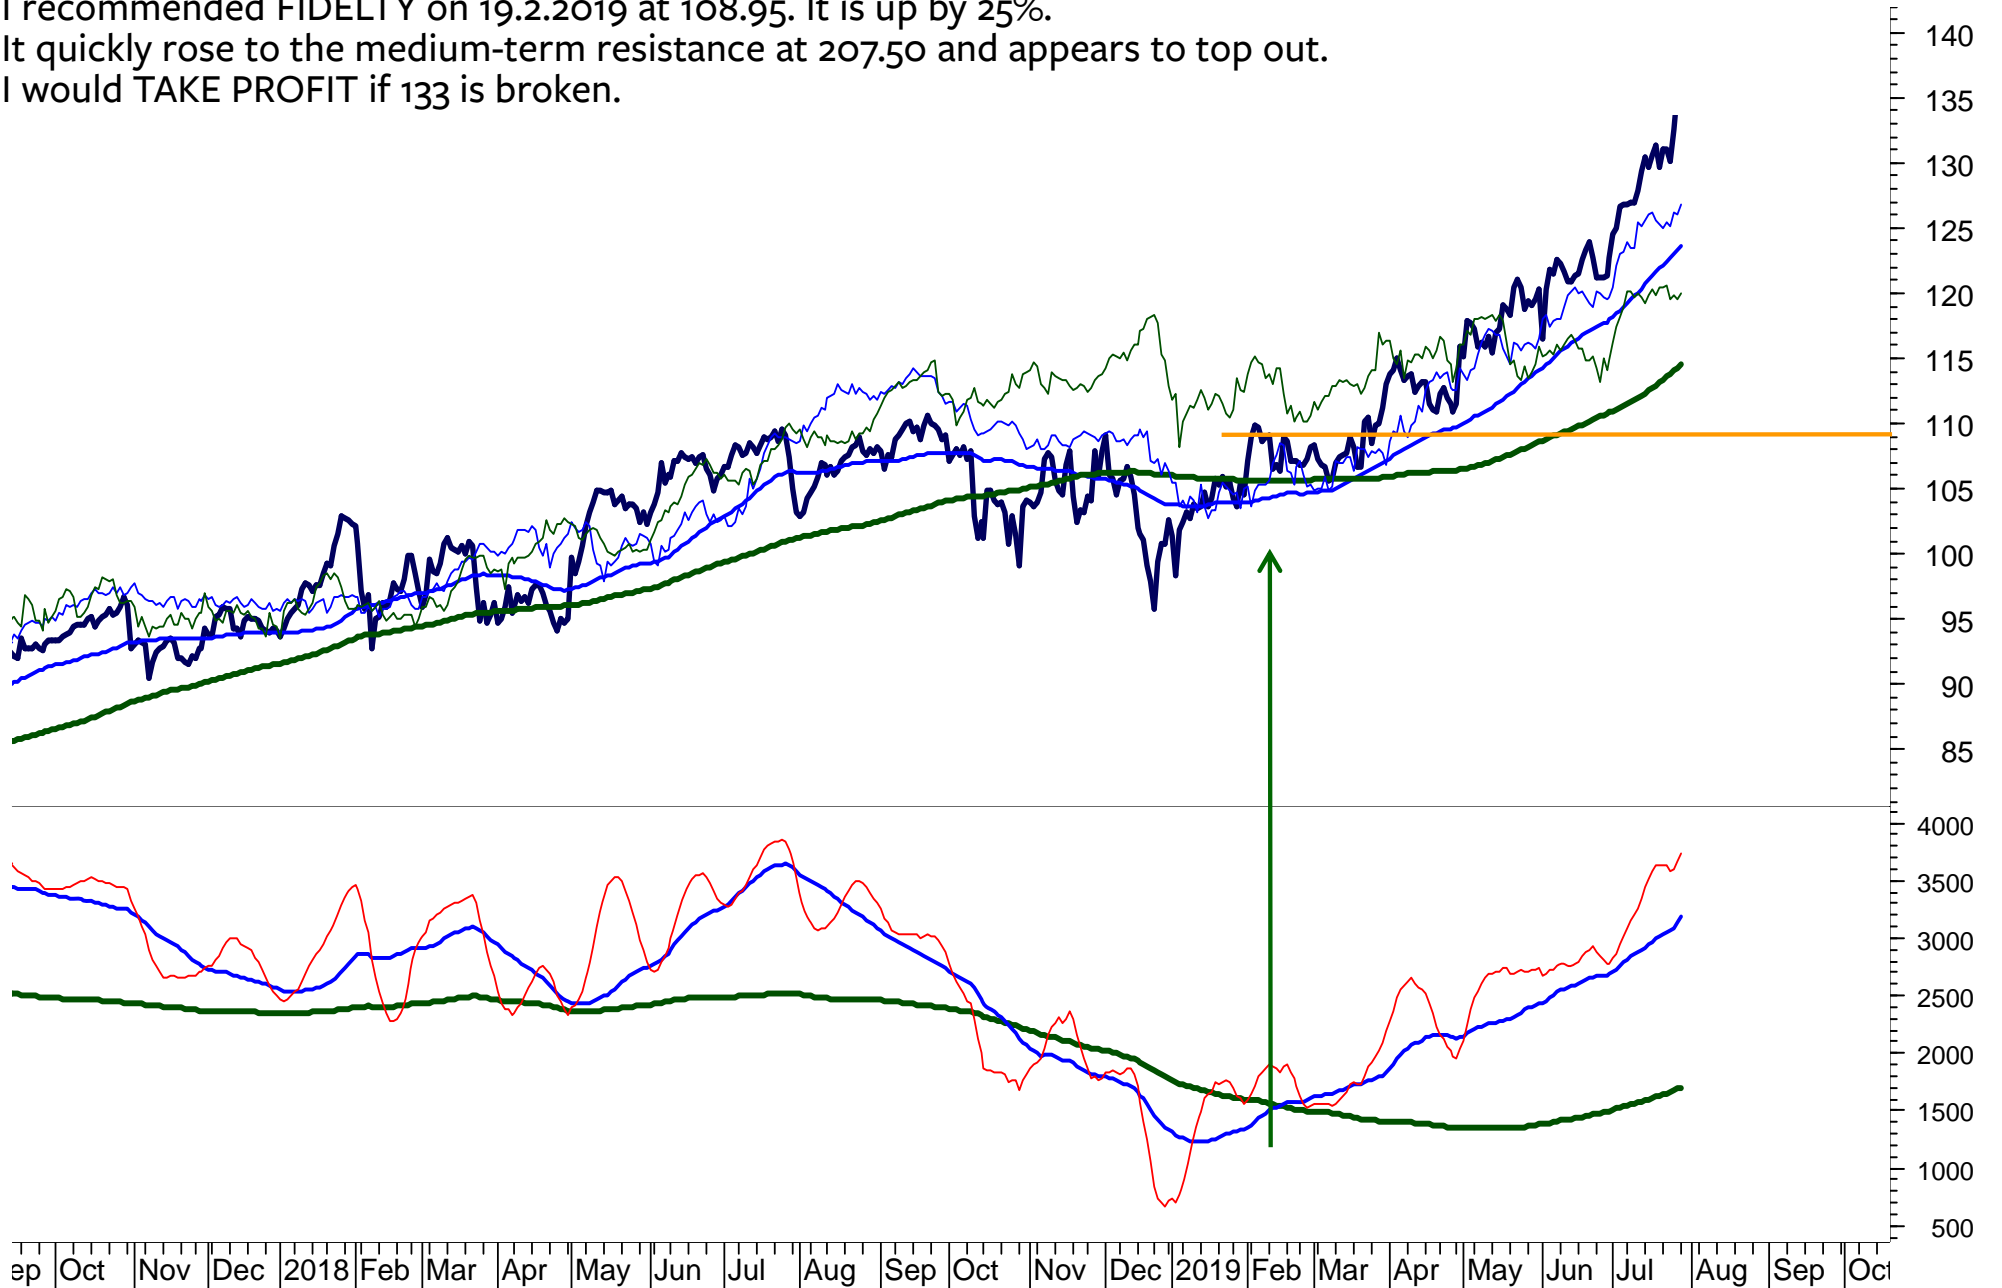

FACEBOOK

I recommended Facebook on 18.6.2019 at 193.20.
It quickly rose to the medium-term resistance at 207.50 and appears to top out.
I would sell the present position and look for a correction to at least 190.

FIDELTY NATIONAL

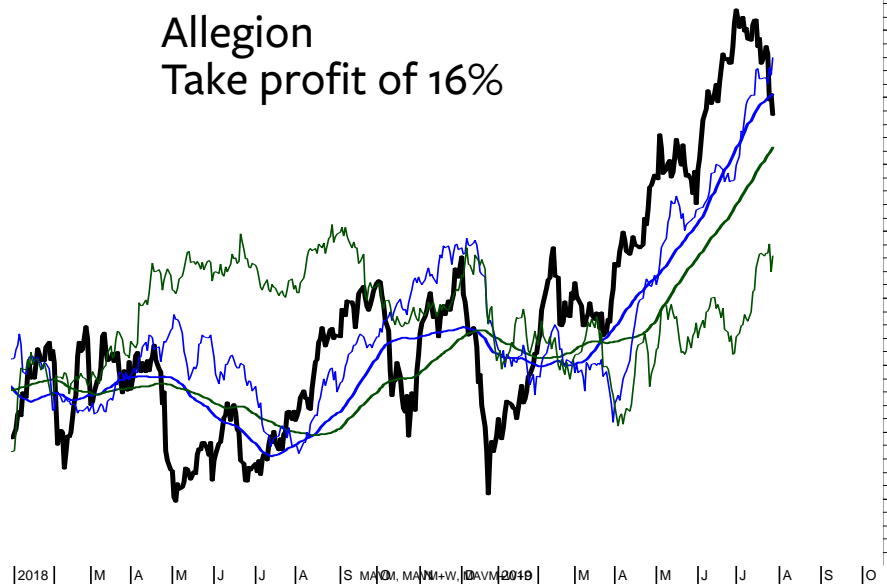

I recommended FIDELTY on 19.2.2019 at 108.95. It is up by 25%.
It quickly rose to the medium-term resistance at 207.50 and appears to top out.
I would TAKE PROFIT if 133 is broken.

ALIBABA

Alibaba is still trading within the triangle, which originated in June 2018.

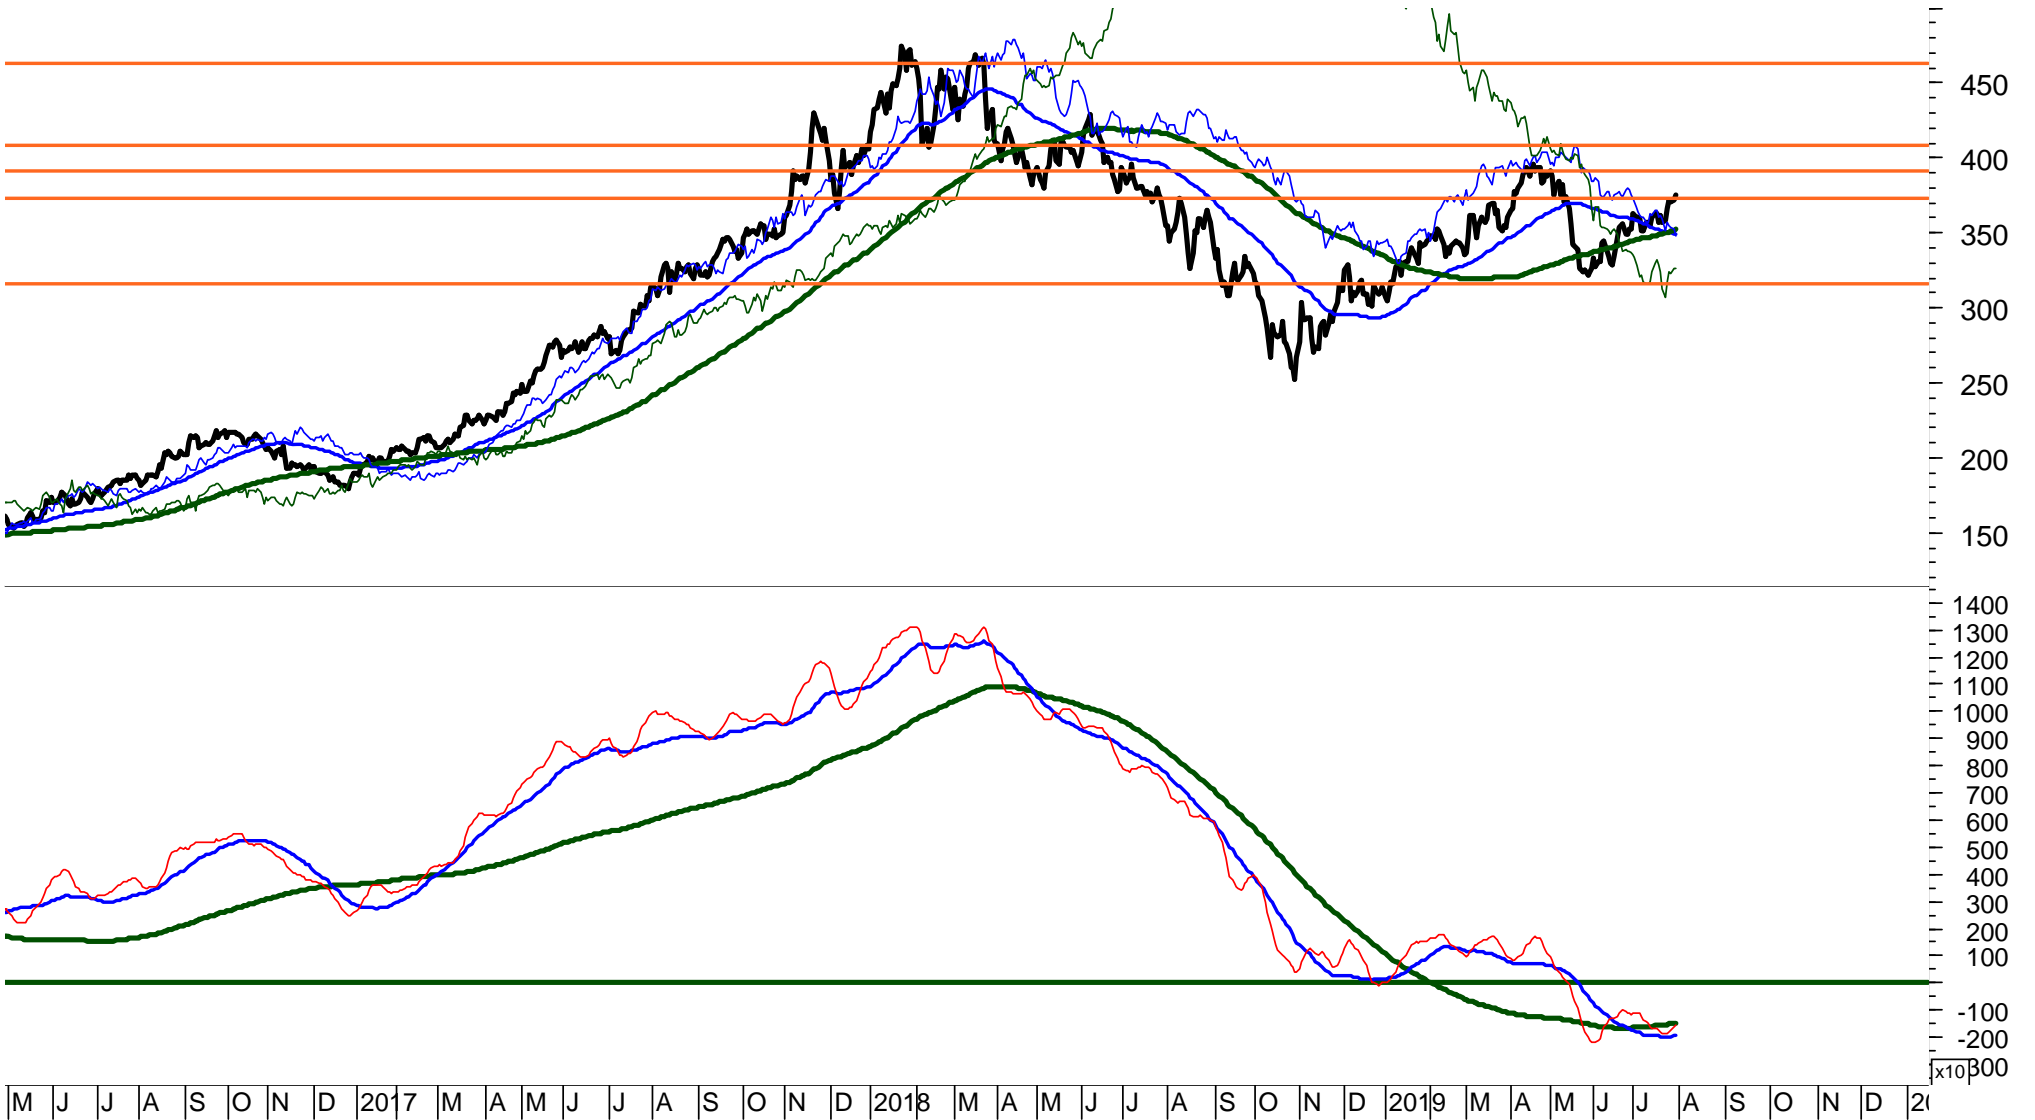

SAMSUNG ELECTRONICS

Samsung failed to break the resistance at 47.7k and re-entered a consolidation.
A break of 47.7k is required to signal 48k / 48.5k, a break of which would signal 49.5k / 50k / 51k.

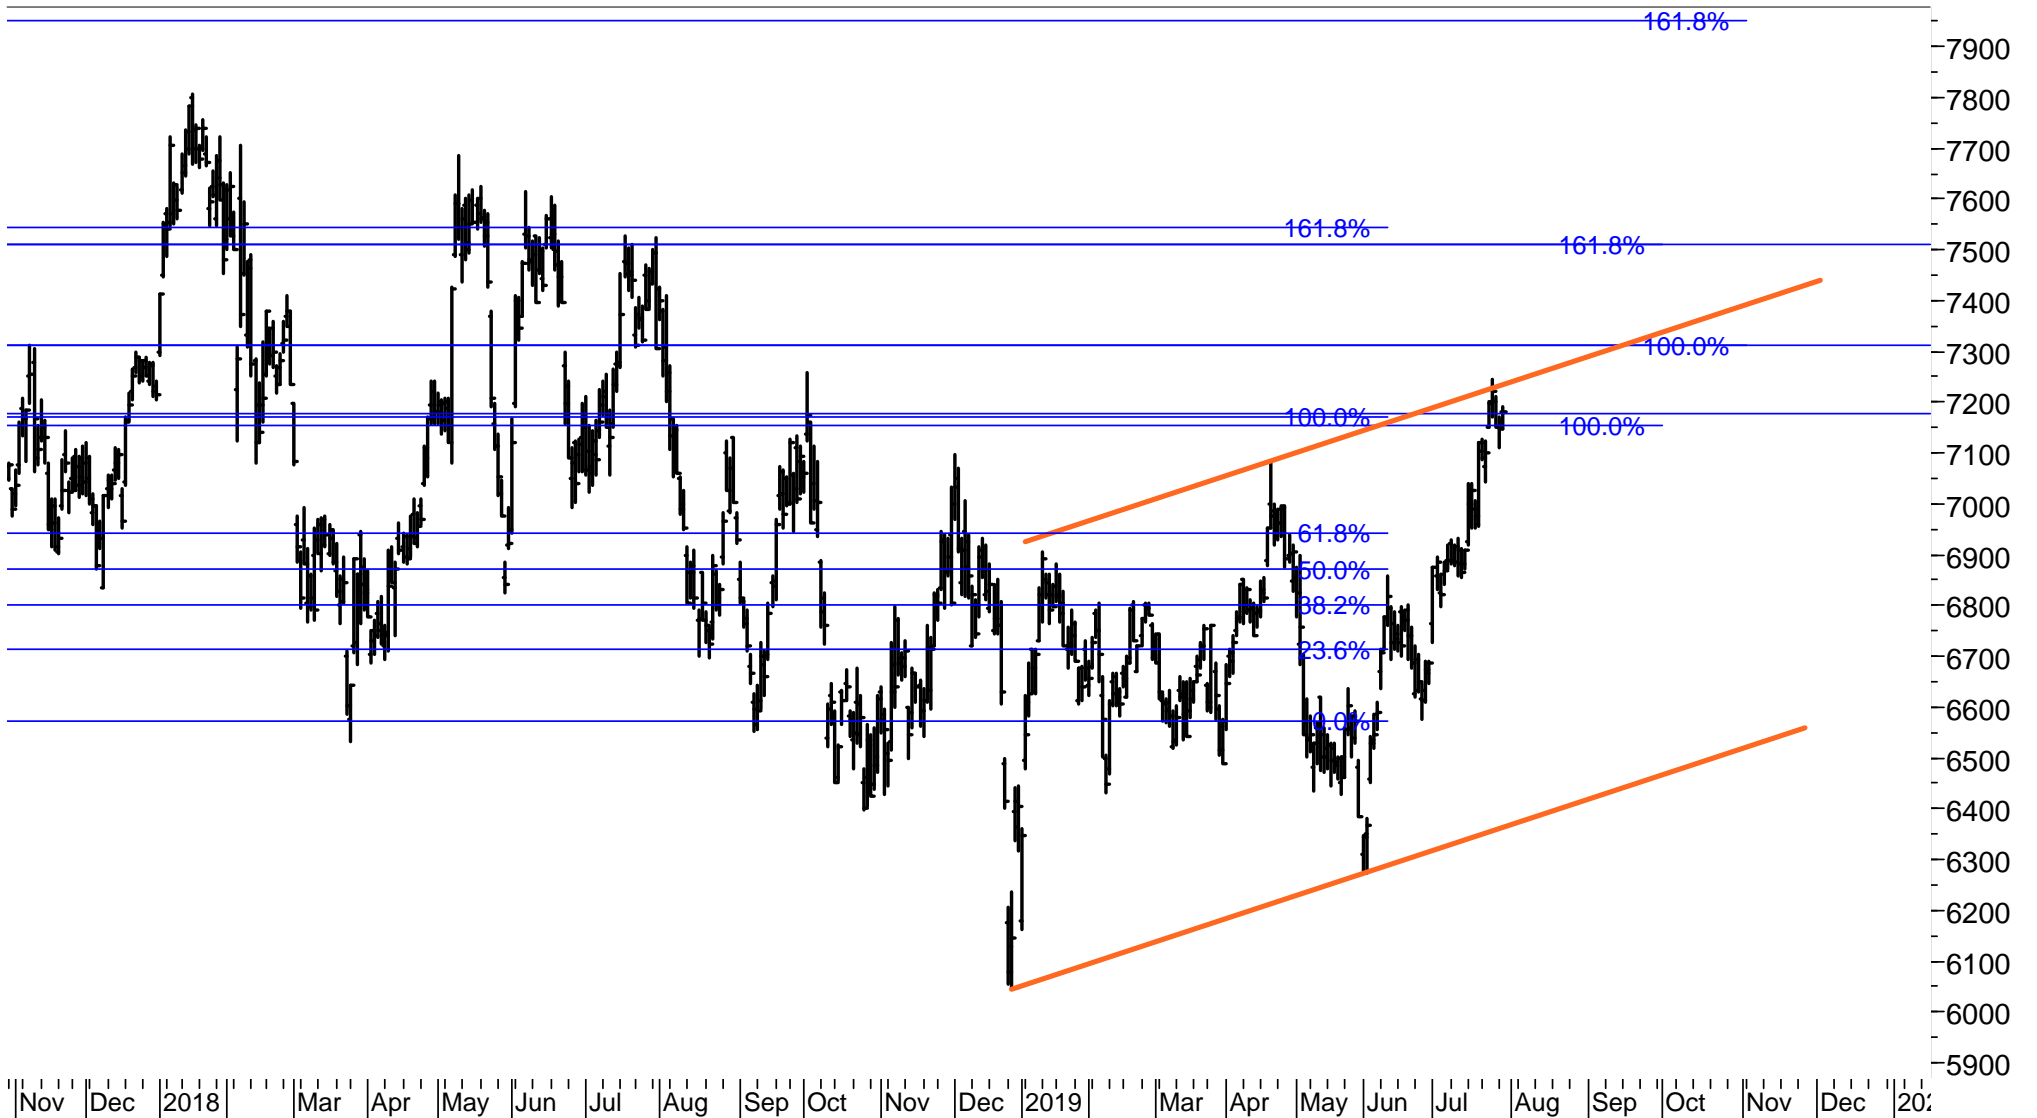

TENCENT

Tencent could be breaking the resistance at 375.
It will take a rise above 380 / 395 / 410 to signal 465.

TOYOTA

I recommended purchase of Toyota with the break of 7000.
It has reached the next target at 7320 or 7550. I would add to the position if 7250 / 7330 is broken.
A short-term sell signal would be triggered only if 7140 / 7100 is broken.
