## Swiss Market Index 20 constituent stocks

The technical condition has clearly deteriorated in the most recent market downleg. However, the downleg did not come as a surprise. Over the last few weeks I have pointed out that sell signals are just around the corner (see Amazon, Adobe, Facebook, Zurich Insurance or other stocks).

Among the SMI 20 Nestlé is the only stock with a positive Score. However, once Nestlé breaks its medium-term supports and turns down, it is a clear signal that the stock market has entered another serious decline.

What is striking going through the individual stock charts is that many of them have reached medium-term support levels in yesterdays or todays market decline. This could mean two things: Either the global stock markets turn up from here RIGHT NOW and re-instate the larger uptrend or, the stock markets could lose another 10% to 20%.

SCORE	COMPANY	RIC	PRICE	LT	MT	ST	COMMENT	DATE BOUGHT	PRICE BOUGHT	PROFIT or LOSS

# ALCON – hourly chart

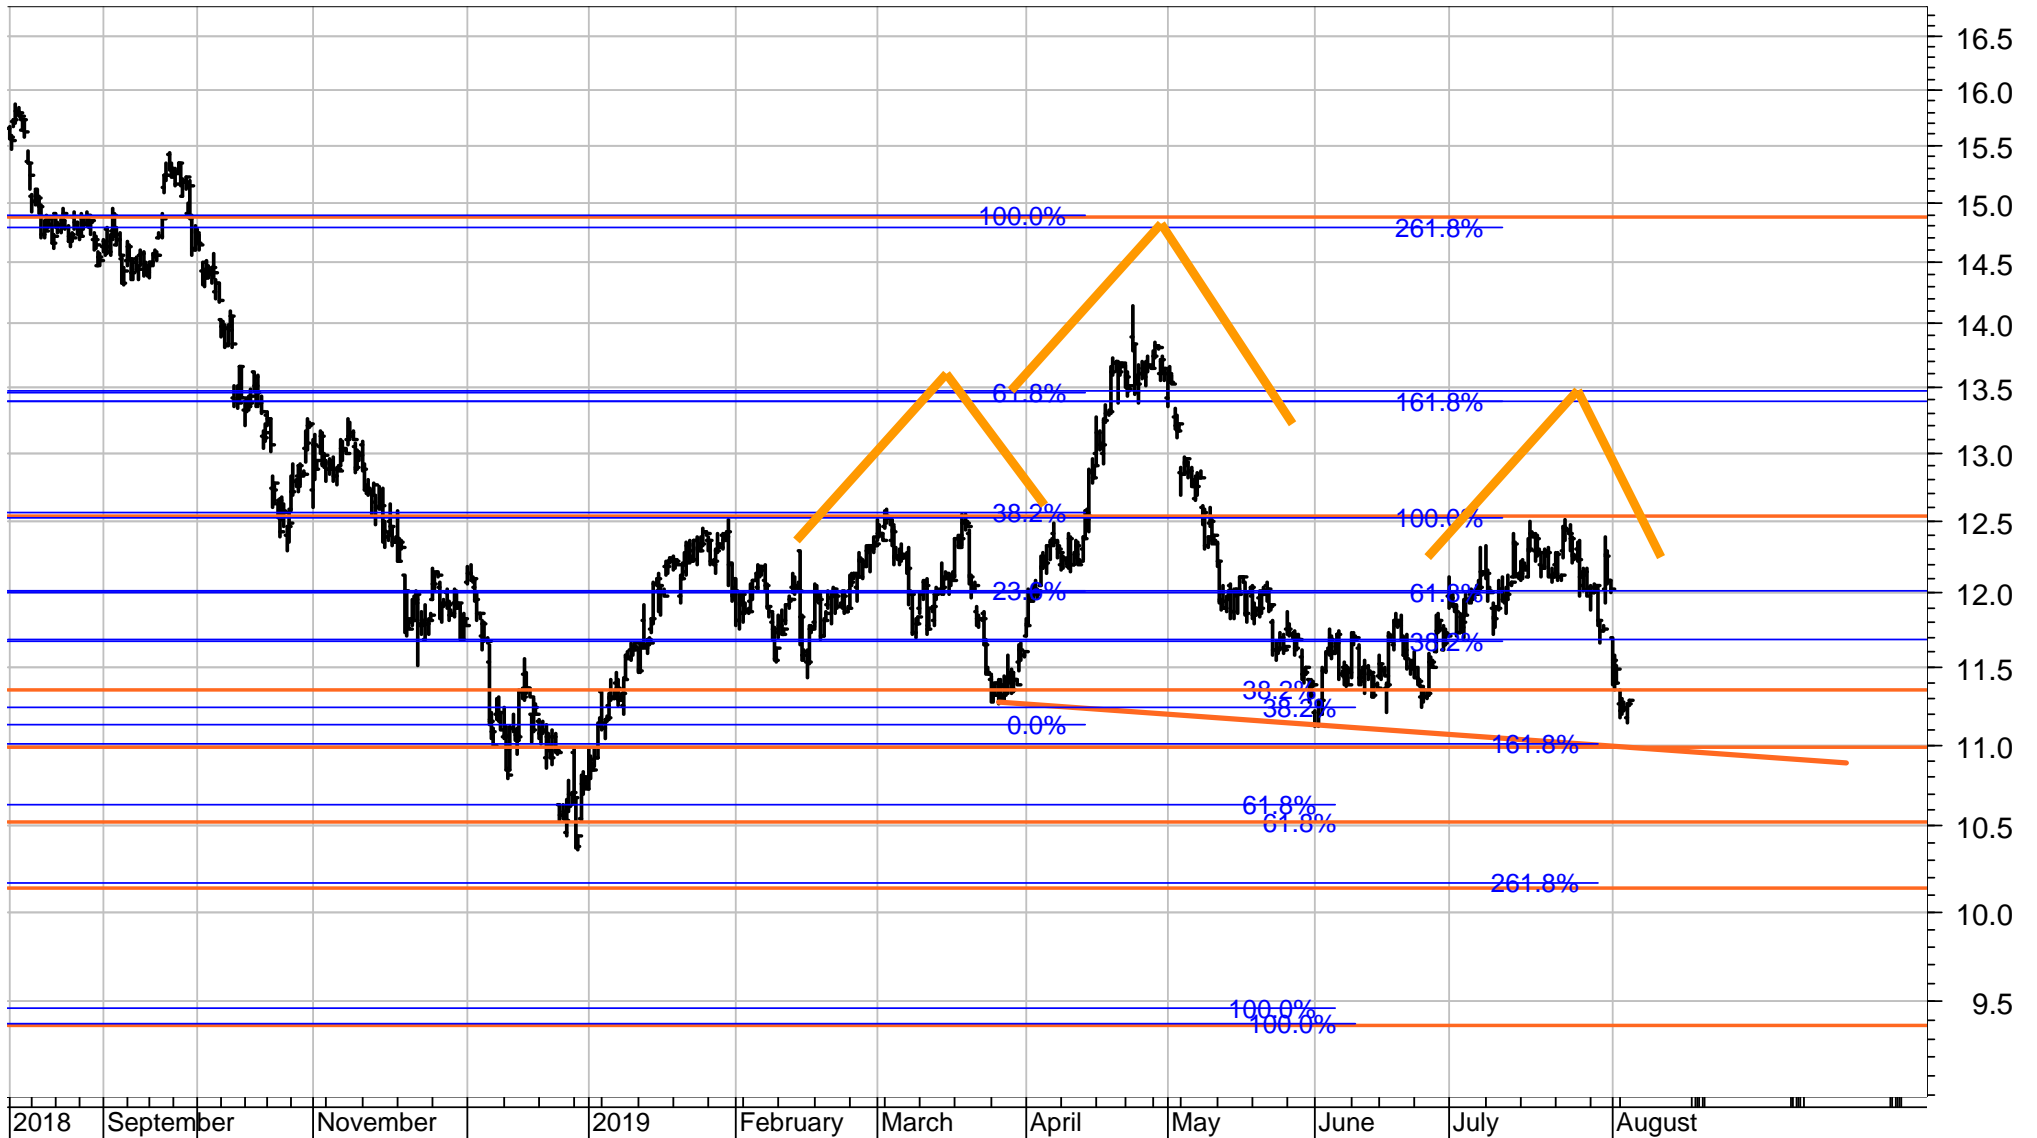

Alcon must hold above 55.50 or the downtrend could signal new lows below the low of April.  
Resistance is at 58.50, 60 and 62.30.  
I am looking to buy if 55.50 holds.

# CSG GROUP – 240-minute chart

CSG desperately needs a rise above 11.70, 12 and 13.50 to avoid a bearish break of a potential head and shoulder top with the neckline at 11. Next support is at 10.50, 10.10 and 9.35.

# KARDEX – daily chart

Kardex displays a typical tech chart, similar to Apple. Kardex has the same three possible paths to go from here as Apple has (and many other tech stocks).

Kardex could now resume the major uptrend in Waves 3, 4 and 5 (blue) or

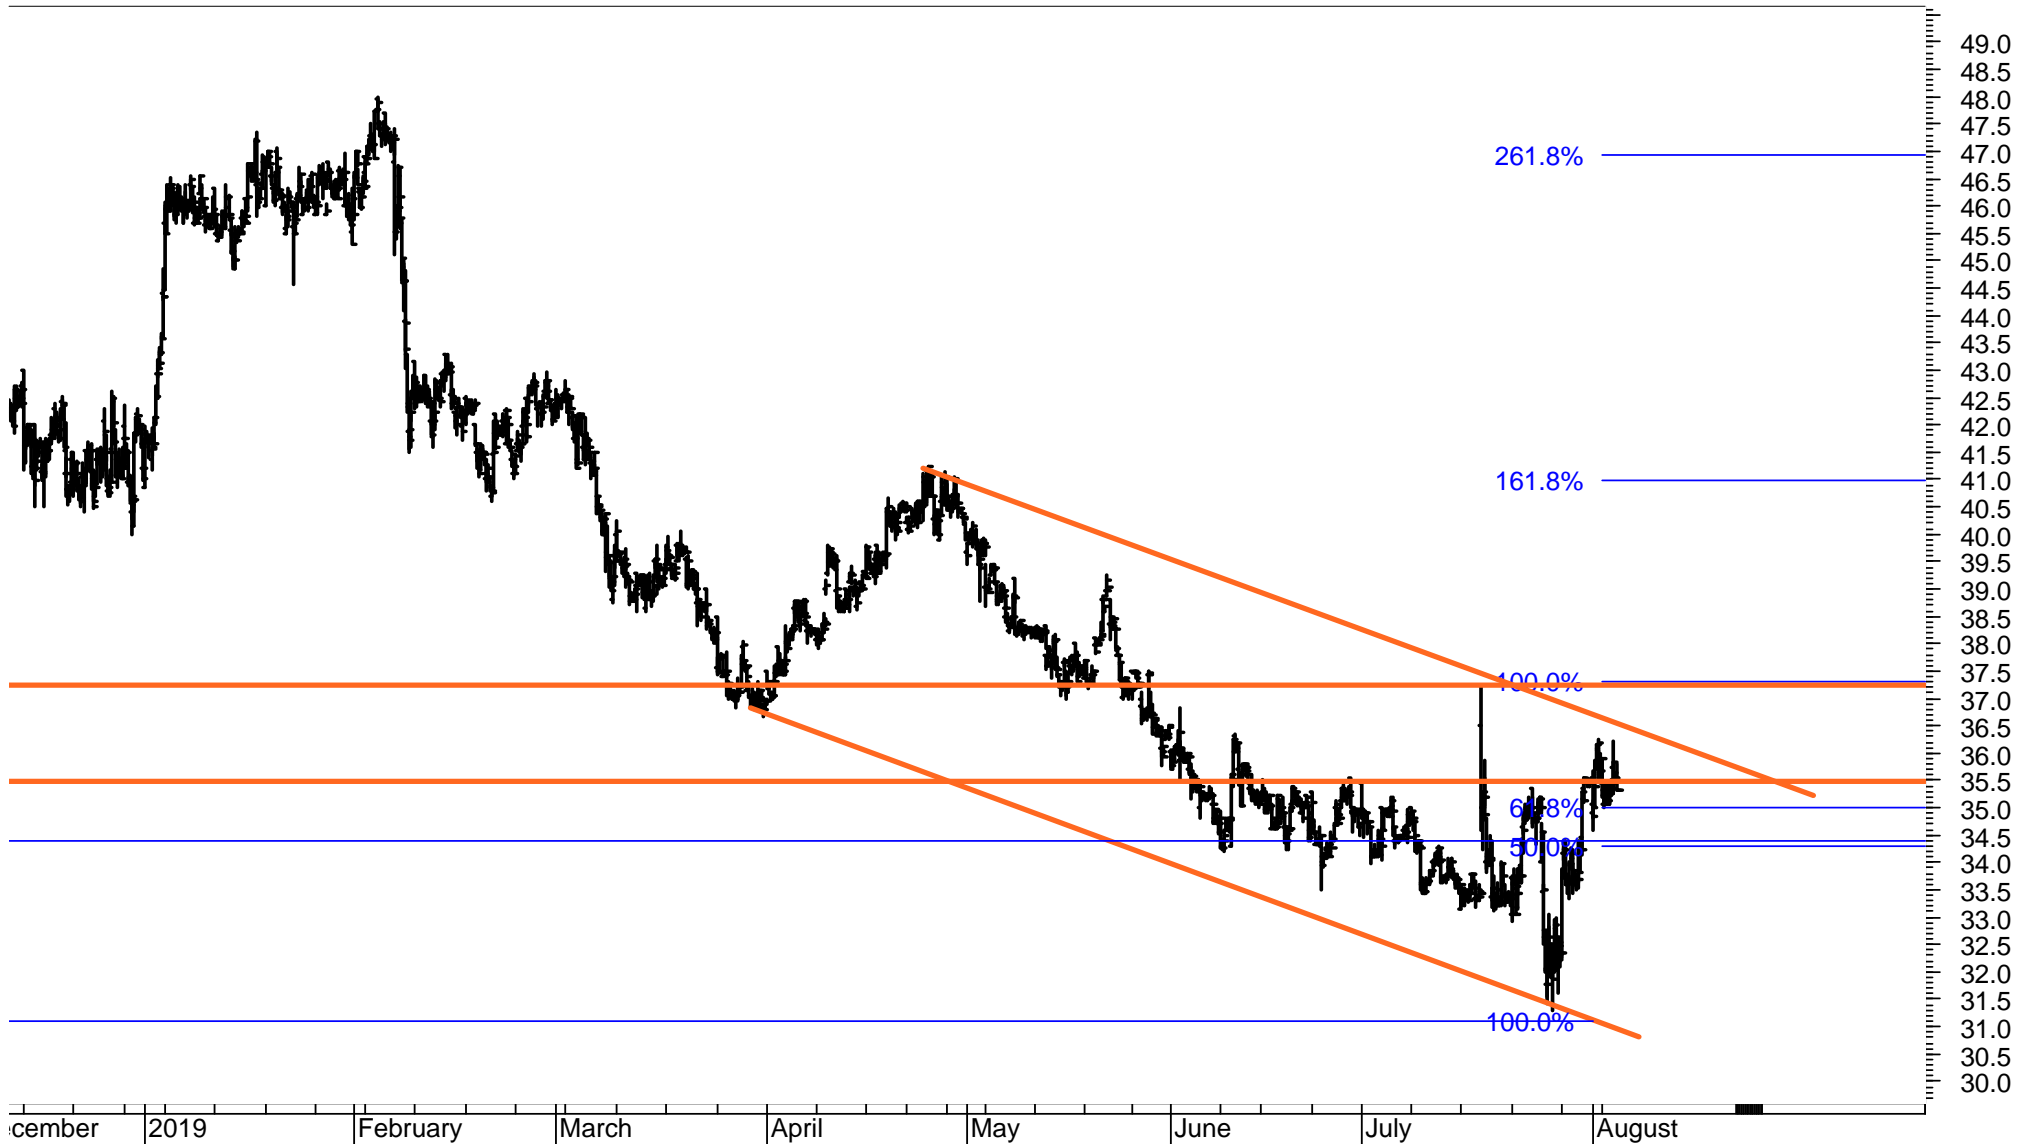

it could form a TRIANGLE (A-B-C-D-E, orange) or

it could form a FLAT (A-B-C, red) with supports at 105 (C=A) or 60 (C=1.618xA).

# LEONTEQ – hourly chart

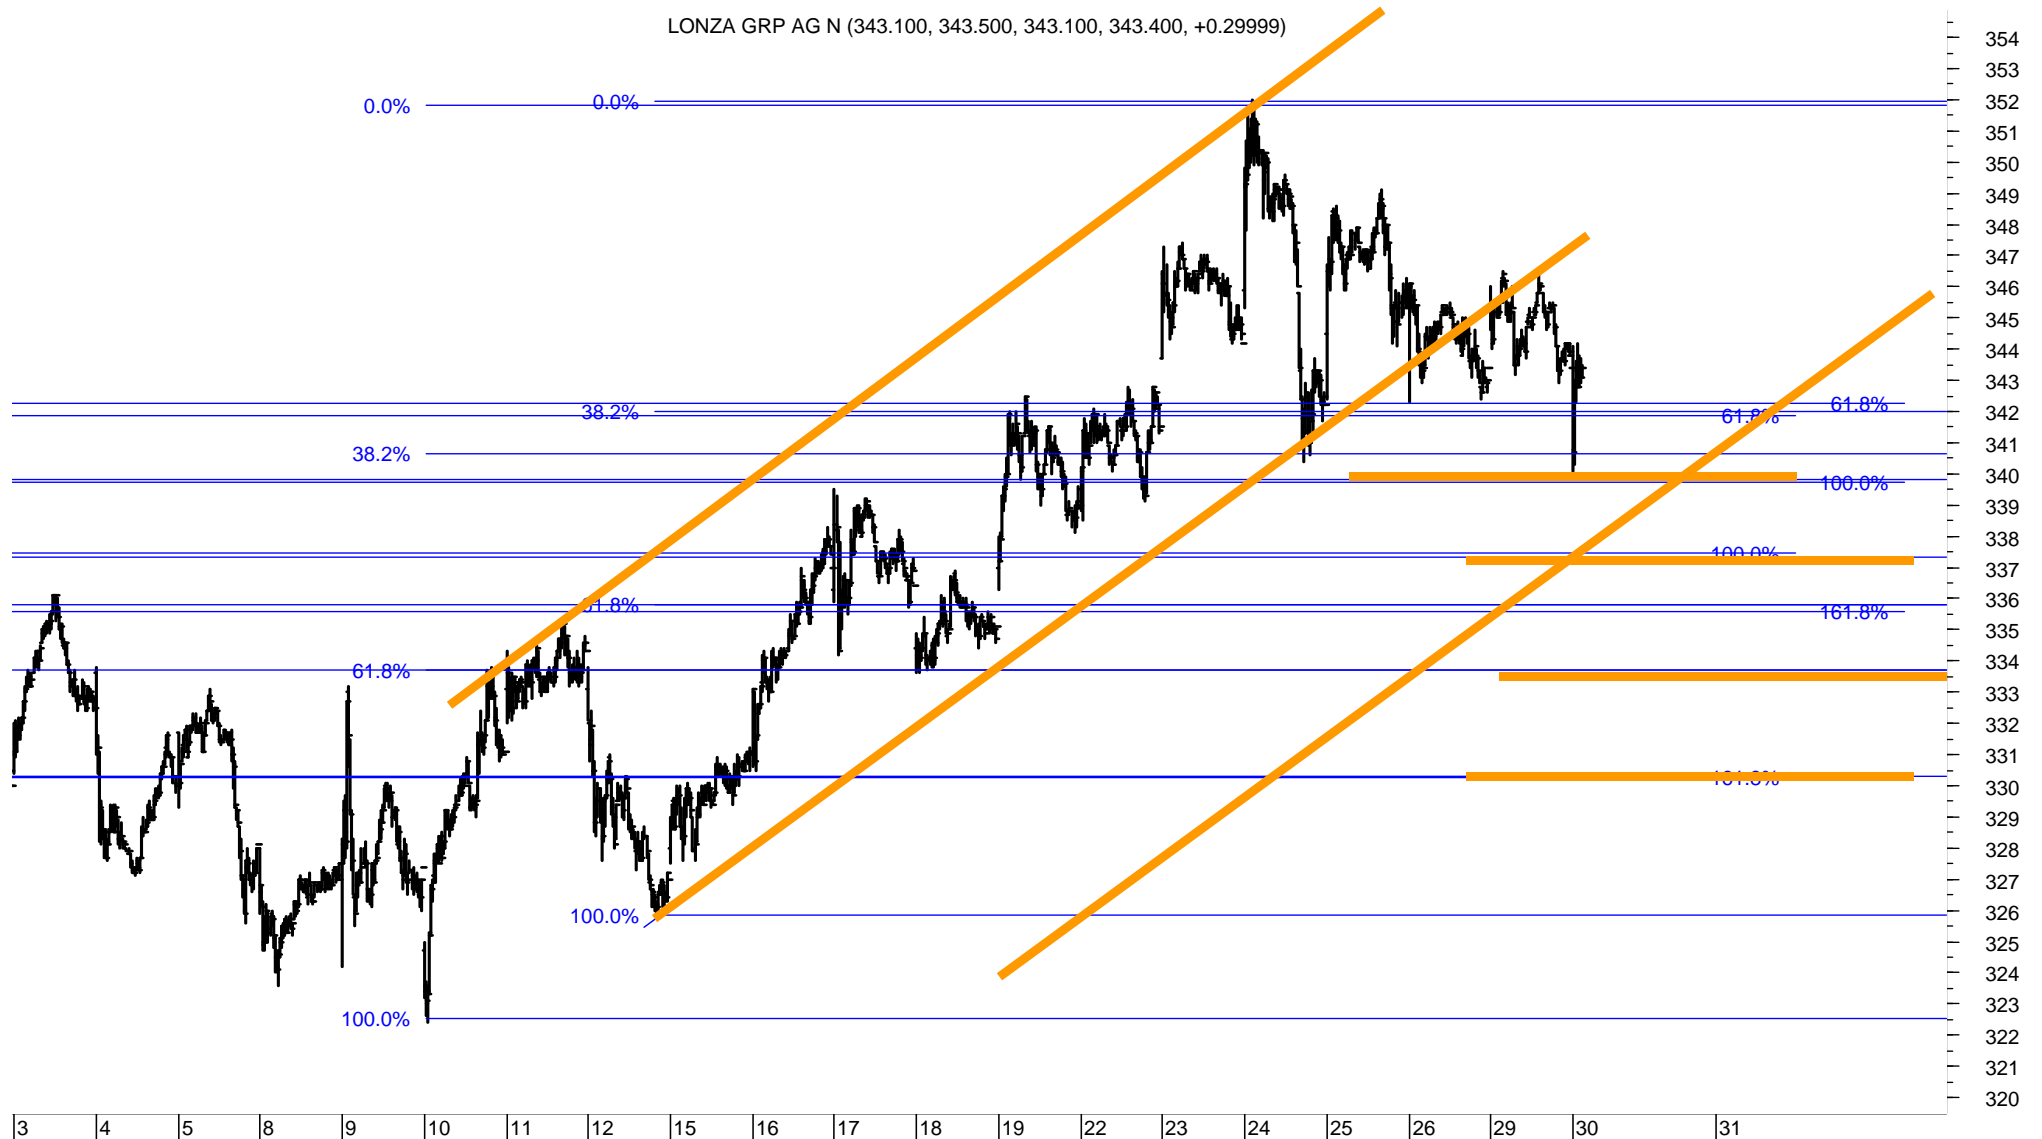

Leonteq is testing the major resistance, which I had located at 35 / 35.50, a break of which would confirm that a new uptrend has taken over. It then needs a rise above 37.50 to signal 41 or 47.

# LONZA – 10-minute chart – reprinted from my Chart Outlook of 30.7.2019

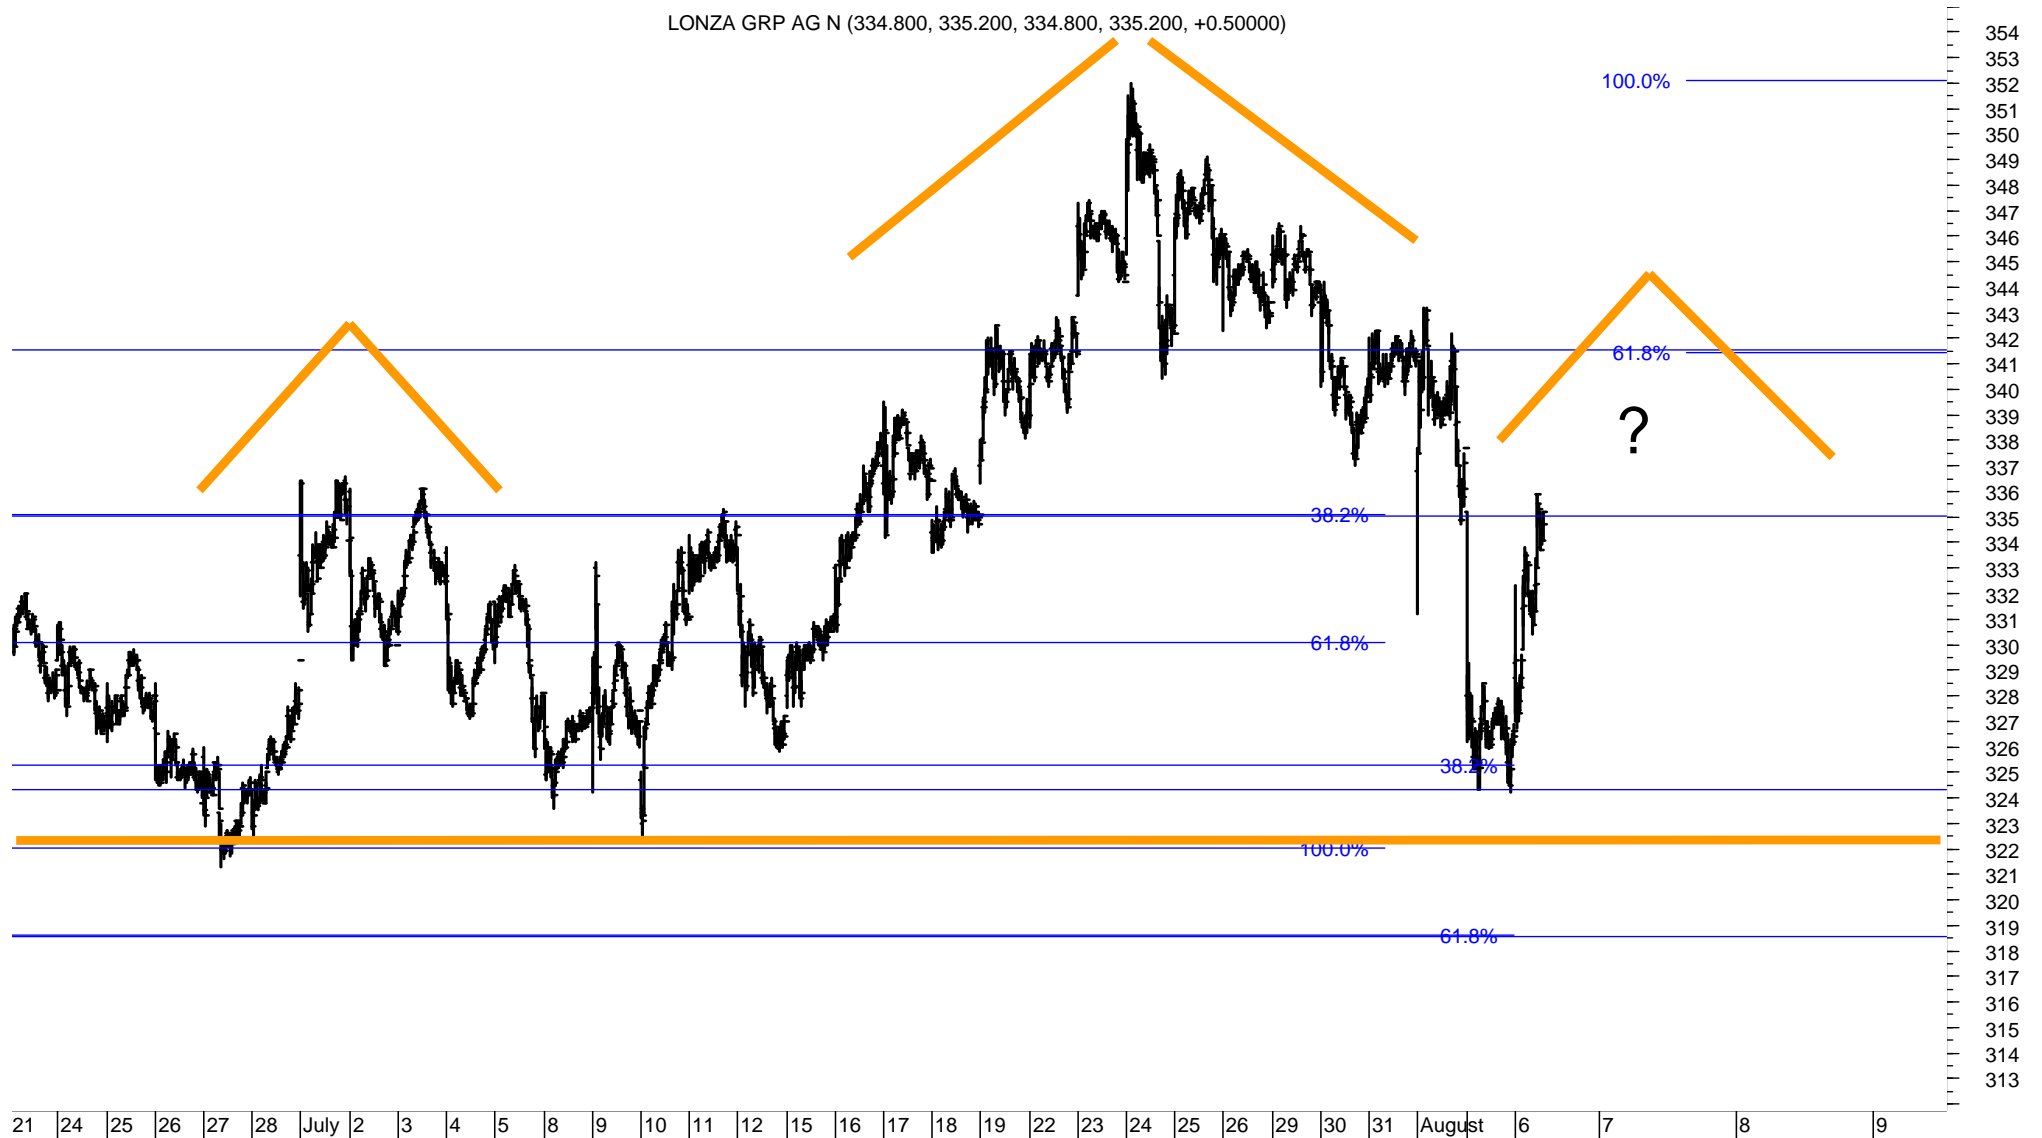

I stated on 30.7.2019: „Lonza entered a short-term correction.  
It will trigger sell signals if the supports at 340, 337, 333.50 and 330 are broken.“

See the next page for the updated chart.

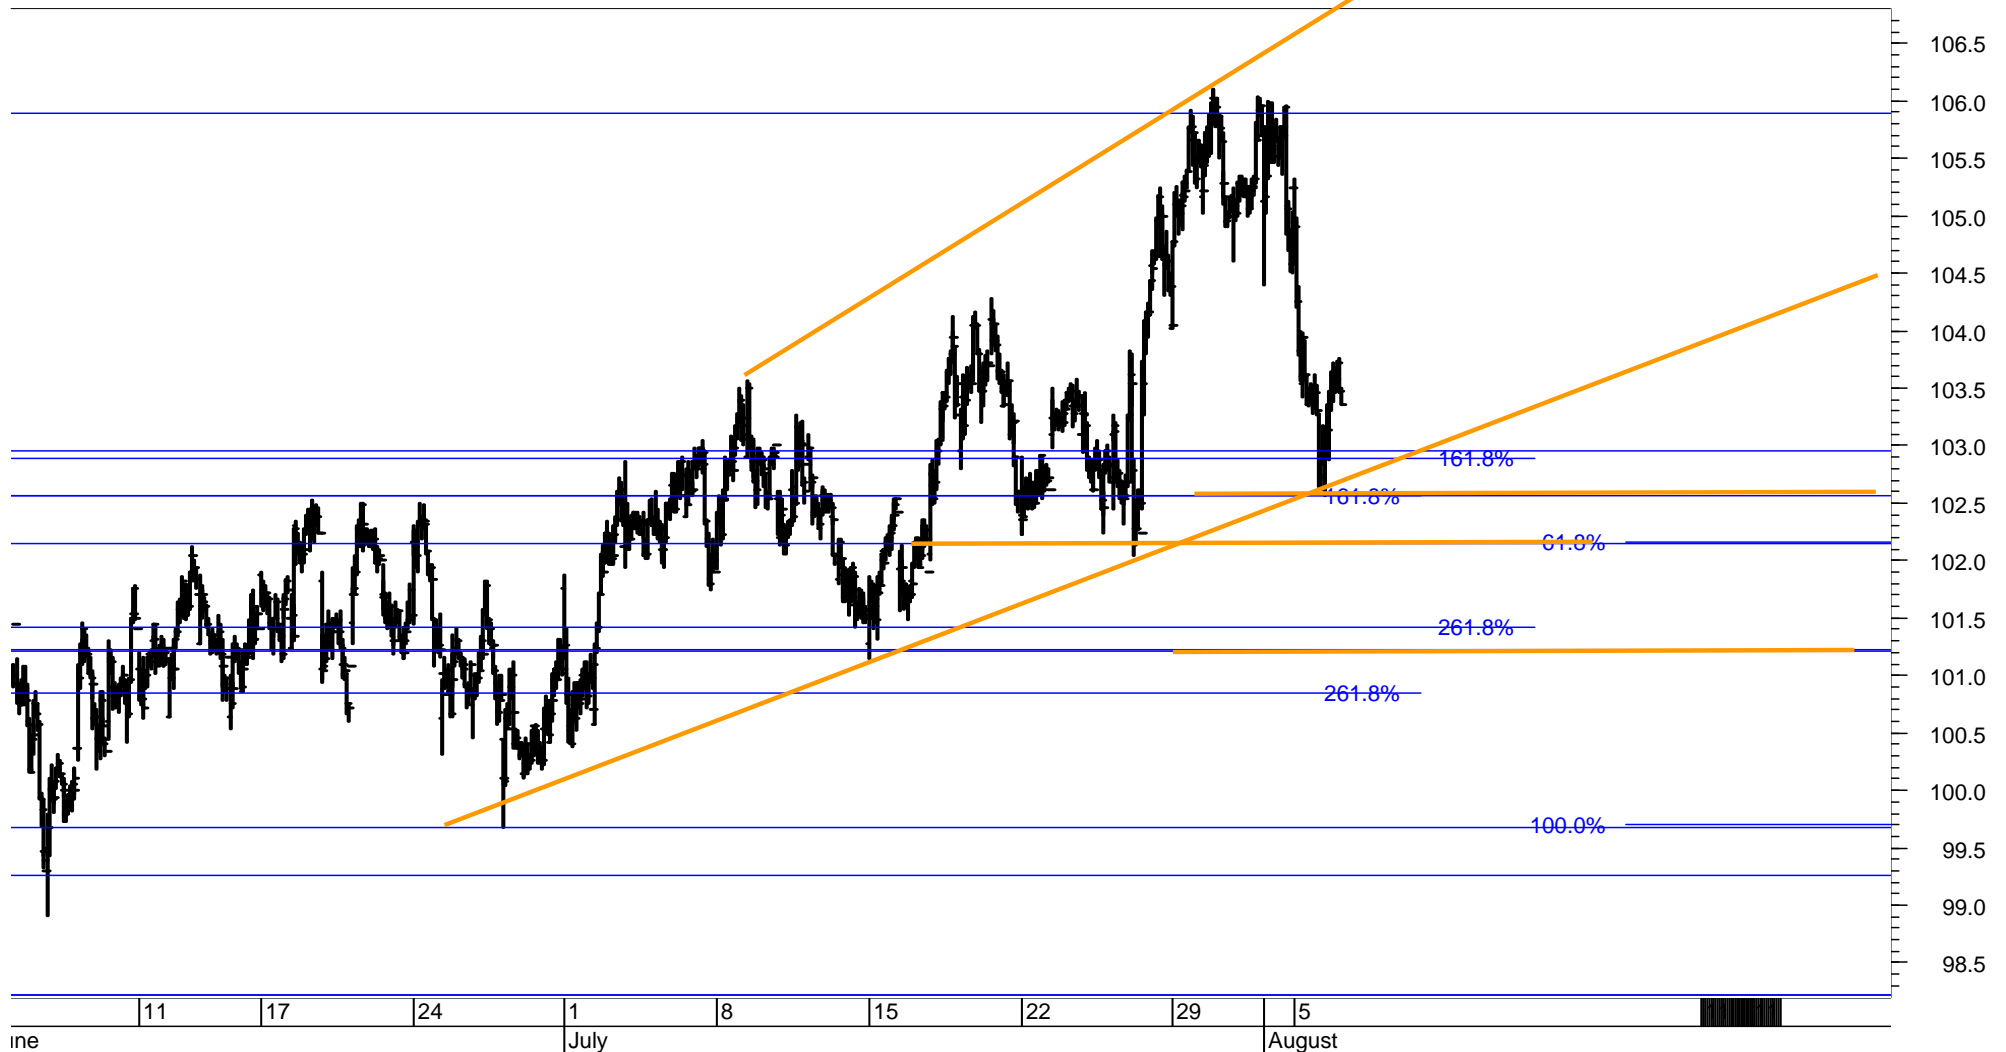

# LONZA – 10-minute chart

Lonza triggered sell signals with the break of the supports at 340, 337, 333.50 and 330. It could be forming a head and shoulder top with the neckline at 324 and closest support at 318.50.

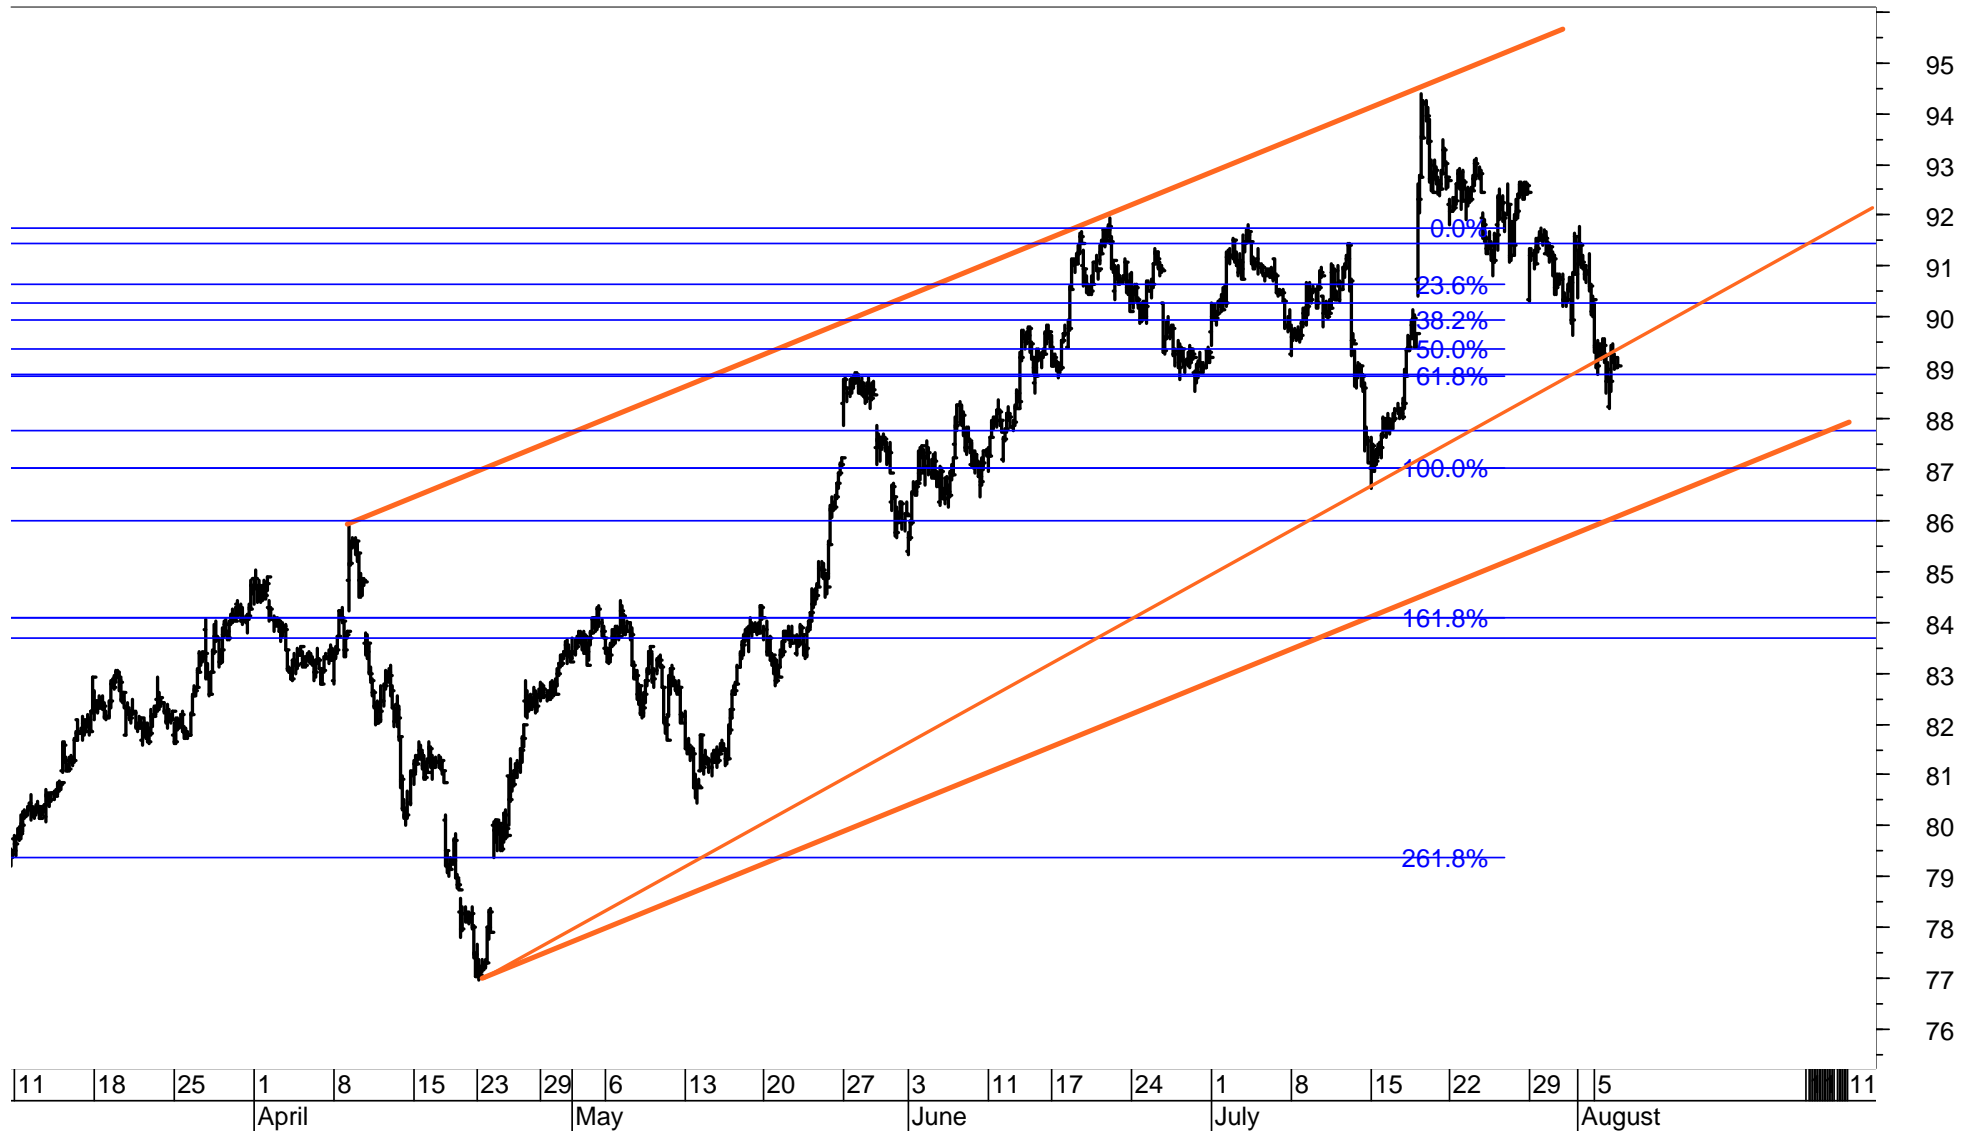

## NESTLE – 30-minute chart

Nestlé has topped at the long-term resistance around 106.  
Clearly, a break below 103 / 102 would signal that the medium-term uptrend is over for now.  
A break of 101 and 99.20 would mean that also the long-term technicals are pointing to lower prices.

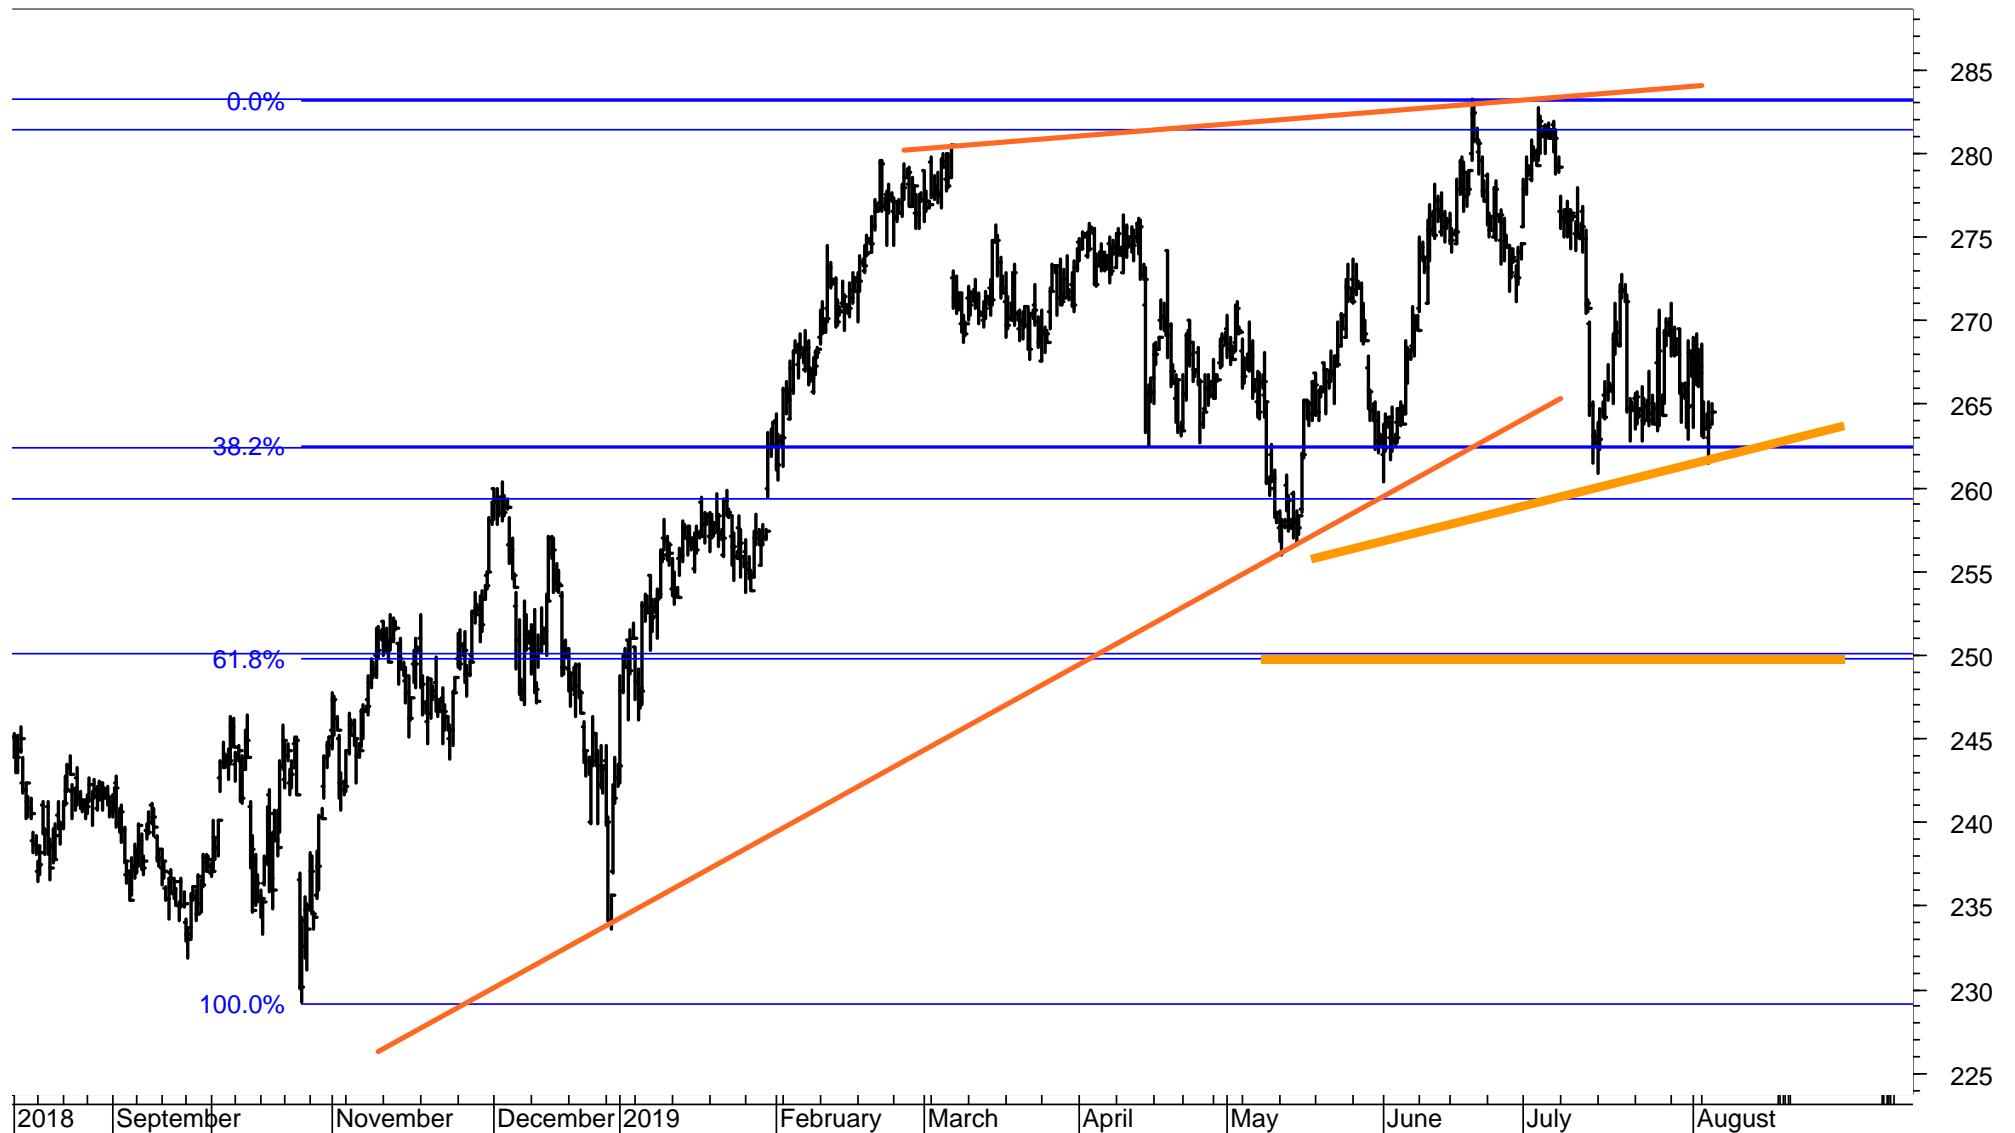

# NOVARTIS – hourly chart

Novartis entered a correction following the surge to 94.50. The level around 90.20 was broken and the stock provides new support levels at 87.80, 87, 86 and 84 / 83.50. NOVN remains in the long-term uptrend as long as 86 is not broken.

## ROCHE GS – 240-minute chart

Roche is fighting hard to defend the major support at 260 / 259, a break of which is likely to activate the next supports at 250 / 248 or 230. So far, the pattern from February is more likely to be a consolidation than a top. However, because Roche registered a minor higher high in June compared to the high in early March, the uptrend from December could also be seen as complete. This is why a break of 259 and 250 should be taken seriously.

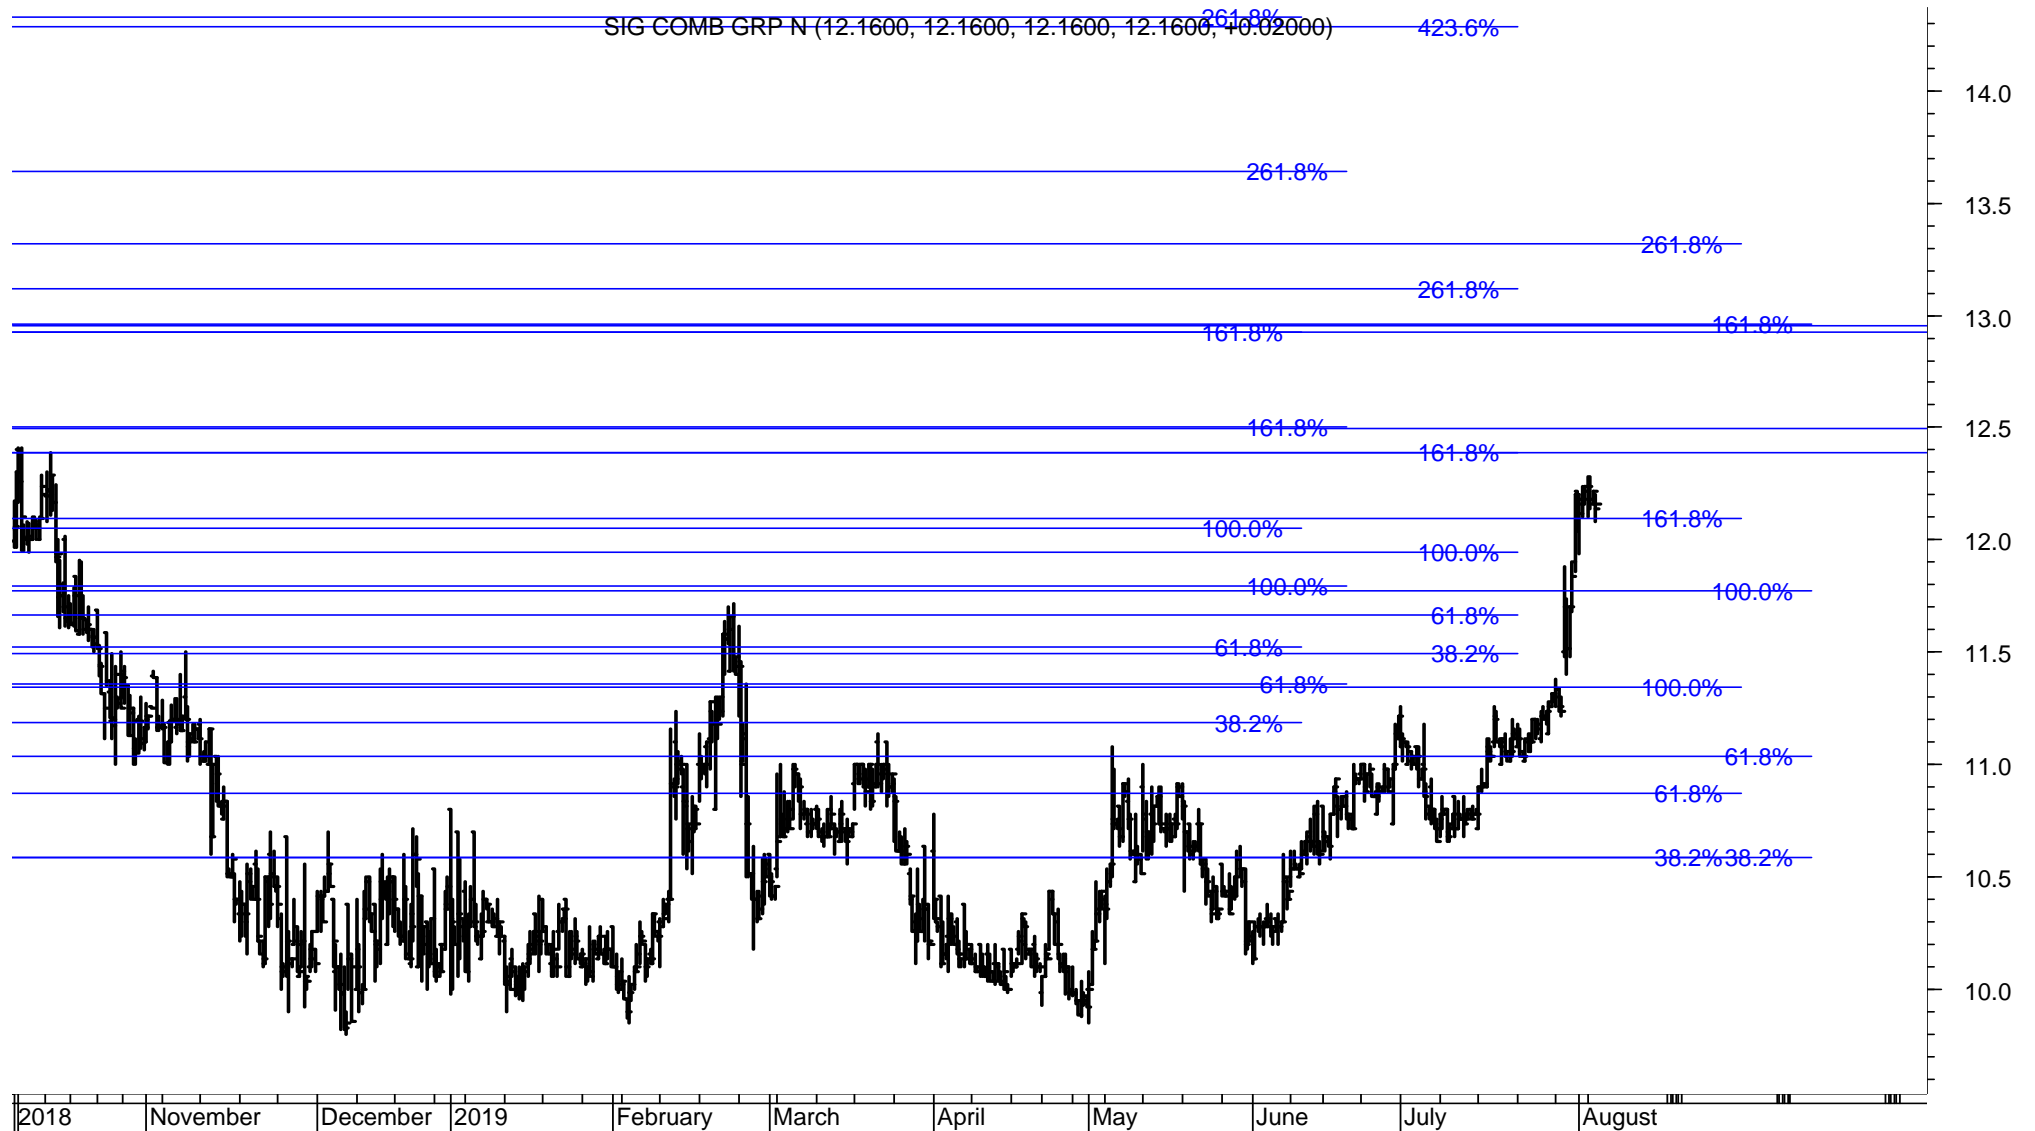

# SIG COMBIBLOC GROUP – 240-minute chart

SIG COMBIBLOC broke out of the base from November 2018 and entered a new uptrend.

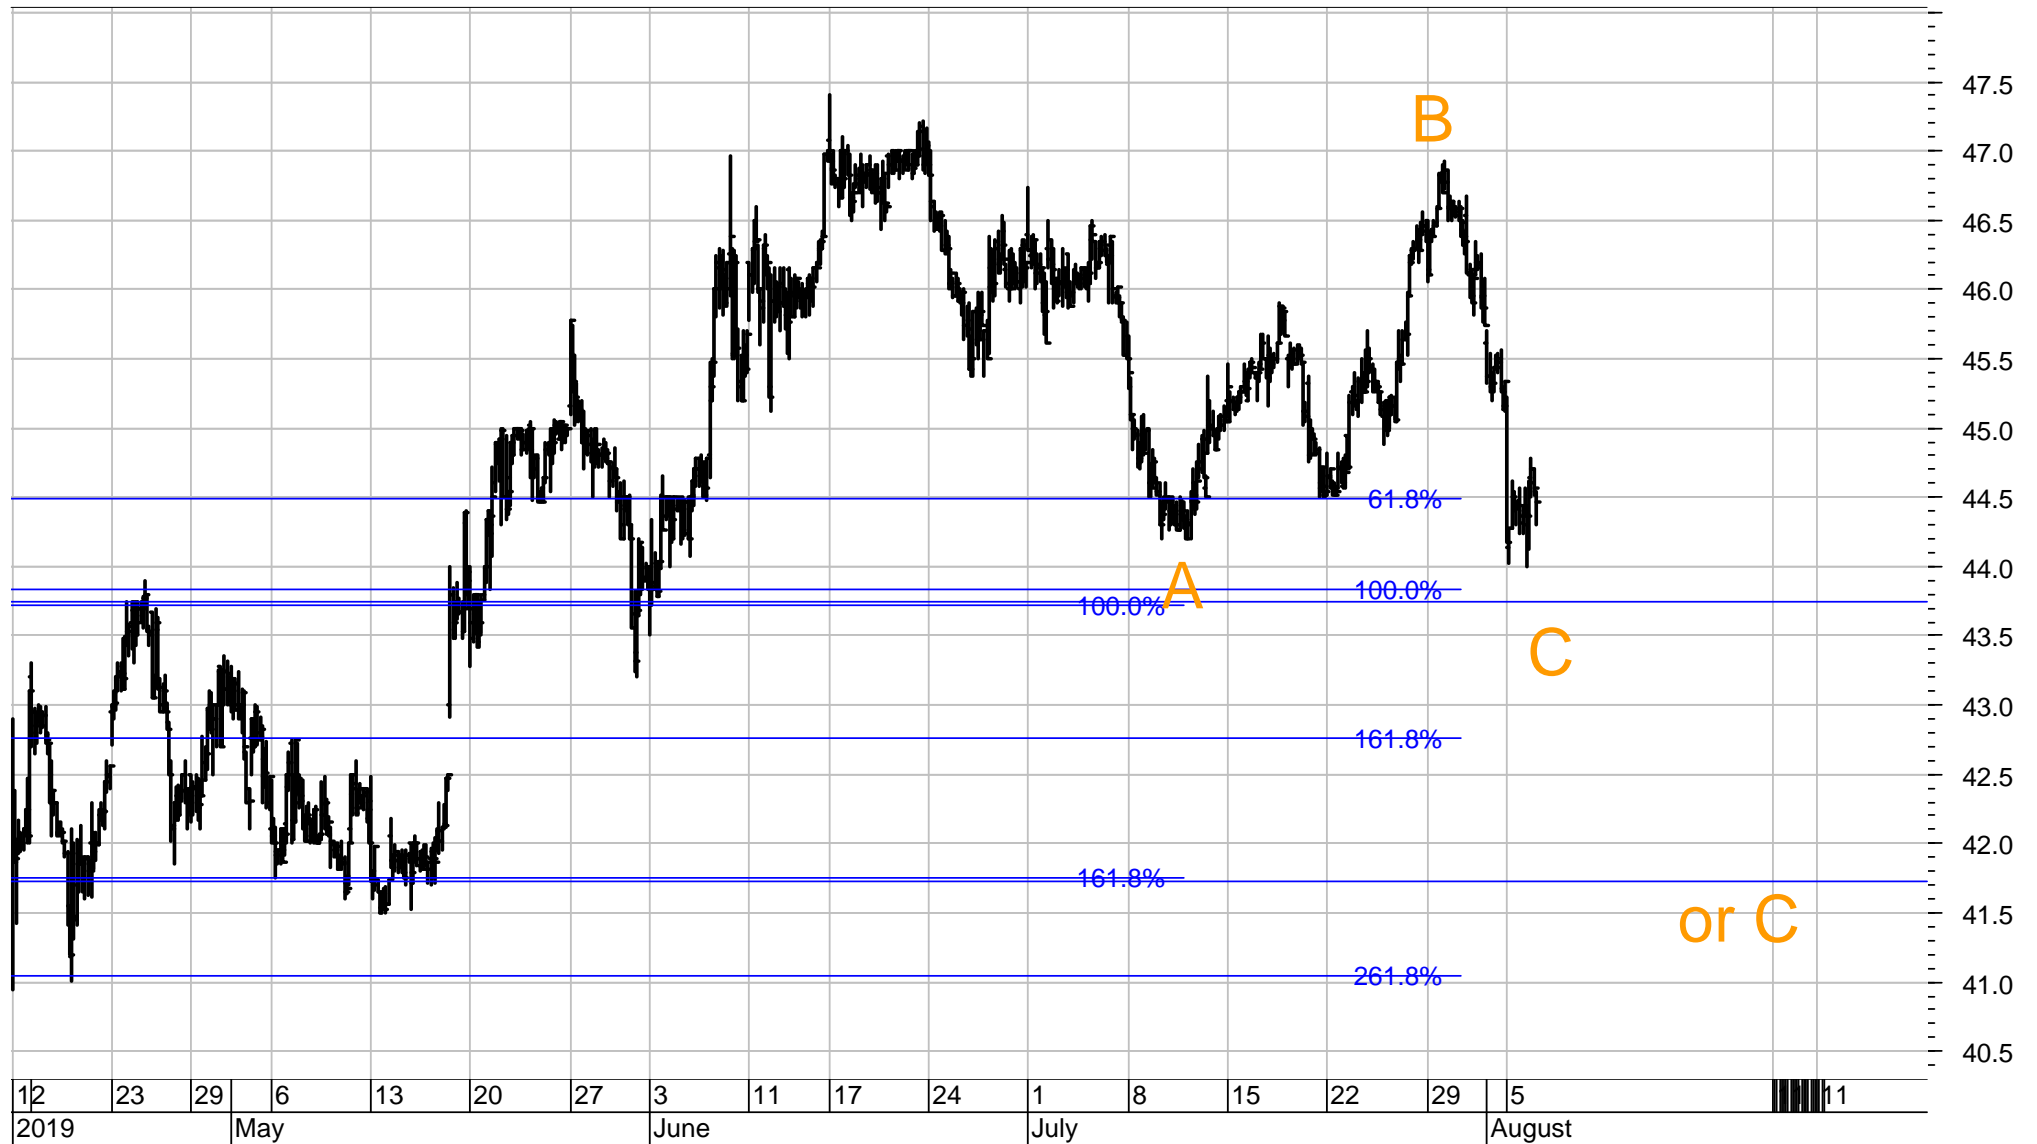

Resistance is at 12.40 / 12.50 and 12.90 / 13.00.

I would add to the position if these levels are broken.

# STADLER RAIL – hourly chart

Stadler Rail is forming a FLAT A-B-C with supports at 43.70 (C=A) or 41.70 (C=1.618xA).  
I am waiting for Wave C to bottom.

# UBS – daily chart

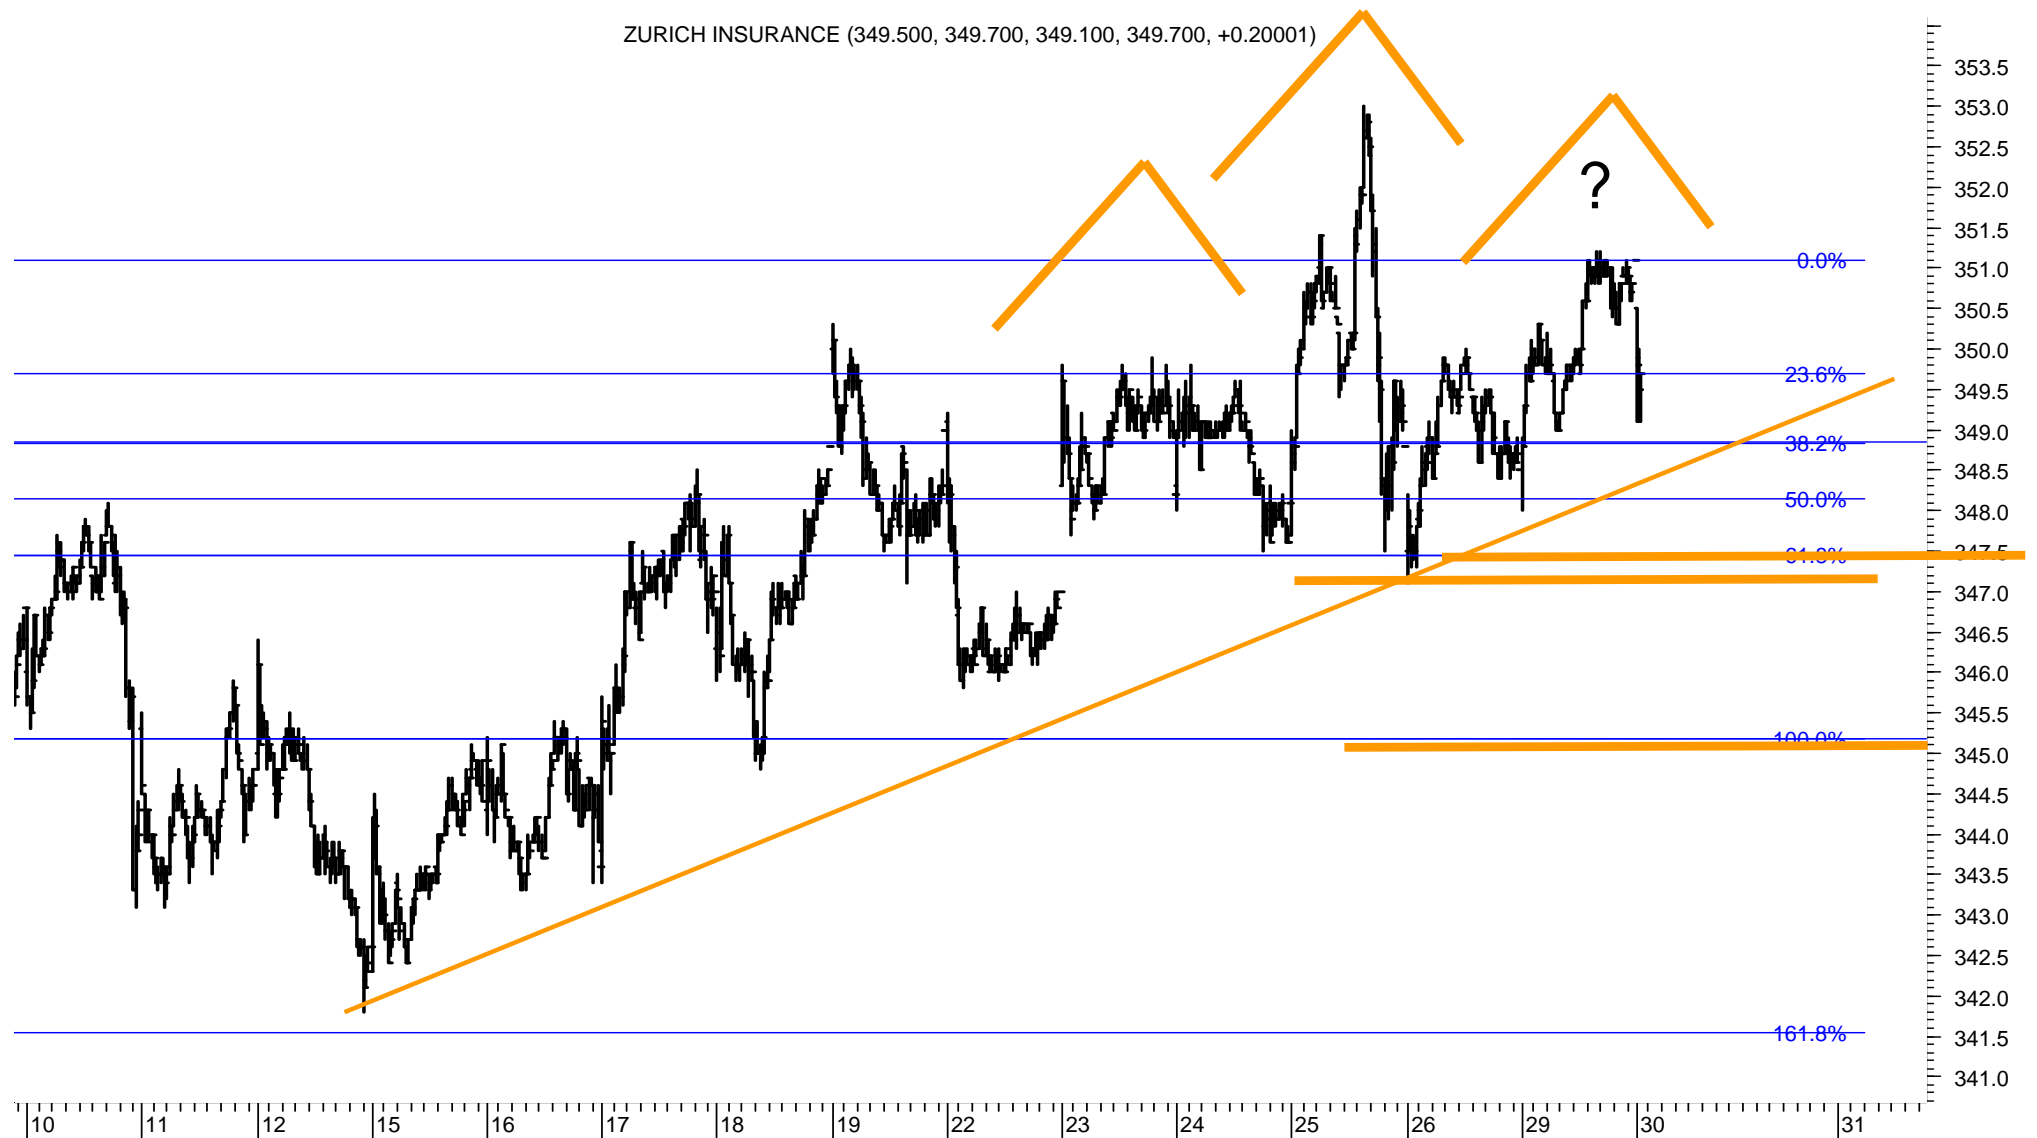

UBS has declined in a linear downtrend since early 2018 and has reached a mega (or giga) support at around 10.80 / 10.50. Next lower supports are below 10. It is one of the so called make-it-or-break-it constellations.

# ZURICH INSURANCE – 10-minute chart – reprinted from my Chart Outlook of 30.7.2019

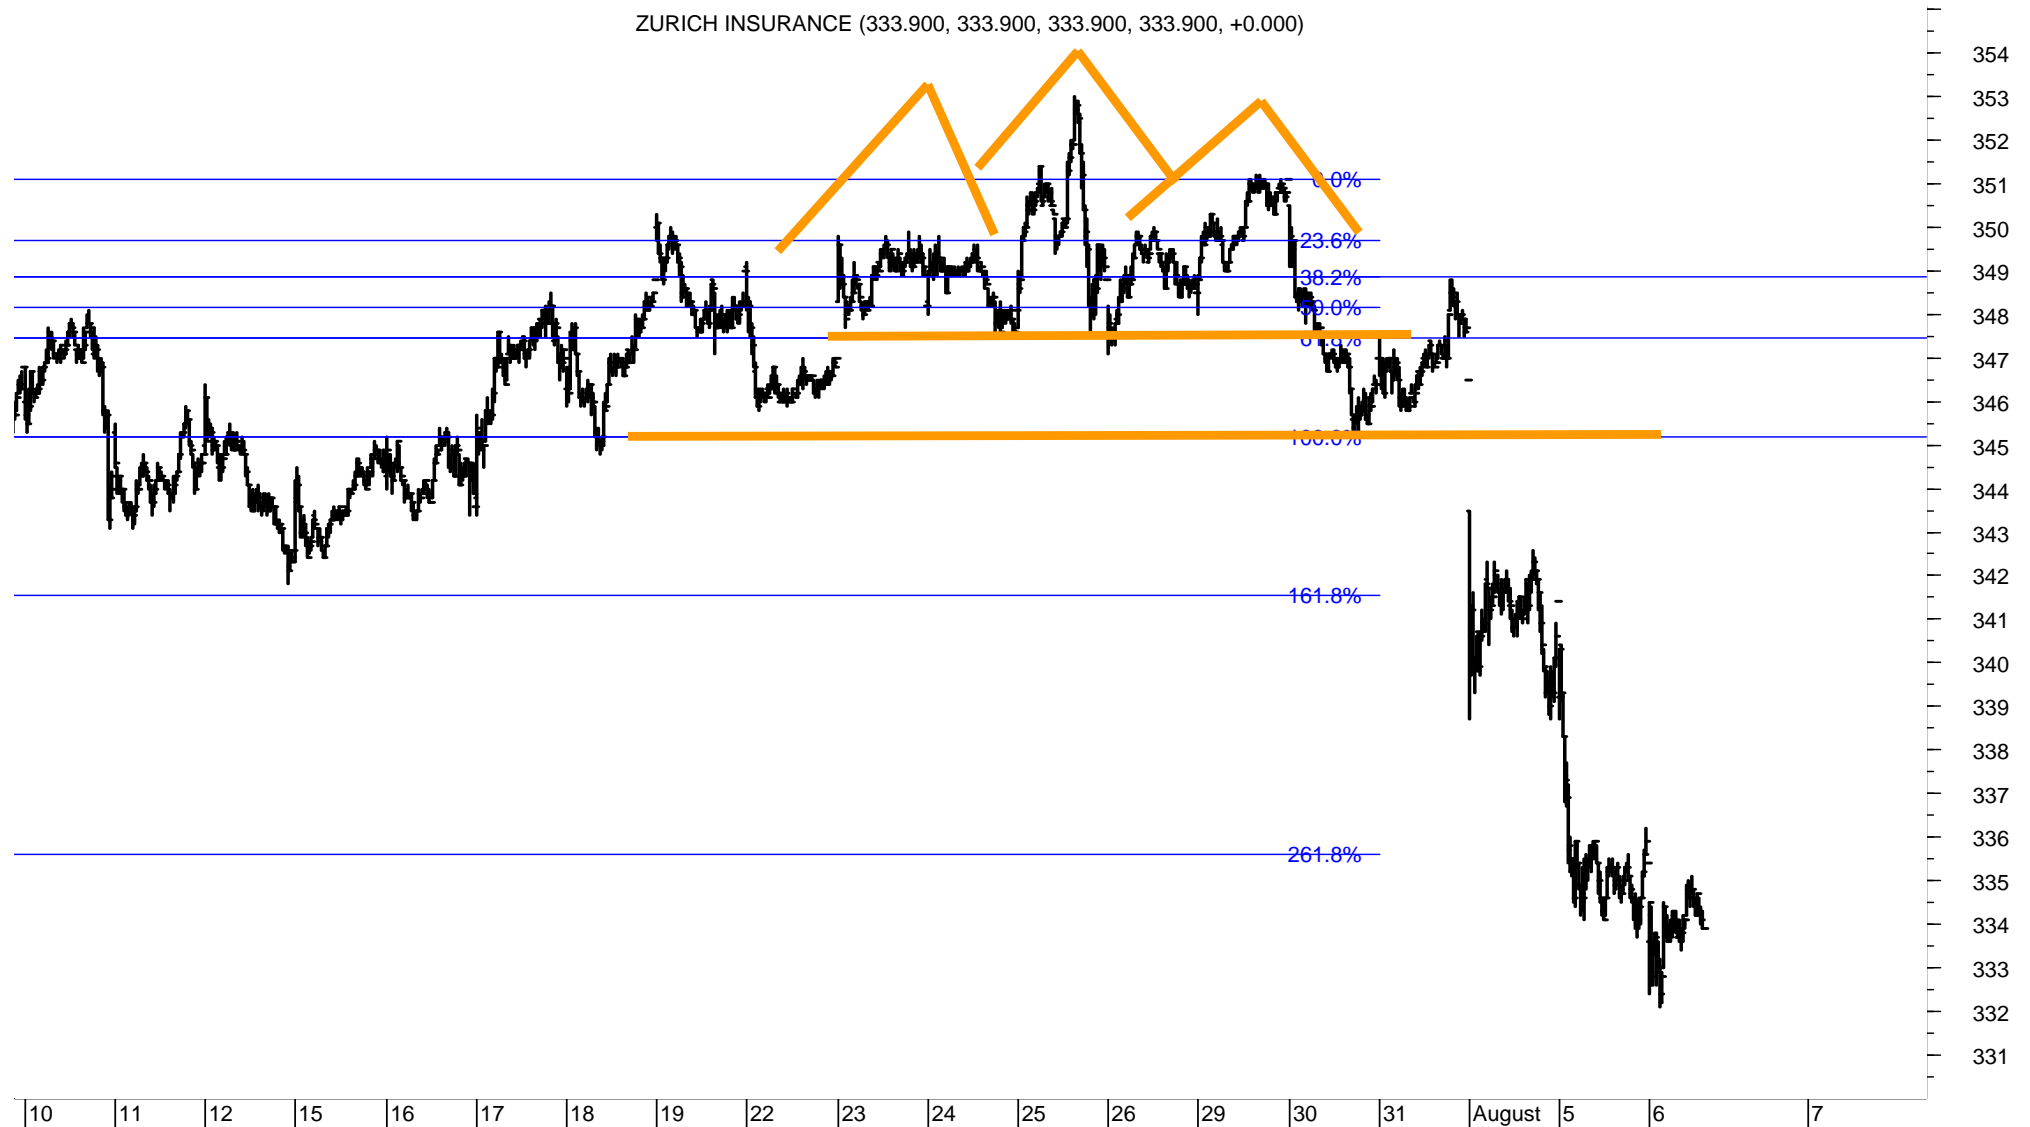

On 30.7.2019 I sated: “Zurich will trigger sell signals if 348.80, 347.50 and 345 are broken.”

See the next page for the updated chart.

# ZURICH INSURANCE – 10-minute chart

Zurich will trigger the next sell signal if 329 is broken.

## ADOBE – hourly chart – reprinted from my Chart Outlook of 16.7.2019

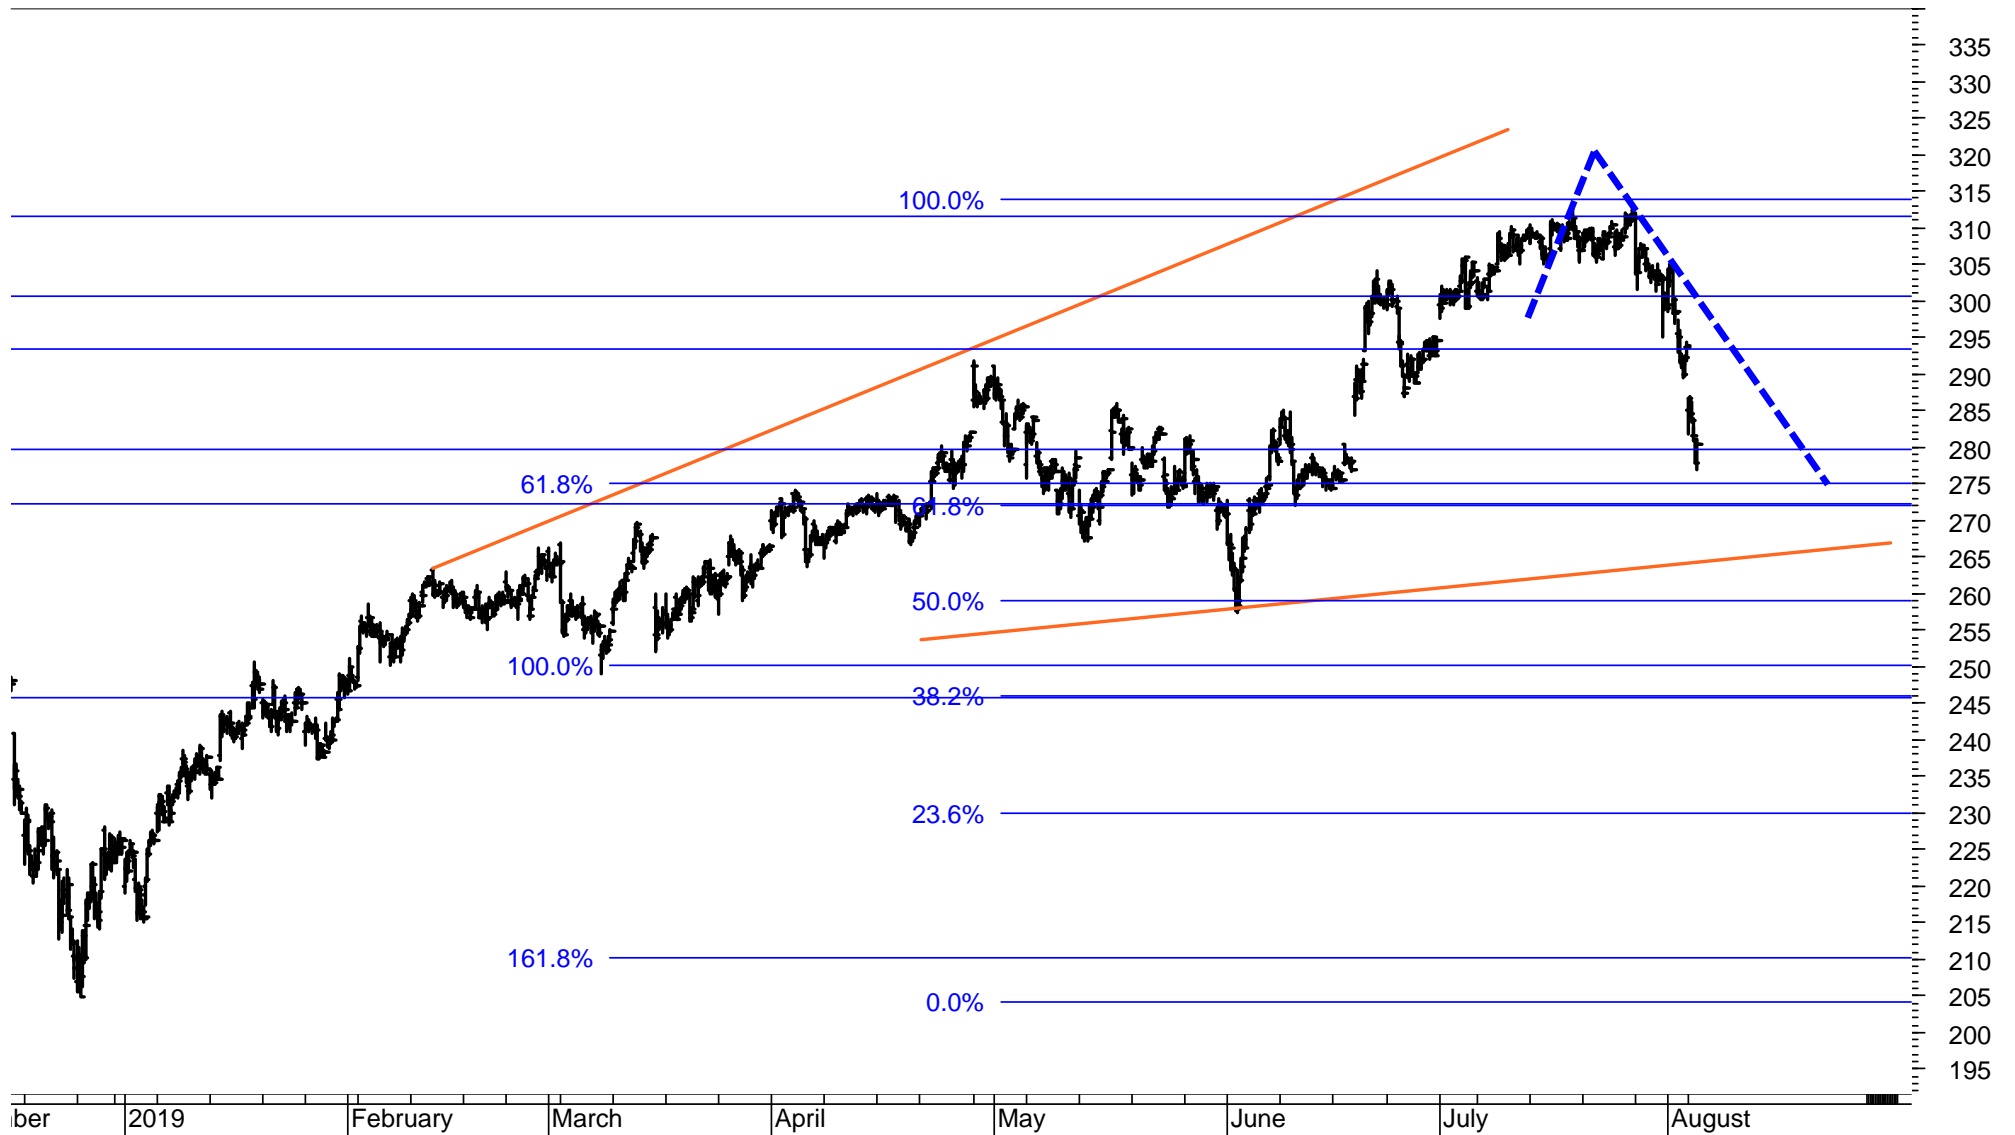

On 16.7.2019 I stated: “Adobe has reached the target zone for the Wedge to top between 305 and 325”.

See the updated chart on the next page.

# ADOBE – hourly chart

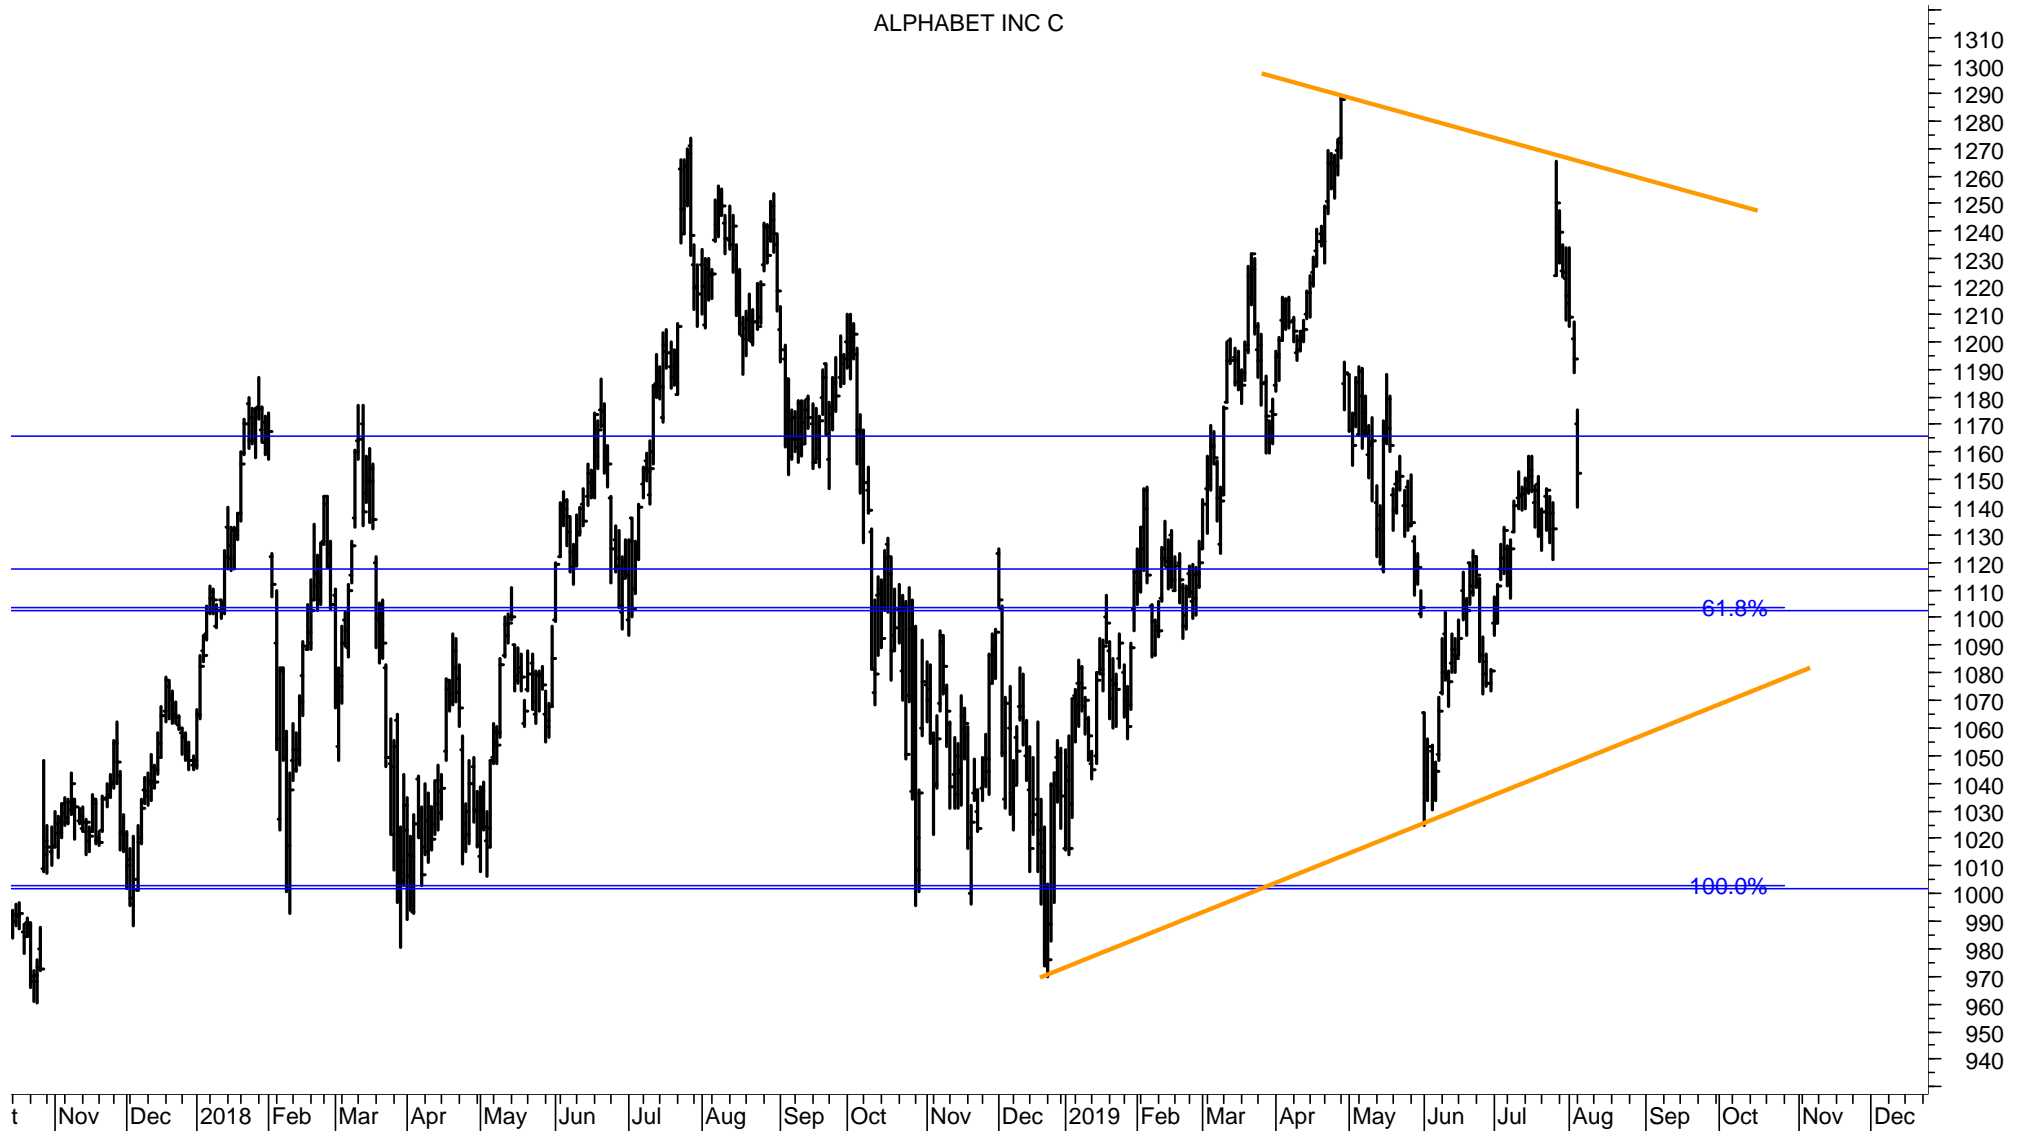

Adobe completed the Wedge in July and turned down, exactly as I had predicted since June. Major supports are at 285 / 270 and 250 / 245.

# ALPHABET – daily chart

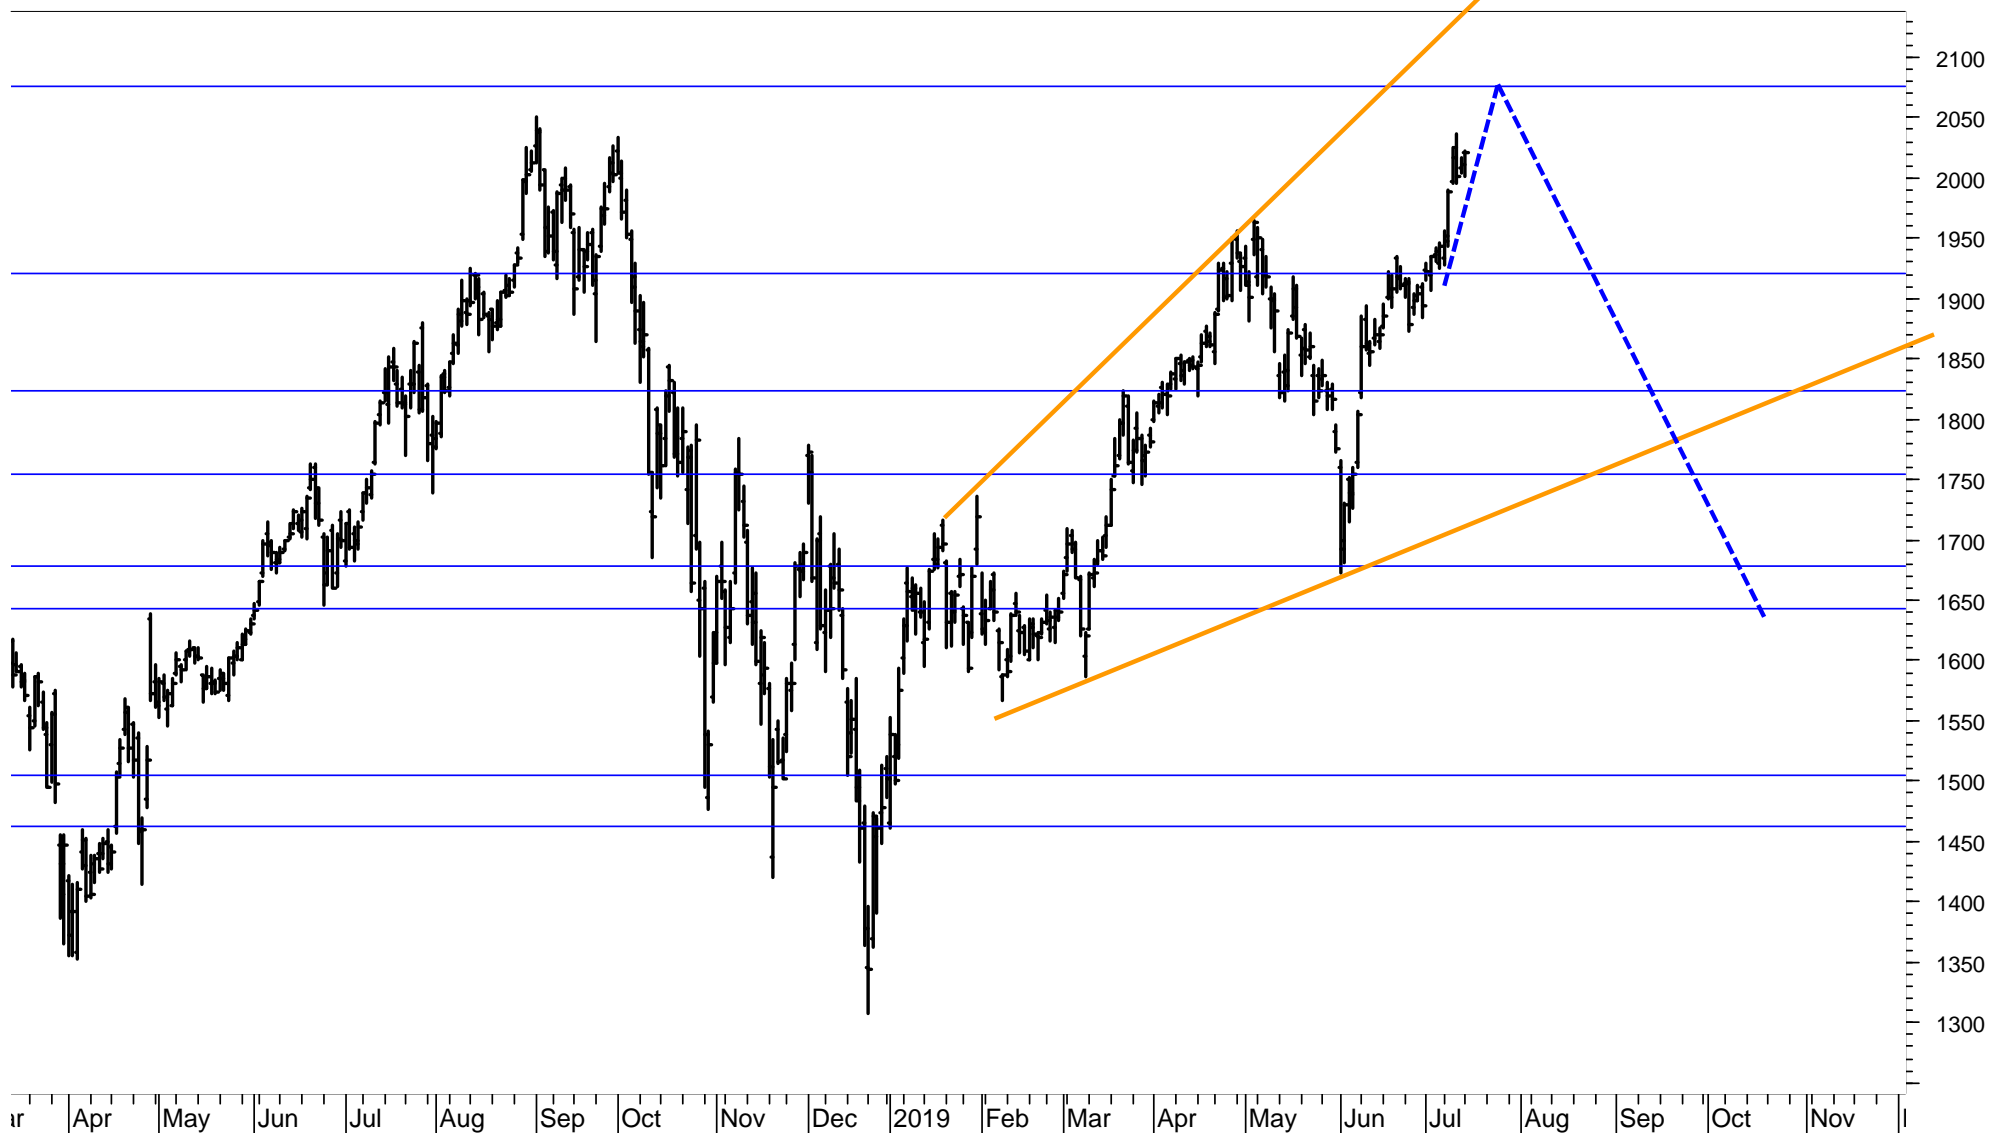

Google could be forming a TRIANGLE with support at 1115 / 1100.  
A break of 1100 would signal 1000.

# AMAZON – daily chart – reprinted from my Chart Outlook of 16.7.2019

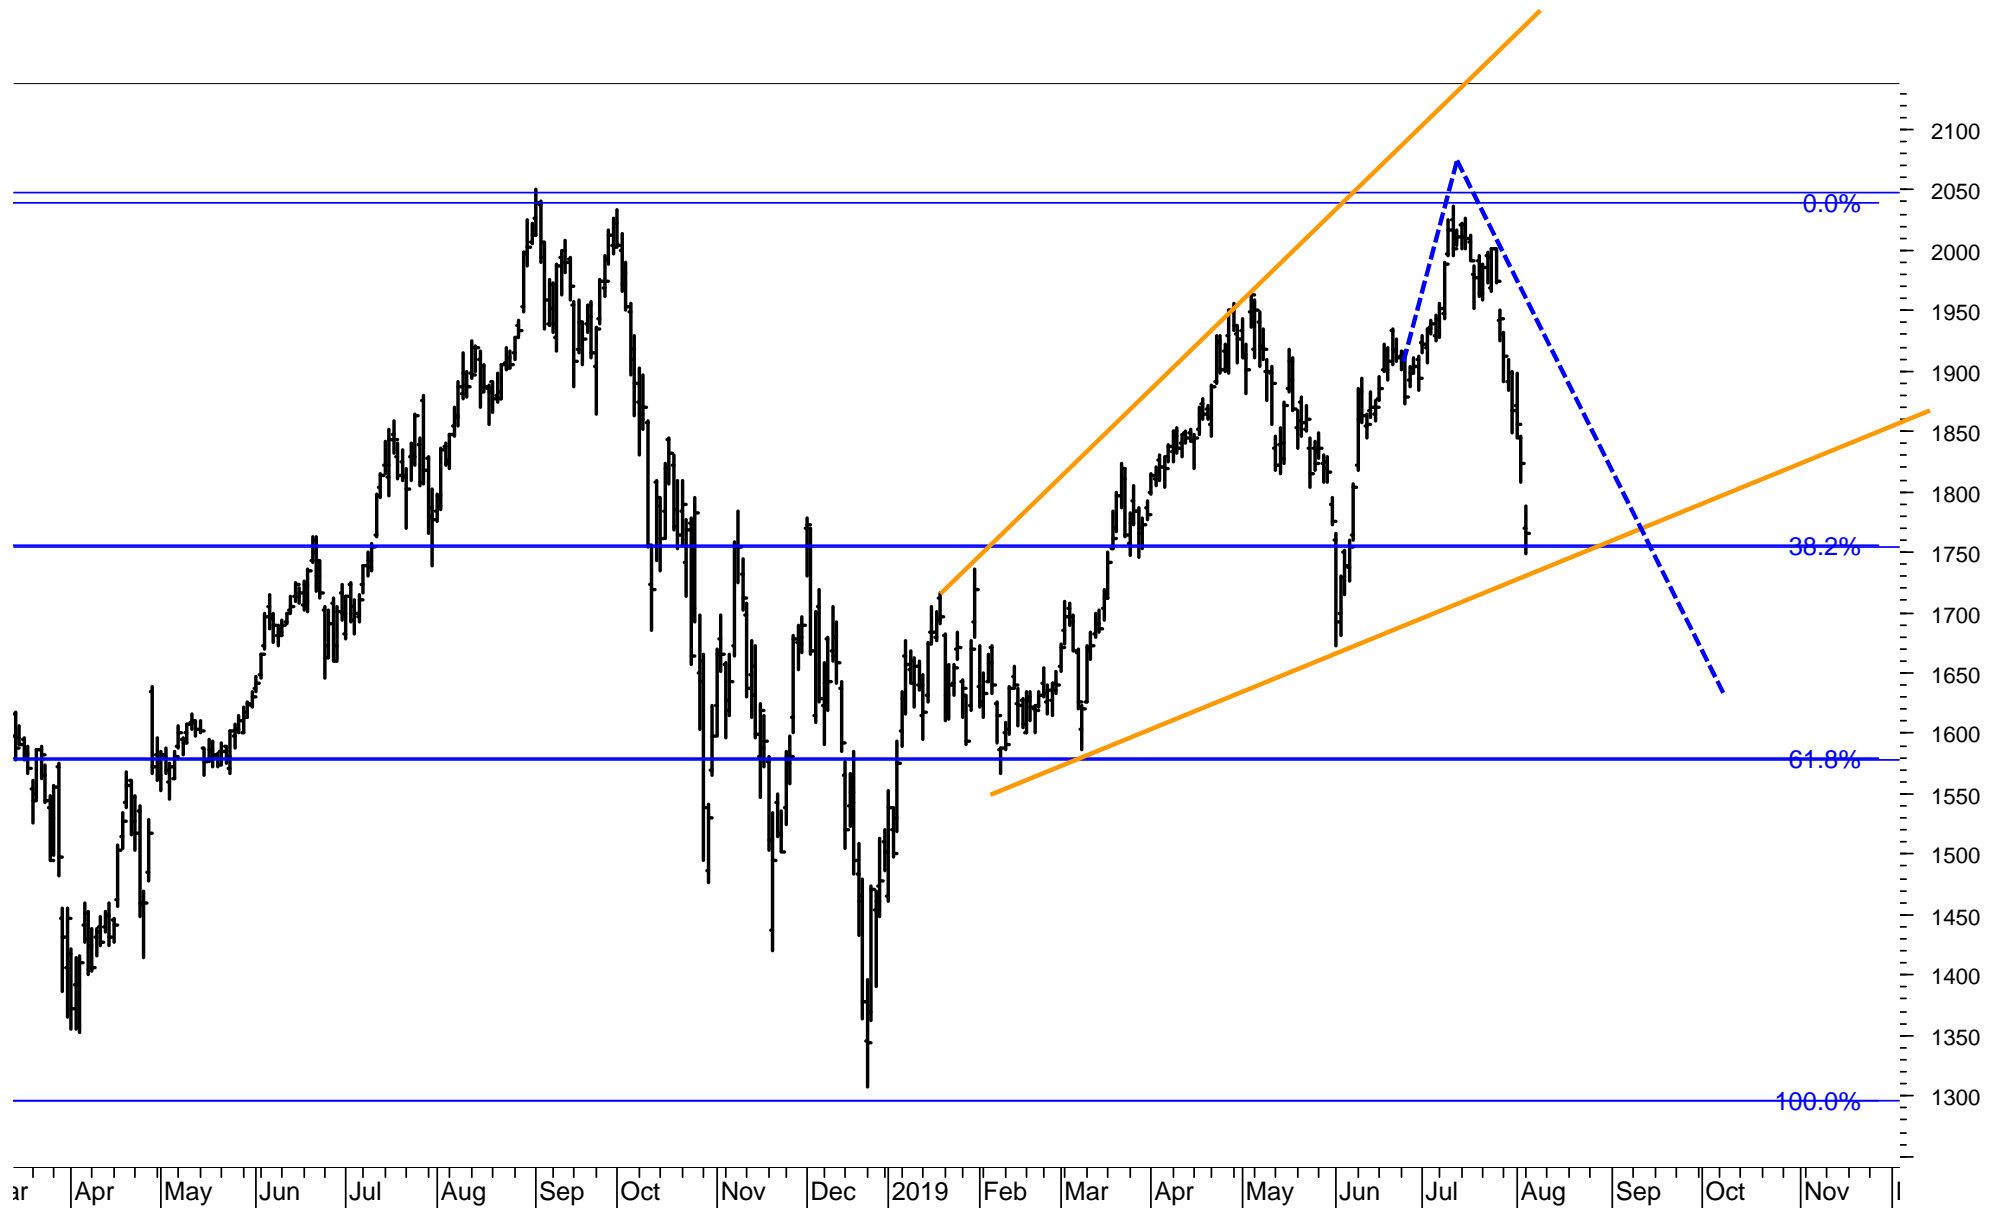

On 16.7.2019 I stated: “Amazon broke the resistance at 1925 and is heading to the next resistance and potential top level at 2080”.

See the update chart on the next page.

# AMAZON – daily chart

Amazon followed my projection quite precisely. It fell to the support at 1750, a break of which will signal 1580 or 1300.

# APPLE

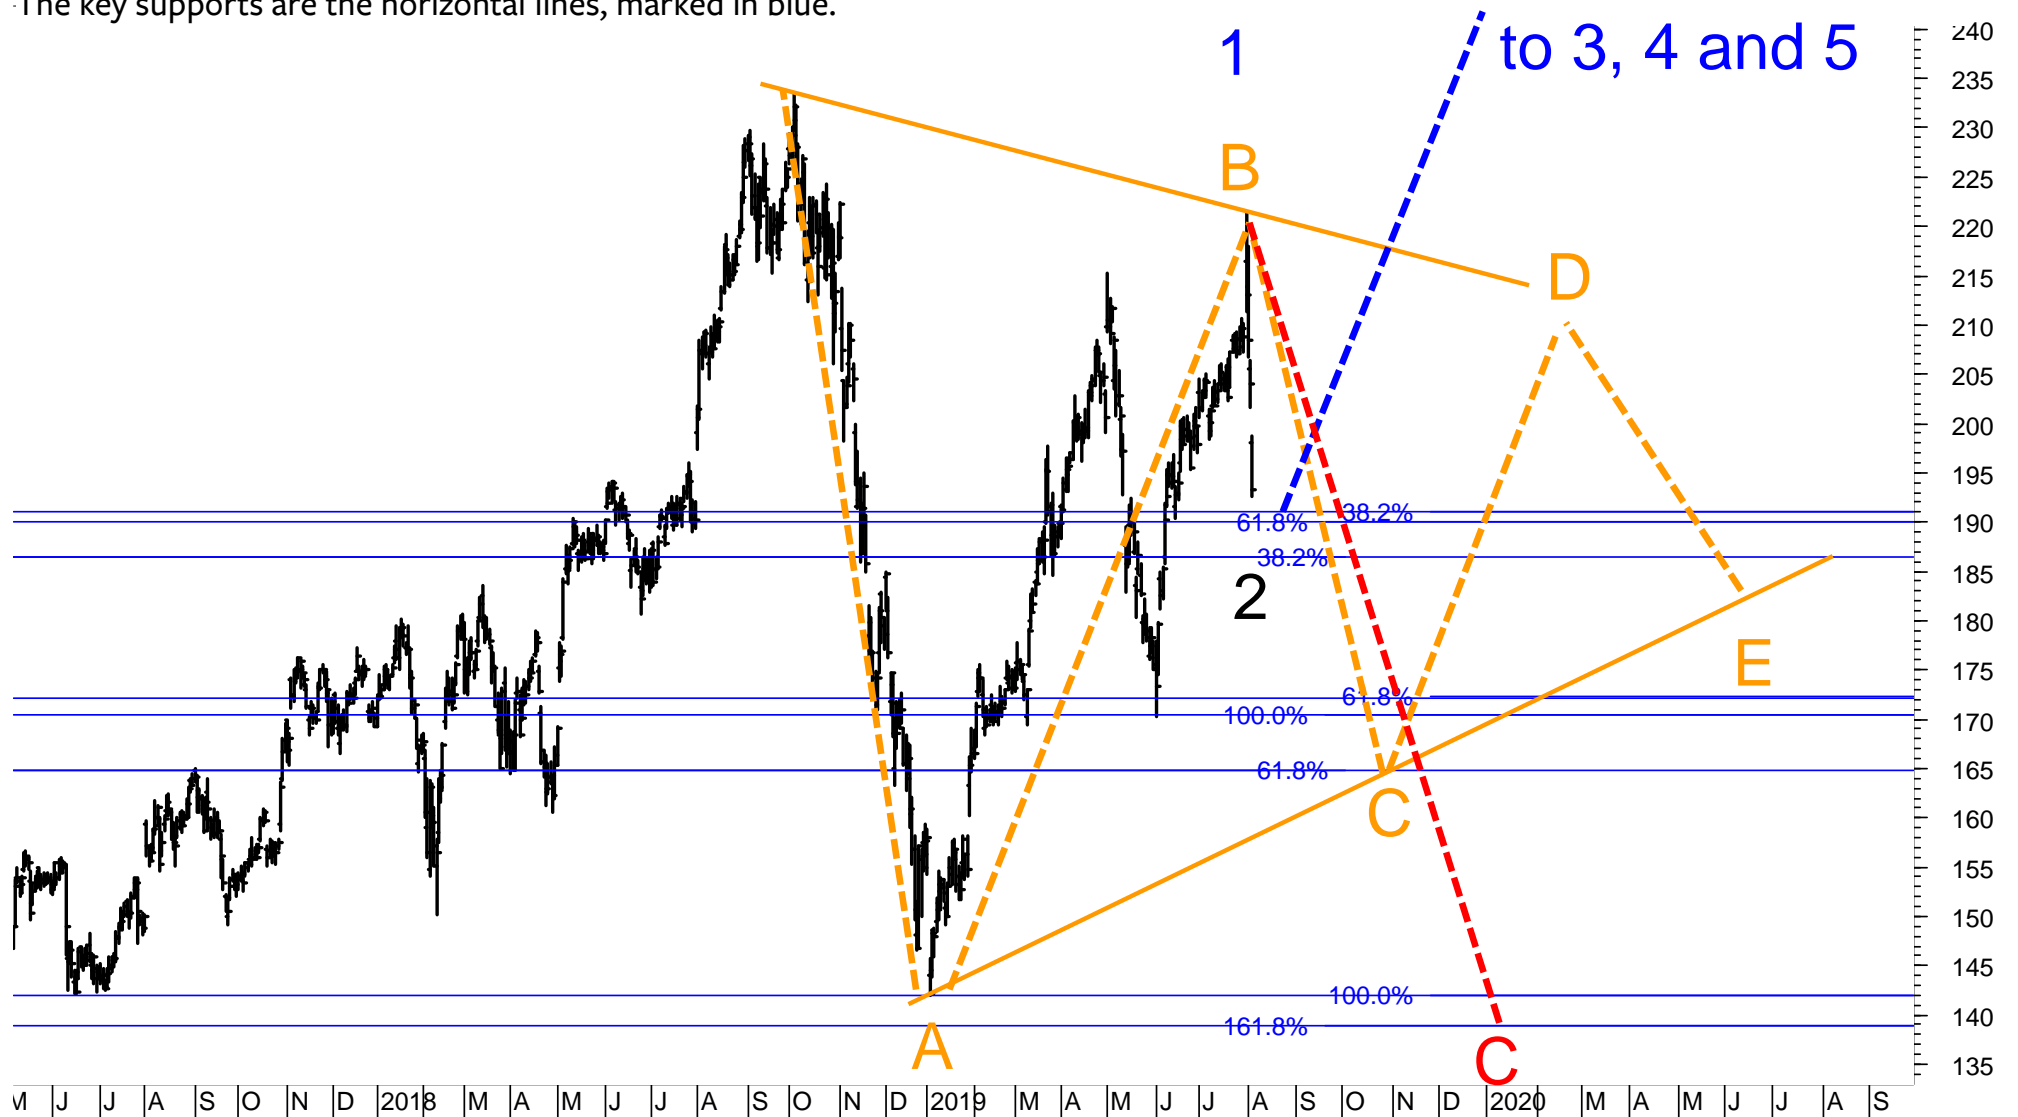

Apple can be forming three possible patterns.

Bullish: The rise from December 2018 to August 2019 was Wave 1. The present correction is Wave 2. It will be followed by a lengthy uptrend in Wave 3 (marked blue), followed by Waves 4 and 5, to substantially higher levels.

Bearish: Apple is forming a TRIANGLE (A-B-C-D-E, marked orange)

Bearish: Apple is forming A FLAT (A-B-C, marked red)

The key supports are the horizontal lines, marked in blue.

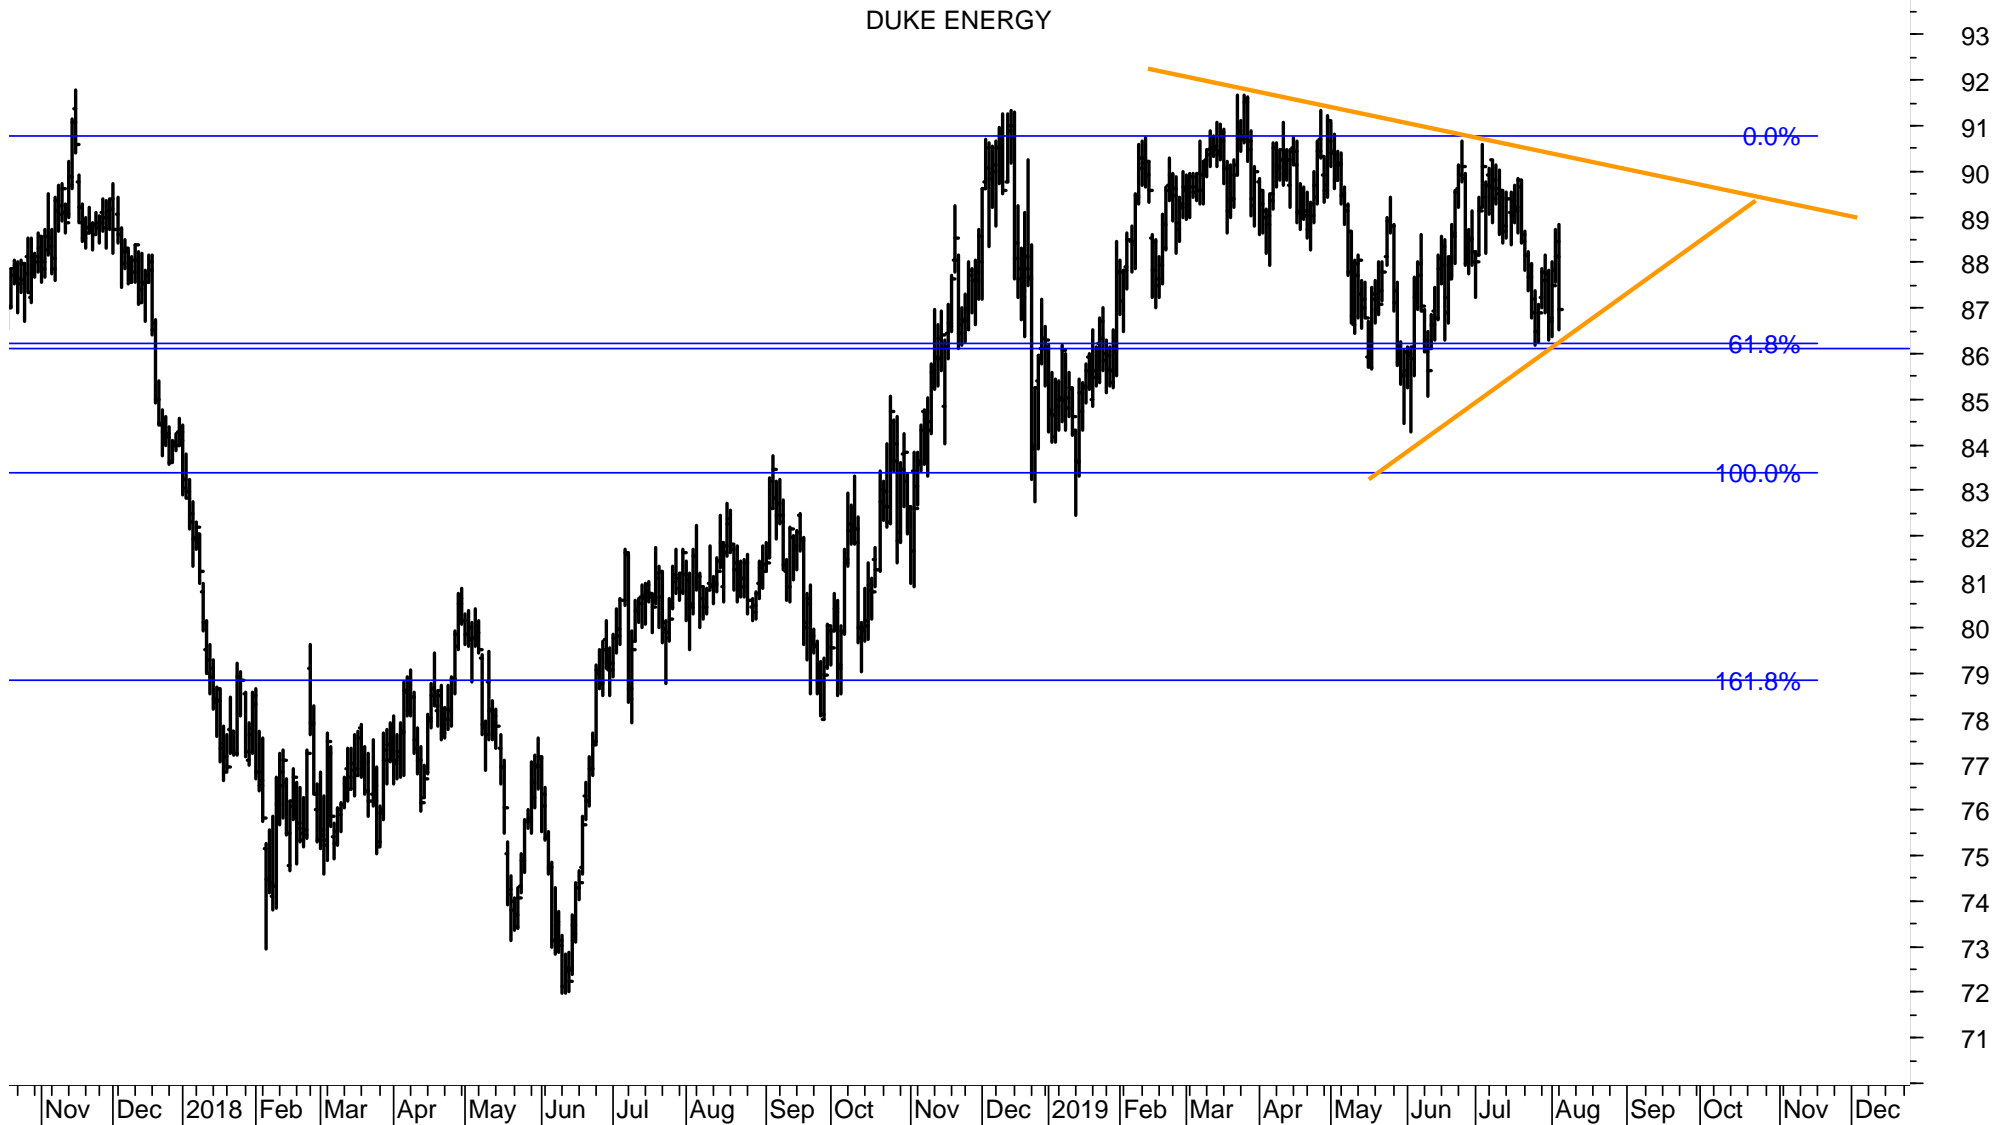

# DUKE ENERGY – daily chart

I recommended Duke on 14.6.2019 at 87.90..

The pattern from November can still be labeled as a Triangle and a break to new highs is still likely to unfold.

But, it must hold above 86 or it would signal 83.50 / 83 or 78.50.

# FACEBOOK – chart at left is reprinted from my Chart Outlook of 30.7.2019

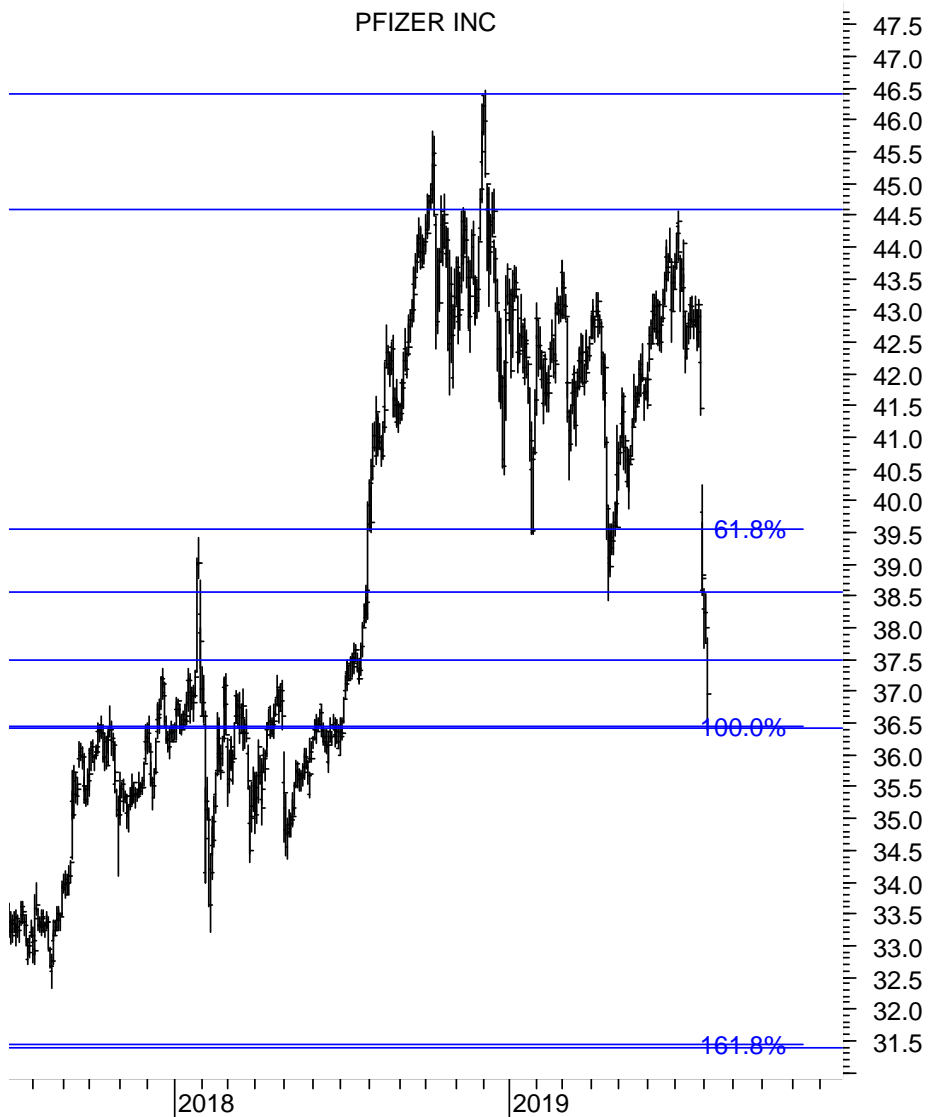

I stated on 30.7.2019: „It quickly rose to the medium-term resistance at 207.50 and appears to top out. I would sell the present position and look for a correction to at least 190.“

The chart at right is updated and signals the key supports at 176 / 172 and 155 / 149 or 124.

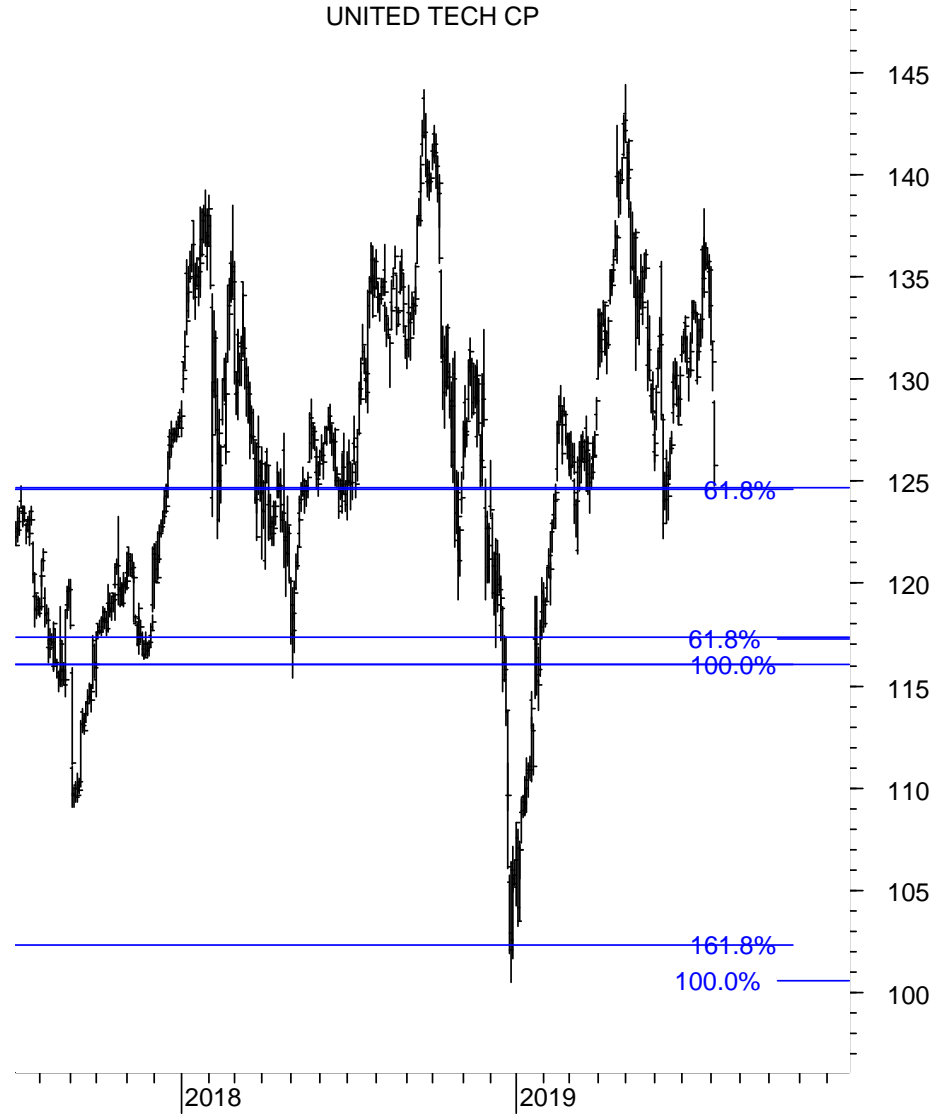

## PFIZER – daily chart

Pfizer fell to the major support at 36.50, a break of which will signal 31.50.

## UNITED TECHNOLOGIES – daily chart

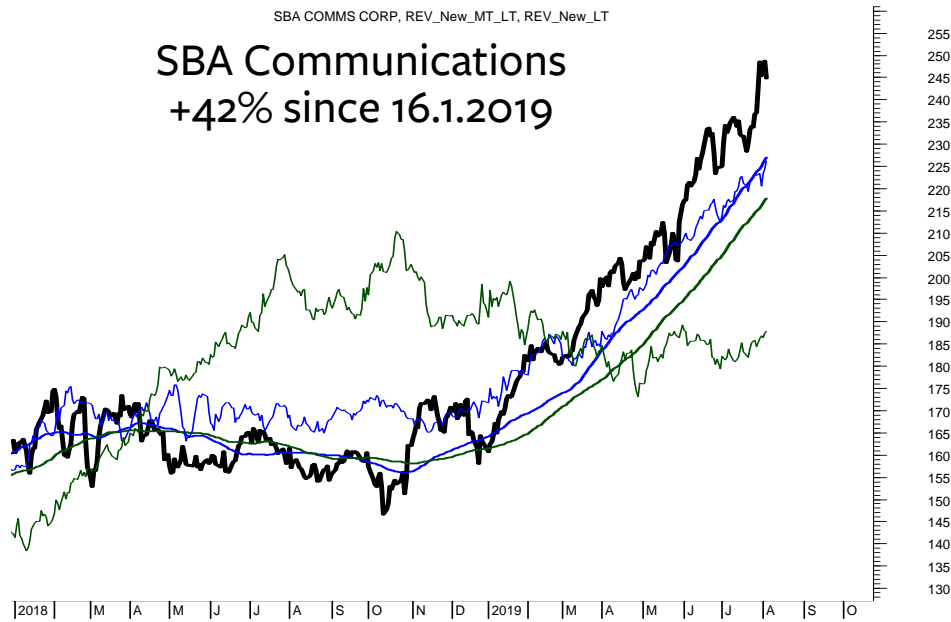

UTX fell to the major support at 125, a break of which will signal 117 / 116 or 102 / 100.

# ALIBABA

Alibaba could trigger a major sell signal if it breaks below 150 and again if it breaks below 145. Lower support is at 132 and 115 / 100.

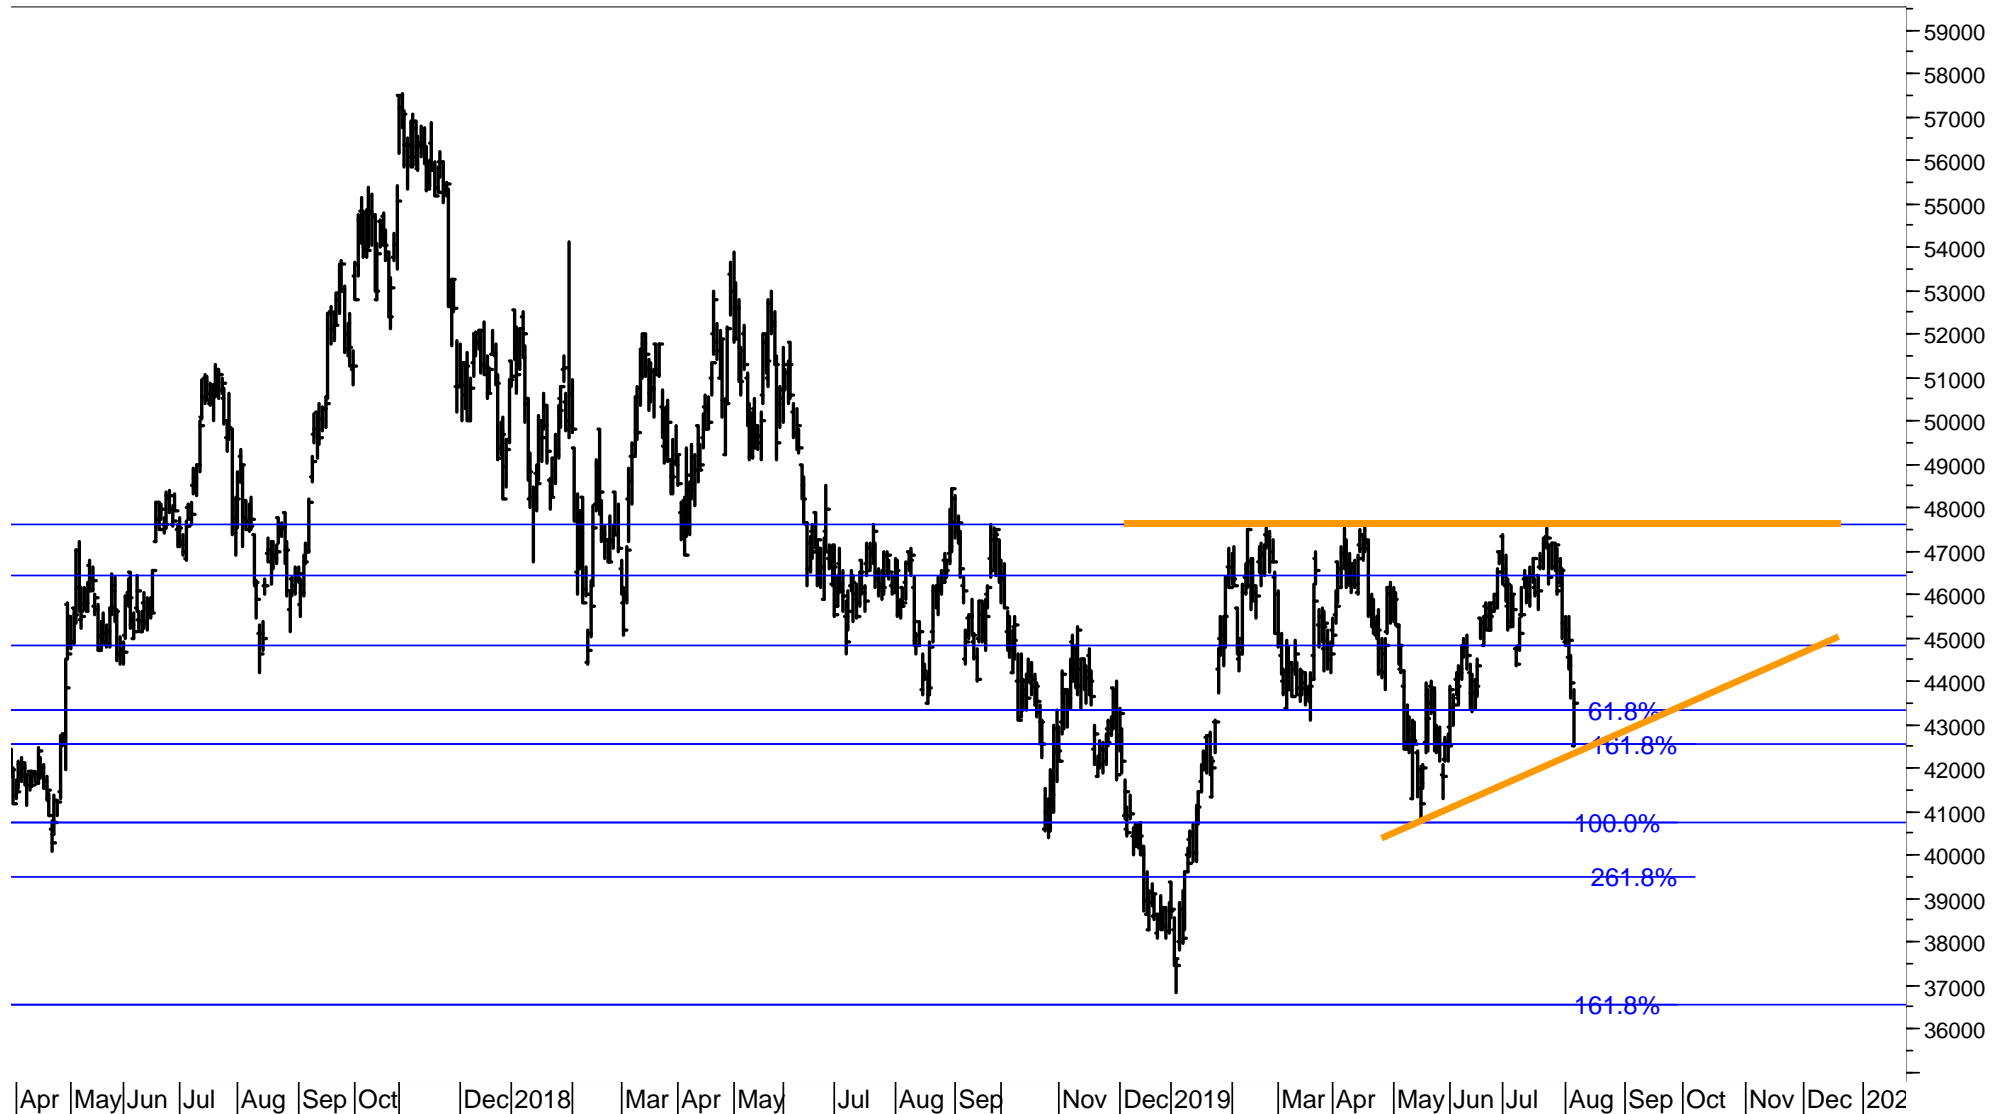

# BAHARTI AIRTEL

Baharti could be triggering an inverse head and shoulder bottom. Possibly, the stock is forming Wave D upwards within the large triangle, which originated in 2007.

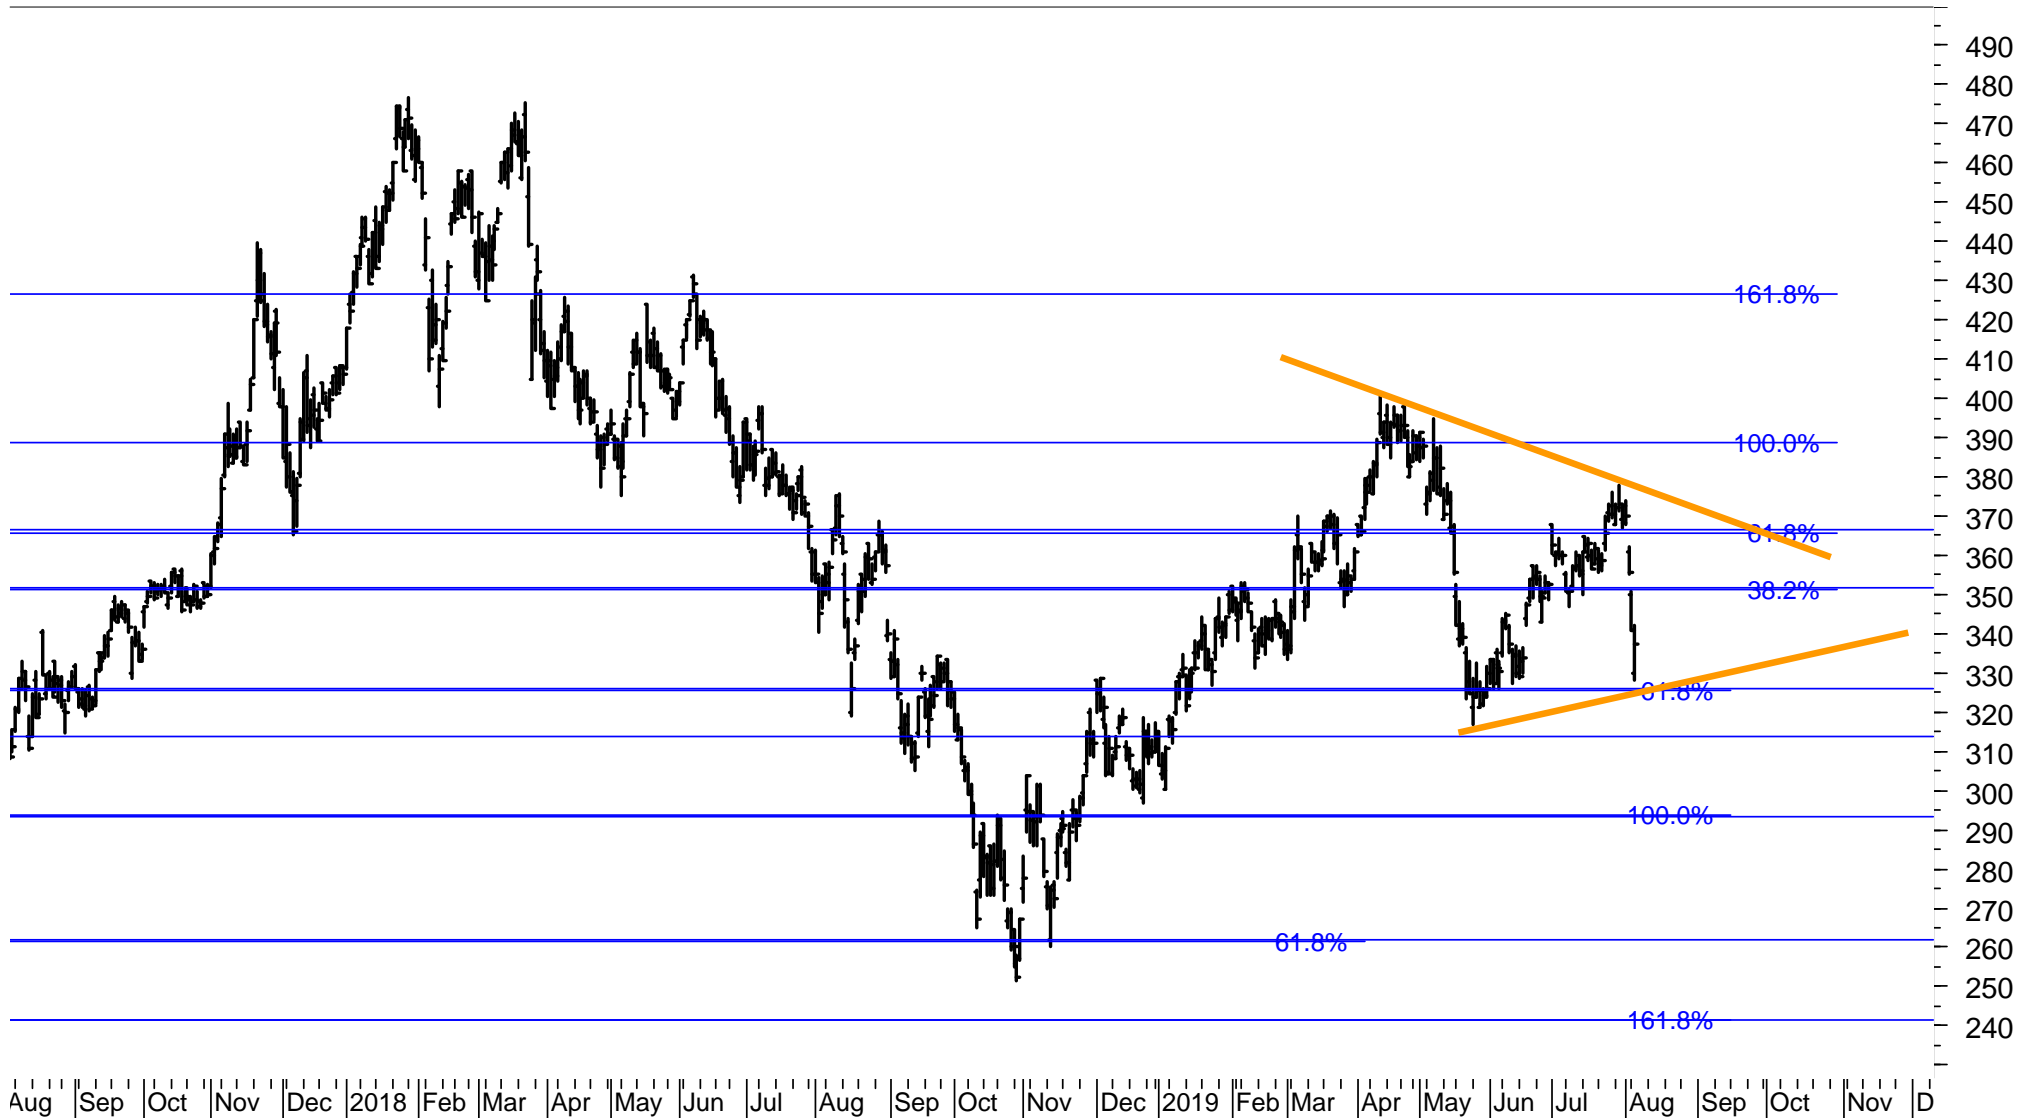

# SAMSUNG ELECTRONICS

Samsung turned down from the resistance at 47.7k and tested the support range between 43.4k and 42.5k. A break of this range will signal 40.8 or possibly 36.5k. Resistance is at 45k and 46.4k.

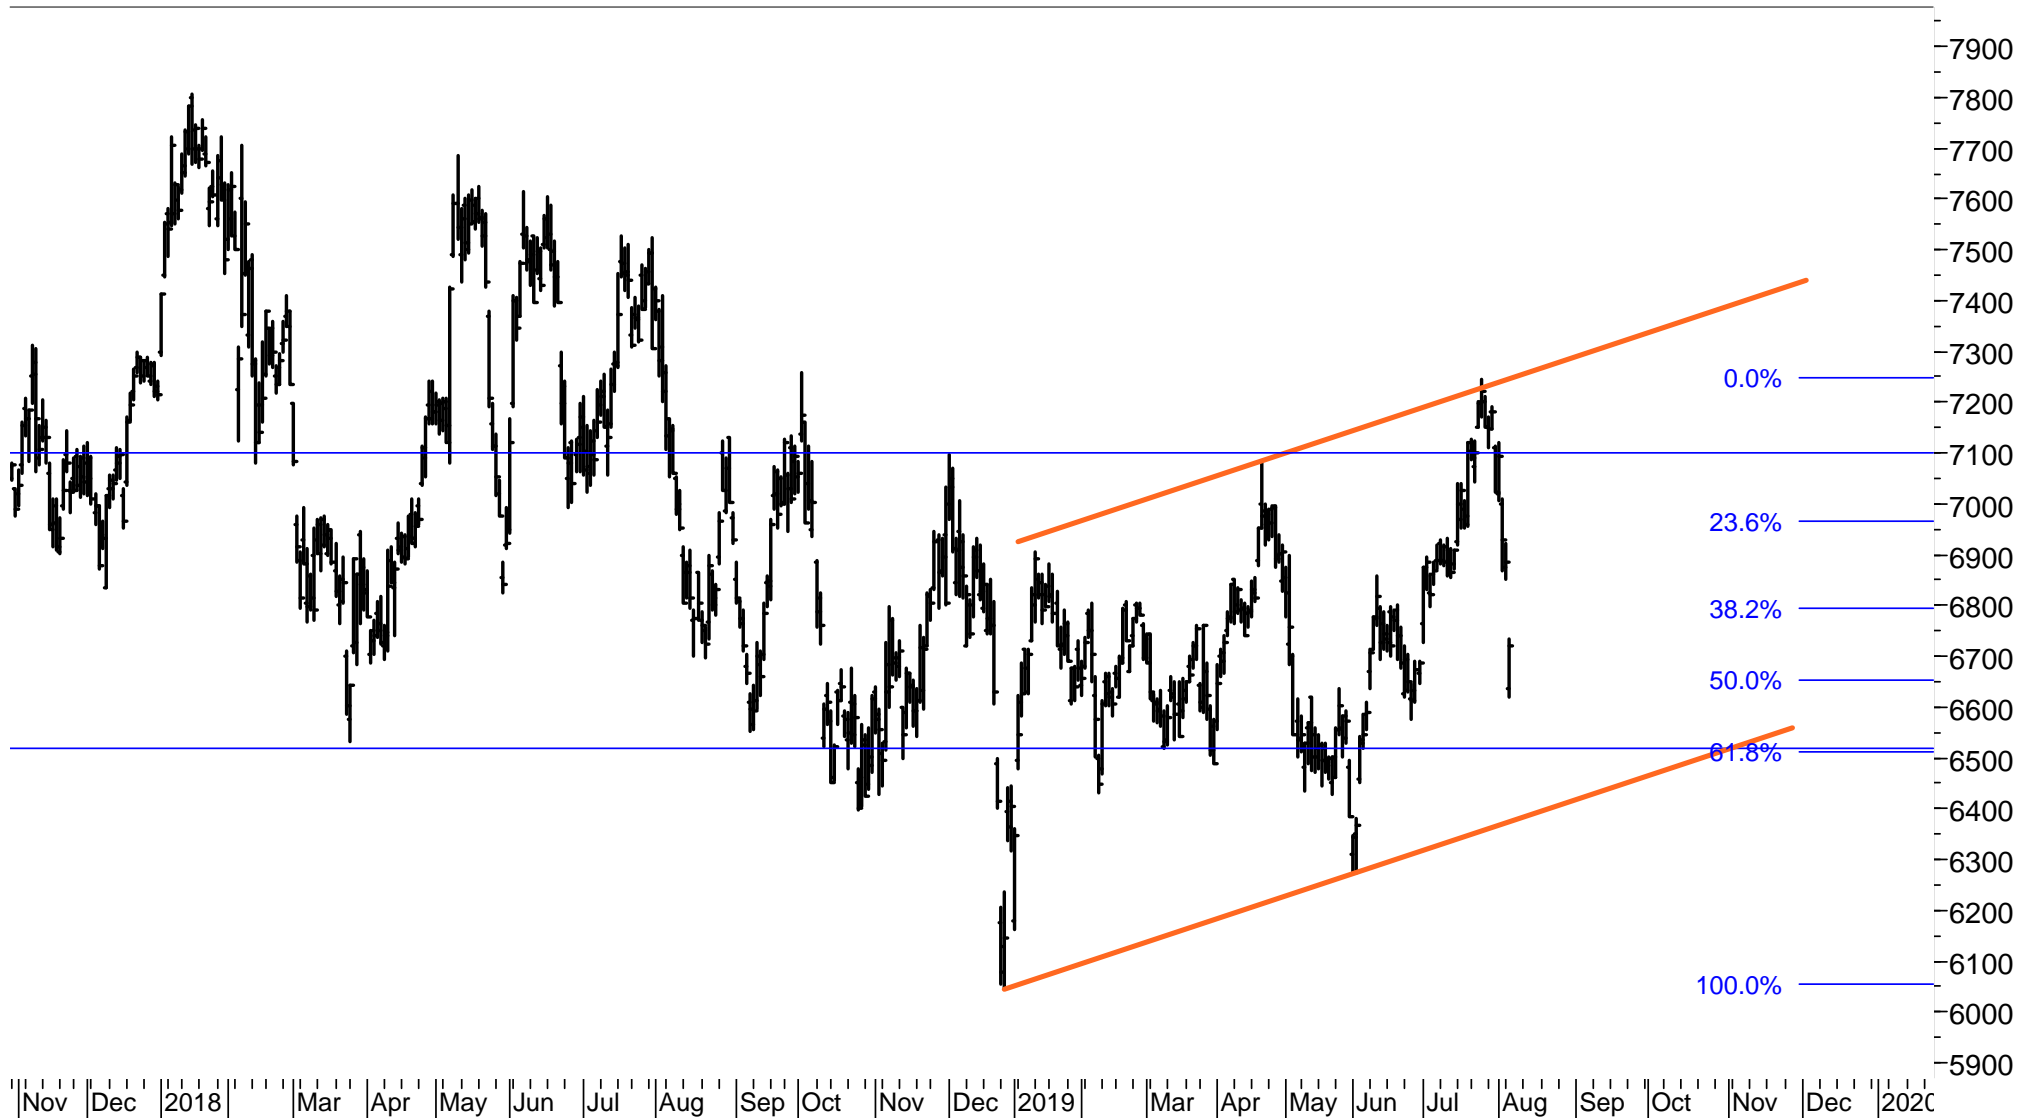

# TENCENT

Tencent could be breaking the resistance at 375.  
It will take a rise above 380 / 395 / 410 to signal 465.

# TOYOTA

Toyota triggered a short-term sell signal with the break of 7140 / 7100.  
Long-term positions should be sold if 6500 is broken.

This Publication is designed for sophisticated money managers who are aware of the risk in securities investments and market forecasting. The analysis herein is based both on technical and cyclic readings and the recommendations represent the opinion of the Publisher, FinChartOutlook GmbH. Past performance does not imply or guarantee profitable results in the future. Before making specific investments, further investigation is recommended. Although the information contained in this Publication has been derived from sources which are believed to be reliable, they are not always necessarily complete and cannot be guaranteed. Neither the Publisher, FinChartOutlook GmbH, nor any of its employees, affiliates or subsidiaries shall have any liability for any loss, harm or other detriment which has been sustained by any natural person or entity that has relied on the information contained in this Publication. Any person or entity who does rely on any information contained in this Publication does so at his/her own risk and by doing so assumes all liability for any such loss, harm or other detriment. Employees of the Publisher may at times have positions in the securities referred to in this Publication and may make purchases or sales of these securities while the Publication is in circulation. An advisor / client relationship is not created by the distribution or delivery of this publication.

The information published and opinions expressed are provided by FinChartOutlook GmbH for personal use and for informational purposes only. The information is not intended to provide specific financial, investment, tax, legal or accounting advice for you, and is not intended to be relied upon in that regards. You should not act or rely on the information without professional assistance. Non information published in this Publication constitutes an offer or recommendation, to buy or sell any investment instruments, to effect any transactions, or to conclude any legal act of any kind whatsoever. FinChartOutlook GmbH disclaims, without intention, all liability for any loss or damage of any kind, including any direct, indirect or consequential damages, which might be incurred through the use of any information in this presentation.
